The Museum of Rural life of Punjab

The Museum of Rural life of Punjab in the campus of the Punjab Agricultural University is one of the must-sees for any tourist of Punjab. The museum is located at the back of College of Home Science of this University. This museum displays the Punjabi Culture to its best. The whole credit for building up this museum goes to Dr. M.S. Randhawa, the first Vice Chancellor of this University. It was he who conceived the idea and initiated the project. He decided suitable design for the building and collected the old objects from small ancient villages and towns like Sultanpur Lodhi, Rahon, Goindwal, Zira and Sunam.

Urban Primary Census Abstract. 618

Annexure I : Number of villages under each Gram Panchayat 648
Annexure II : Fertility and child Mortality, 1991 Census 648
Annexure III : Measures of fertility and mean age at marriage, fertility level 649
Annexure IV : Percentage distribution of in Migrants by place of birth/place of last residence. 650
Annexure V : Brief account of main religions in the district/tahsil as per 1991 Census 652
Annexure VI : Marital status of population 653
Annexure VII : Distribution of Literate by sex and Education Level 654
Annexure VIII : Distribution of different mother tongues. 655

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 census , is one of the important publications in the context of planning and development at gross-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics, village-wise and town-wise, of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive Censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 Census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 Census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 Census DCHB was in two parts : Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features alongwith restructuring of the formats of village and town directory were added to it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centres, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible villages in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 Census DCHB, by and large, followed the pattern of presentation of 1981 Census, except the format of PCA which was restructured. Nine–fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex-wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD block level will help the planners in formulation of micro level development plans, CD block being the lowest administrative unit.

4. The present series of 2001 Census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and

recreational facilities. In town directory, the statement on Slums has been modified and its coverage enlarged by including details on all slums instead of 'notified slums'. The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 Censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristics of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio-demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code number (PLCN) in all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Inder Jit Singh, IAS, Director of Census Operations, Punjab. Thereafter, efforts have been made to ensure comparability of the information with that of 1991 Census data and the information brought out by the respective State Governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G.Mitra, Deputy Registrar General, (C&T) and Dr. I.C.Aggrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP), helped in preparation of record structure for computerization of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinised in the Social Studies Division under the guidance of Shri S. L. Jain, Deputy Director and Shri R. K. Mehta, Assistant Director. I am thankful to all of them and others who contributed to make this publication possible.

D.K. Sikri
Registrar General &
Census Commissioner, India

New Delhi
Dated 2007

Preface

The publication of District Census Handbook (DCHB) has been a regular feature ever since 1951, the first Census after independence. It aims to provide village/town level statistics for use by the government departments, non-government agencies, academicians and scholars, alike.

At the 1961 Census, a beginning was made to also include village level data on availability of amenities such as educational, medical, postal and communicational, land use pattern etc. in the form of Village Directory. Likewise, for towns, information with regard to their physical, financial, socio-cultural aspects and infrastructure were also added at town level. Keeping in view the great utility of non-census data in the form of Village Directory and Town Directory, the same has remained to be an integral part of the DCHBs ever since 1961. Above all, the analytical part and inclusion of maps presenting data at village level has further enriched the scope and use of this publication. The analytical note describes historical, administrative, physio-graphic and demographic aspect of the district.

The present volume has two parts viz., Part A - Village and Town Directory and Part B - Primary Census Abstract, giving data for each village within the Community Development (CD) Block and each town in the district. The CD block maps included, presenting village level data, have been prepared by using computer assisted technology. In order to ensure greater authenticity of the data, an effort has been made to cross check the same with the information available from other sources. We do hope that the contents and coverage of this publication would be of great use to the user agencies.

The production of the DCHB has always remained to be a joint venture of the Central Government and the State Government. We greatly acknowledge and express our deep gratitude to the Government of Punjab for extending their complete cooperation in providing the requisite data in the form of Village Directory and Town Directory. The District Gazetters and the Statistical Abstracts brought out by the State Government were of big help to us in the preparation of brief analytical note.

We owe our deepest gratitude to Shri D.K. Sikri, IAS, Additional Secretary, Registrar general, India and Census Commissioner and Shri J.K. Banthia, IAS, former Registrar General and Census Commissioner, India for their directions and support from time to time in accomplishing this arduous task.

In the directorate, at the outset we are beholden to Shri Inder Jit Singh, IAS under whose able guidance and direction as Director Census, Punjab, the census operations in the state were successfully completed.

Our thanks are also due to Shri D.R. Khanna, Ex-Deputy Director for getting the compilation of data and Shri Madhav Shyam, Ex-Deputy Director for drafting this specimen model which has been replicated in other DCHBs.

The great effort and hard work done by Shri Bhagirath Singh, Assistant Director, Sh. Rajender Prasad, S.I.Gr-I, Sh. B.S. Rai, S.I. Gr-I and Sh. C.K. Dutta, S.I.Gr-I are greatly acknowledged. Sh. Azad Kumar, S.I. Gr-III and Sh. H.S. Sudan, S.I.Gr-III deserved special thanks for having completed the publication work.

Last but not the least the publication of DCHB is a collective effort of the staff in the directorate and the services rendered by them (as per list) are acknowledged with thanks.

District Highlights - 2001 Census

1. Ludhiana district ranks 4th in area and 2nd in population in the state.
2. Ludhiana (East) is the most populous and Khanna is the least populated tahsil.
3. The average population size of a village in the district (1,464) is higher than that of the State (1,311).
4. Gill (15,062) is the largest village of the district, followed by Kaunke (11,096) and Halwara (11,024).
5. There are 26 large size villages (5,000 or above) in the district.
6. The decadal population growth rate in the district (24.9%) is higher than that of the State average (20.1%).
7. Ludhiana district is highly urbanized as 55.8 per cent of its population is urban. It is as low as 33.9 per cent for the State.
8. The sex ratio in the district (824) is much lower than that of the State (876). It ranks at the bottom (i.e. 17th) among the districts in the State.
9. The child sex ratio in the district (815) is higher than that of the State (798). It ranks 3rd among the districts in the State.

ANALYTICAL NOTE

Analytical Note

(i) History and scope of the District Census Handbook

Ever since the beginning of first post independence Census of India 1951, the publication of District Census Handbooks (DCHBs) has become a regular feature of the Indian Census. Produced by the Census Organisation of Government of India on behalf of the State Government, the DCHB is a unique publication which gives the census as well as non-census data down to every village in case of rural areas and ward within the town/urban area in the state. It is recognized as one of the most comprehensive sources of information. Infact, this is the only publication which provides primary census abstract based on census, and non-census data on infrastructure and amenities available, such as educational, medical, postal and communicational at the sub-micro level. It is inter-alia used for delimitation of constituencies, formulation of local level and regional plans and serves as a valuable tool for district administration.

Undisputedly, DCHB has remained to be the most comprehensive and valuable product of the census organization ever since its initiation. It has always been the endeavour of the Census of India to enlarge the content and coverage of the data presented at every census. The DCHB series of 1951 Census contained important Census Tables and the Primary Census Abstract. At the 1961 Census, the scope of the DCHB was enlarged by including a descriptive account of the district, administrative statistics, census tables and the village and town directory. In 1971, the DCHBs were planned in three parts; Part-A included the village and town directory, Part-B included village and town wise primary census abstract, while the Part-C was meant to include analysis of census data and a write up covering social, cultural, historical and other important aspects. However, in some states/union territories Part-C remained confined to the district tables only.

During 1981 Census, some new features were added and the formats of village and town directory were restructured, somewhat. These volumes were published for each district in two parts. Part- A included village and town directory, while Part-B included primary census abstract (PCA) of every village and ward in town/urban area. The inclusion of scheduled castes PCA was the additional feature of the 1981 Census. The village directory of 1981 Census included new parameters viz; information on Adult literacy Centres, Primary Health Sub-Centers and Community Health workers in the village (s) to meet the requirement of the Revised Minimum Needs Programme. In addition, information on approach to the village was also provided for the first time in the village directory to help in taking stock of villages requiring road linkages in the district. Likewise, Statement IV-A included in the Town Directory aimed to provide data on slums so as to undertake development activities in such areas.

The manner of presentation of the DCHBs for the 1991 Census was, by and large, same as followed in 1981 Census. However, the format of PCA was slightly restructured in the 1991 Census for the benefit of data users. The village level data were presented Community Development (C.D.) block wise to cater to the needs of grass root level planning as envisaged under the five year plans. Ninefold industrial classification of the main workers was reintroduced by replacing the four-fold industrial categories adopted at the 1981 Census. In addition, the PCA also gave population in the 0-6 age group by sex essential for working out effective literacy rate, besides providing proportion of child population.

The DCHB 2001, the present volume, is the sixth in series. The pattern followed is, by and large, similar to that of the 1991 Census. Among the new features added, information on the availability of newspapers/magazines, banking facility, agricultural and non- agricultural societies, recreational and cultural facilities and income and expenditure of the village panchayat

find mention. More important is that, it is for the first time in the history of Indian Census that Permanent Location Code Number (PLCN) has been allotted to every village in the state to meet the demand from different organizations to study the village level data over a time spell. It is believed that the permanent location codes assigned to each village would help in tracing the precise location of a village on account of jurisdictional changes in the boundaries of various administrative areas.

(ii) Brief history of the district

Very little is known about the history of the area. The Aryans, Scythians, Greeks, Huns, Turks, Afghans, and Mangolians, all passed by this way on their march towards Delhi, which has been the capital of India from early history.

It is presumed that this tract formed a portion of the Kingdom of Magadh at the time of Alexander's invasion, and it was then ruled by the Nanda kings. Chander Gupta Maurya overthrew the Nanda dynasty and extended his Empire to Afghanistan, which had been ceded by Seluex, one of Alexander's generals, to Chander Gupta Maurya, after a battle near Peshawar. Later during the reign of the Kushan kings, the territory comprising the Ludhiana District was included in their Empire, which at one stage included Uzbekistan and Tadzhikistan now in so uthern Russia.

The Gupta Empire extended from the Chenab in the north to Vindhyachal mountains in the south and from Sindh in the west to Bihar in the east. It was subjected to repeated invasions by the Huns-a ferocious tribe of the Central Asia, and ultimately they brought about its downfall occupying a large part of its north western part, in which the tract of Ludhiana lies, With the fall of the Guptas, the northern India saw a period of confusion till about the middle of 7th century when Satluj and from the southern boundary of Nepal to the river Narbada. Ludhiana formed a part of the Empire of Harsha, who built his capital at Thanesar.

With the break-up of the Harsha's Empire, the country split into hundreds of small king-doms of the Rajput Chiefs. They were constantly fighting against one another with the result that they could not withstand the invaders from the north-west, and the Hindu rule came to an end. The tract of Ludhiana was variously in the possession of the Tomar Rajput kings of Delhi, the Chauhans, and the Pal Dynasty.

Towards the end of the 10th century, the Turks of Central Asia, who were new converts to Islam, led expeditions and indulged in religious warfare's and crusades against the non-belivers in the middle-east. They occupied the whole of Iran, Afghanistan and Turkistan. The Hindus were defeated at Ohind and later at Peshawar. All attempts of Anand Pal and his son, Anand Pal, failed to check the Turks from ingression into India. Their Generals occupied the Punjab right upto Lahore. It was at this time that Basil Dev, grand father of Prithvi Raj Chauhan, established a strong Rajput kingdom in the area of Ajmer and Delhi. The Ludhiana tract formed a part of his kingdom.

Ghazniwide dynasty was over thrown by another tribe, headed by Mohd. Ghauri, a Turko Afghan Chief, who dreamt of establishing Muslim Empire in northern India. He must have felt very happy when Jai chand, the Rajput king of Kannauj sent him an invitation to invade India and promised all help against his cousin and son-in-law, Prithvi Raj Chauhan. Perhaps Jai Chand thought that, like Mahmood of Ghazni, Mohammed of Ghaur would also plunder and loot some towns of western India and return to Afghanistan, leaving the field clear for him. However, this did not happen. Mohammed Ghauri defeated Prithvi Raj at Taroari in 1913, and established his rule over Delhi.

The later Muslim rule is so well known that it needs not to be recounted here. The name of Ludhiana comes for conspicuous mention when in 1421, a powerful Khokhar Chief, Jasrat, rose

in revolt, occupied Ludhiana and made a strong bid for the Empire of Delhi. For sometime, Ludhiana remained in possession of Jasrat Khokhar. It was in this town that he kept Zirakh Khan as his Prisoner. Ludhiana was also the base of Jasrat Khokhar's attack on Sirhind. However, he had to abandon the town, when the imperial forces under Sultan Mubarak Shah Sayyad advanced towards Ludhiana. Malik Tughan and Jasrat had to retreat across the Satluj.

It was in the reign of Sikander Lodhi that the town of Ludhiana was founded. During his reign, the people in the tract of Ludhiana were oppressed by the plundering Biluchis. They applied to the Sultan for help. In answer to their Prayers, Sikander Lodhi sent two of his able Generals Yusaf Khan and Nihang Khan, with an army to protect the people against the onslaughts of the Biluchis. These Afghan Generals made Mir Hota, a small village at the site of Ludhiana, the headquarters of their army and a centre of their operations against the Biluchis. Yusaf crossed the Satluj to save the people of the Jalandhar Doab against the plundering by the Khokhars. He settled at Sultanpur. The other General, Nihang Khan, continued to reside at Mir Hota as the representative of the Sultan. He called the place, Lodhiana or the town of Lodhis. His grandson, Jalal Khan, built a fort at Ludhiana on the bank of the Satluj. At that time, the Satluj flowed just by the town of Ludhiana, at the place where the Buddha *nala* now exists. Sometime later Ludhiana was made a part of the province of Delhi and of the Division of Sirhind which was directly under the control of the Lodhi kings.

During the reign of Babar, Ludhiana and the country around it was a *mahal* (District) of the *sirkar* (Division) of Sirhind in the *suba* (Province) of Delhi. When Humayun, son of Babar was turned out of India, Ludhiana fell into the hands of Sher Shah Suri. After the death of Sher Shah, Sikander Shah Suri who was the governor of Punjab held Ludhiana. In 1555 Hamayun defeated Sikander Shah Suri at Machhiwara, 25 miles from Ludhiana, leading to his reinstatement as the Emperor.

During the regin of Akbar (1556-1605), People from other areas were brought and settled in the eastern parts of Ludhiana District. In the Ain-i-Akbari, Ludhiana has been mentioned as one of the *mahals* in the Sirhind *sirkar* of the *suba* of Delhi and this position continued during the reign of Jahangir and Shah Jahan.

Under the leadership of Guru Gobind Singh, a long drawn out struggle between the Sikhs of the cis-Satluj States and the Muslim Governors of Sirhind commenced. The District of Ludhiana with the adjoining country to the south, specially the forests near Machhiwara, were the places of the Guru's encounters with the enemy. Being defeated by Wazir Khan, the Governor of Sirhind in 1705, Guru Gobind Singh went to Deccan. From there he inspired Banda Bahadur, a Dogra from Jammu and Kashmir State, to continue the fight. Banda gathered some forces in Punjab and defeated and killed Wazir Khan, the Governor of Sirhind. He ran-sacked the town of Sirhind and over-ran the country between the Satluj and Jumna Farukhseer was the Emperor of Delhi at that time and he sent his army to curb the activities of Banda. In 1715, Banda was defeated at Gurdas Nangal and later executed. The Sikhs remained depressed and persecuted for sometime, but rose again against the tottering Mughal Empire. The Chiefs of the Phoolkian tribe, after some struggle, established Kingdoms for themselves on the ruins of the Mughal Empire. Ala Singh, the founder of the Patiala house, was a contemporary of Rai Kahla of Raikot. Ala Singh ruled at Patiala while the tract of Ludhiana was under Rai Kahla, who had held the lease of a considerable tract of land from the Mughal Emperors. Rai Kahla asserted his independence. A part of Ludhiana was also under Raja Ala Singh of Patiala and a part under the Muslim Governor of Sirhind. In 1741, the Governor of sirhind and Raja Ala Singh combined to defeat Rai Kahala and threw him out of his territory, through for a short period.

Nadar Shah Durrani invaded India in 1739. He crossed the Satluj at Ludhiana and marched through the District to Delhi along almost the same course as the present Grand Trunk Road, It is

said that while Nadar Shah was at Ludhiana, he got very much annoyed with the inhabitants of the town and ordered general massacre. It is, however, doubtful whether the massacre actually took place.

Ludhiana District saw another big fight in 1747 when Ahmad Shah Abdali invaded India for the first time. When he reached the Satluj, he found his passage blocked by the Mughal army. Ahmad shah Abdali made a long detour up the right bank of the river Satluj and crossed it near Machhiwara or Behlolpur while the Mughal army was waiting for him near Ludhiana. A battle was fought between the contending armies near the villages of Manupur and Barwali, a few miles to the north-east of Khanna. Ahmed Shah Abdali was defeated.

Ahmed Shah Abdali, however, invaded Punjab many a time after that but to his subsequent invasions no resistance was offered by the imperial troops in Sirhind, though his armies were constantly harassed by the Phoolkian Chiefs and the Rais. The Phoolkian Chiefs held sway over Patiala, Jind, Nabha and Faridkot, etc., while the Rais ruled over Raikot and some other parts of Ludhiana District. The Rais were permitted by Ahmed Shah Abdali to take possession of the town and the fort of Ludhiana in about 1760. in 1761, Ahmed Shah Abdali invaded India for the fourth time to punish the Marhattas who had ousted his son, Timur and the Afghan Garrison from Lahore. Marhattas had come under the leadership of their Chief, Raghoba, upto Lahore and after defeating the Afghans, had become supreme force in Punjab also. They appointed Adine Beg as their Viceroy at Lahore. When Ahmed shah Abdali came in 1761, Adina Beg fled to the hills. Abdali fought a decisive battle with the Marhattas at Panipat and crushed them. Zain Khan was appointed the Governor of Sirhind. In 1762 there was a formidable combination of Phoolkian Cheifs and other Sikh leaders assisted by Jassa Singh Ahluwalia and other Sikh leaders from the Majha tract, against Zain Khan, the Governor of Sirhind. Ahmed Shah Abdali, who was at Lahore, heard of this and marching the Satluj in two days he crossed it at Ludhiana and fell upon the allies. The Sikh army was cut to pieces and they were badly defeated near Barnala. This great disaster is known as *ghalu ghara* in the Sikh history. In 1763, however, the Sikhs again got together and rose against the Governor of Sirhind. The cis-Satluj Sikhs were aided this time fully by the Sikhs across the Satluj. Zain Khan was defeated and slain and sirhind fell into the hands of the Sikhs. The Town was plundered and razed to the ground.

With the fall of Sirhind, finished the last vestige of the Mughal control over the Division of Sirhind. The next year (1764), Ahmed Shah Abdali passed through the country and recognized Raja Ala Singh of Patiala as the Governor of sirhind. In 1774, Ahmed Shah Abdali came to India for the last time, but did not proceed beyond Ludhiana. Raja Ala singh's grandson Amar singh was confirmed as the Governor of Sirhind and also given the title of Maharaja. The whole of this rich tract thus came to the phoolkian chiefs and their Majha allies; the Mughals had no control whatsoever over them. A part of the district was also in possession of the Rais of Raikot. Their northern boundary was the river Satluj. They also held sway over the town of Ludhiana.; the low lands opposite their territory were held by Kakkar Sardars and Diwan Mohkam chand. The whole of the present uplands of Jagraon and Ludhiana Tahsil, with considerable part of the Moga and Zira Tahsils of the Firozpur district, belonged to the Rais. The land now comprising Samrala Tahsil was divided amongst the Sikh leaders. A famous leader of the Sikhs, Tara Singh Ghaiba established himself at Khanna , and Jassa Singh Ahluwiala of Kapurthala got about 30 to 40 village near Isru.

Twelve years after the fall of Sirhind, in about 1775, the Satluj river changed its course and the whole of the *bet* tract, which is about 50 miles in length and 5 to 6 miles in width, came to this side of the river. The condition of the Ludhiana tract, during that period, was very good; people were prosperous and the rule of the Rias was just and mild. It is said that they got only $1/4^{th}$ of the produce land as land revenue from the people without any other tax. The peace of the area was, however, disturbed by a Sikh Sardar, Bedi Sahib Singh of Una. In 1794, he crossed the Satluj

with an army and proclaimed war against the Nawab of Malerkotla. He was, however, defeated by the Maharaja of Patiala, who was a friend of the Nawab. But he came again in 1798 and attacked the Rias of Raikot. The Rias sought the help of the Maharaja of Patiala and an English general, George Thomas, from Hansi and they all defeated the Bedi Chief.

In 1803, Delhi was captured by the East-India Company and this brought the British Government in contact with the Sikhs chiefs of the cis-Satluj states. At that time Maharaja Ranjit Singh, the ruler of Lahore, was thinking of extending his dominion beyond the Satluj. A dispute was then brewing up among the Sikh rulers of Patiala, Nabha and Jind and this afforded an opportunity to Maharaja Ranjjt Singh. In 1806, he crossed the Satluj. Ludhiana town was then in the hands of the Rais and was controlled by Bhag Bhari, the wife of the last Rai ruler, and by Nur-ul-Nisa, his mother. They offered no resistance to Ranjit Singh, who took possession of the town and fort of Ludhiana. He passed on this area to his nephew, Raja Bhag Singh of Jind, Ranjit Singh also took Naraingarh in Ambala District in 1807. In these expeditions, Ranjit Singh took possession of the entire territory of the Rais except two or three villages, which were given to them for maintenance. A part of the territory was given to the Raja of Jind and another part consisting of Jagraon Tahsil and Dakha Pargna were given to Sardar Fateh Singh Ahluwalia of Kapurthala. Bhai Lal Singh of Kaithal got 16 villages about Gujjarwal and the Nabha Chief got some area in Pakhowal. Diwan Mohkam Chand became the Governer of the portion of the country reserved by Ranjit Singh for himself.

By 1809, the British decided that the progress of Maharaja Ranjit Singh, on this side of the river Satluj, Should be stemmed and that the Sikh Chiefs of the cis-Satluj States be taken under their protection. In 1809, a treaty was concluded between Maharaja Ranjit Singh and Mr. Matcalfe to the effect that Maharaja Ranjit Singh would not extend his territory beyond the river Satluj and that all the rulers of the cis-Satluj States would be considered to be under the protection of the British Government. The fort of the Ludhiana was occupied by the British army, and Ludhiana town became a military outpost. A British Resident was appointed at Ludhiana for the protection of the cis-Satluj Chiefs. Maharaja Ranjit Singh had to set up his own fort at Phillaur as a frontier fort of his territory.

The British Government acquired about 80 Villages around Ludhiana and Bassian on the death of Raja Sangat Singh of Jind in 1835 and an Assistant Political Agent was apponted to administer this territory with his headquarters at Ludhiana.

Ranjit Singh died in 1839; Confusion and disorder followed his death. In 1845, The Khalsa army crossed the Satluj and thus started the First Sikh War. Firozpur was the main point of their attack. The Sikh General Ranjodh Singh Majithia appeared with a force of 10,000 infantry, 16guns and some cavalry at Phillaur and crossed the Satluj. Nihal Singh Ahluwalia of Kapurthala played a double game. His troops fought the British near Firozpur. A considerable body of these troops had joined Ranjodh Singh near Ludhiana, while Raja Nihal Singh professed friendship to the British Government. He said that he had no control over his army. Ranjodh Singh was able to subdue the garrison at Ludhiana. Sir Henry Smith was then sent from Firozpur with 4,000 men to go to the help of the Ludhiana garrison but near Baddowal, this force was attacked by the Sikhs. The British troops were defeated. Ranjodh Singh was joined by some regular troops of the army from Lahore and his strength increased to some 50,000 men. Another battle was fought at Aliwal and there the Sikhs were defeated by the British army led by Sir Henry Smith. The Sikh troops were either driven across the river or dispersed over the uplands or got drowned in the river. After a month, the final victory was won by the British over the Khalsa army at Subraon and thus the First Sikh War ended. The British Government annexed the territory of Lahore Government on this side of the Satluj. The possession of the Ahluwalia Chiefs on this side of the river were also forfeited by the British and the Nabha Raja lost about a quarter of his territory. The territory of the other minor Chiefs who had opposed the British Government was also confiscated. From

these acquisitions was formed the District of Ludhiana in 1847 and the District began to settle down. In the eventful 1857, the Ludhiana town was garrisoned by a small detachment of infantry who turned hostile, and were joined by the local population and mutineers from Jalandhar. But the ammunition in the fort proved useless and they left for Delhi. The local officers took strong action against the rebels. Many of them were hanged and others were heavily fined. All houses within 300 yards of the fort were levelled. The area was kept safe with the help of the levies of Nabha, Malerkotla and fresh recruits. The Kooka rising also deserves mention. They were suspected of political movtives, and the Britishers got an opportunity to suppress them, when In 1872 some 150 Kookas attacked Malerkotla enraged by the killing of kine. These Kookas were, however, over-powered with the help of the forces of the native rulers. Forty-nine of them were executed at Malerkotla by blowing of guns without trial, and some others were executed after a nominal trial. Their leader, Satguru Ram Singh was deported to Rangoon where he remained a State prisoner till his death in 1885.

With the coming of settled conditions, the District began to develop socially and economically. Some industries were set up at Ludhiana and the town became a centre of industry and commerce. The hosiery and textile industries were set up in the early years of the twentieth century. Khanna and Jagraon developed mainly as commercial centres. More and more people shifted their residence from the rural areas to the urban areas. Ludhiana which had a population of only thousands came to have about a lakh pf people by the time of Partition. During 1947, the Muslim inhabitants of the District crossed over to West Pakistan and displaced persons from Western Punjab settled here in large numbers.

(iii) Administrative set-up

The State has experienced a large-scale jurisdictional changes after the 1991 census. The number of districts has increased from 12 in 1991 to 17 in 2001. The newly created districts include; Nawanshahr, Fatehgarh Sahib, Moga, Muktsar and Mansa. With the exception of Kapurthala district, all other 11 districts in the State have experienced inter-district jurisdictional changes of varying magnitude.

These 17 districts are distributed over four divisions. Jalandhar division includes districts of Gurdaspur, Amritsar, Kapurthala, Jalandhar, Hoshiarpur and Nawanshahr; Patiala division covers districts of Ludhiana, Ludhiana, Patiala, Fatehgarh Sahib and Sangrur. Firozpur division spreads over districts of Firozpur, Moga and Muktsar, while Faridkot division embraces districts of Faridkot, Bathinda and Mansa.

All the districts of 1991 Census except Kapurthala has undergone intra-districts jurisdictional changes resulting in increase in the number of tahsils in the State from 46 in 1991 to 72 in 2001 Census. (In Punjab Tahsil and Sub Division are synonymous to each other). Ludhiana district spreads over an area of 3,578 sq. kms. Presently it is sub-divided into seven tahsils: 1. Samrala 2. Khanna, 3. Payal 4. Ludhiana (East), 5.Ludhiana (West), 6.Raikot and 7.Jagraon. Likewise the number of towns in the district has increased from 8 to 12, out of which 11 have statutory status. The newly added town Akalgarh is Census Towns. The district constitutes 12 towns and 915 villages.Further it is sub divided into 7 Community Development Blocks: Ludhiana-II, Sidhwan Bet, Jagraon, Sudhar, Pakhowal, Ludhiana-I, Doraha, Machhiwara, Samrala, Dehlon and Khanna

The statutory towns are notified by the State government. Section 4 of the Punjab Municipal Act, 1911 lays down the specifications of local areas to be smaller urban areas or transitional areas and constitution of Municipal Council and Nagar Panchayat. Under this section, the state government may, having regard to population of area, the density of population therein, the revenue generated for local administration, the percentage of employment in non-agricultural activities, the economic importance or such other factors, as it may deem fit, specify by

notification in the official gazette any area to be transitional area or a smaller urban area for the purpose of this Act. Further, under Section 4 (ii) where an area is specified as a transactional area or as a smaller urban area under sub section (i), the state government may, by notification in the official gazette, constituted for the transactional area so specified a Nagar Panchayat and for the smaller urban area so specified a Municipal Council of the Ist Class, IInd Class or IIIrd Class.

The different categories of urban bodies constituted by Punjab government under the provisions of Punjab Municipal Act are as follows:

Sl. No.	Class of Urban Local Bodies	Population	Income
1	Municipal Corporation	3 lac or above	2 Crore or above
2	Municipal Council Class I	50,000 to 3 lac.	50 lac to 2 Crore
3	Municipal Council Class II	10,000 to 50,000	15 lac to 50lac
4	Municipal Council Class III	Up to 10,000	Up to 15 lac
5	Nagar Panchayat	5,000 or above	More than Rs.150 per head

The following statement indicates the jurisdictional changes, which took place after the 1991 Census in Ludhiana district:

Jurisdictional Changes during 1991-2001

Name of District/Tahsil	No. of villages as per		No. of Towns		Changes since 1991 & Govt. Notification No.
	1991	2001	1991	2001	
1	2	3	4	5	6
Ludhiana	**961**	**915**	**11**	**12**	
Samrala	256	200	3	2	i) 2/14/92-RE-II/(1)11118 dated 13.08.1992 ii) 2/44/94-RE II(1)/6769 dated 20.07.1995.

Raikot	-	75	-	2	xiii) 2/44/94-RE-II(I)/6745 dated 20.07.1995 and 2/69/96-RE II(I)/2241 dated 15.05.1997
Jagraon	188	139	3	1	xiv) 2/44/94-RE-II(I)/9098 dated 28.09.1995

For the administrative purposes, the district forms part of Patiala division. The district is the basic unit of administration. For the purposes of general and revenue set up the district is divided into seven tahsils viz, Samrala, Khanna, Payal, Ludhiana (East), Ludhiana (West), Raikot and Jagraon. All of them have sub divisional status. The administrative machinery of the district consists of hierarchy of officers and officials headed by the Deputy Commissioner (also the District Magistrate) as head of the administration of the district and revenue administration in the district.

(iv) Physical Features

Origin of Name:

The district takes its name from Ludhiana city, which serves as the seat of district headquarters. Ludhiana city was founded in the times of Lodi dynasty which ruled at Delhi from 1451-1526 AD. The legend goes that two Lodi chiefs Yusaf Khan and Nihang Khan were deputed by Sikandar Lodi (1489-1517 AD) to restore order in this region. They camped at the site of present city of Ludhiana which was then a village called Mir Hota. Yusaf Khan went across the river Satluj in Jalandhar Doab to check Khokhars, who were plundering the Doab and made a settlement at Sultanpur (now in Kapurthala district), while Nihang Khan stayed back and founded the present city at the site of village Mir Hota. The new town was originally known as Lodiana, which means the town of Lodis. The name was later corrupted to the present name Ludhiana.

Location and Size:

Ludhiana is the most centrally located district, which falls in the Malwa region of the Sate of Punjab. For administrative purpose it has been placed in the Patiala Division. It lies between north latitude 30°-34' and 31°-01' and east longitude 75°-18' and 76°-20'. It is bounded on the north by the river Satluj, which separates it from Jalandhar and Nawanshahr districts. The river also forms its northern boundary with Hoshiarpur district. On other sides it shares common boundaries with Rupnagar district in the east and Moga district in the west; and Sangrur and Fategarh Sahib districts in the south and south-east, respectively.

Area:

Ludhiana district has an area of 3,857.00 sq. km., as supplied by the surveyor General of India. Out of which, 250.3 sq. km. is urban shared among 12 urban units in this district, whereas the remaining 3,327.0 sq. km. is rural. The rural area of the district is derived by subtracting urban areas of the district from the total district area, as supplied by the Surveyor General, India. The tahsil wise area, as supplied by the Director Land Records, Punjab is: (1) Samrala 498.0 sq.km. (2) Khanna 241.9 sq.km. (3) Payal 448.2 sq.km. (4) Ludhiana (East) 642.7 sq.km; (5) Ludhiana (West) 611.7 sq.km. (6) Raikot 424.6 sq.km. and (7) Jagraon 809.6 sq.km. The area of the tahsils when summed up works out to 3676.7 sq. km., which does not tally with the area supplied by the Surveyor General, India. The urban area for the district has been obtained by adding up areas of towns, as supplied by the urban civic bodies. The rural area for Tahsil has been obtained by subtracting urban area from the Tahsil area, as supplied by the director Land Records, Punjab. The Community Development Block area has, however, been obtained by adding up village areas of the constituent villages, including census towns and out-growths of urban agglomerations.

Climate:

The climate of the district is characterized by dryness except in the brief spell of monsoon season, a very hot summer and a bracing winter. The cold season is from about the middle of November to the early part of March. The succeeding period up to about the end of June is the hot season. July, August and the 1st half of September constitute the south-west monsoon. The period from mid-September to about middle of November may be termed as post-monsoon or transitional period.

Temperatures increase rapidly after February. June is generally the hottest month. Hot and scorching dust-laden winds blow during summer season and on individual days the day

temperature may reach above 45°C. With the onset of monsoon in early July there is appreciable drop in the day temperatures but the night temperatures are nearly as high as the day temperatures. Due to the presence of increased moisture the weather is sultry and humid and the days are quite uncomfortable. After about mid-September the night temperatures drop appreciably but in the day the temperature does not decrease rapidly. From about November, however, both the day and night temperatures decrease rapidly tills January, which is the coldest month. Rains are experienced in the months of January and February due to western disturbances, which cause appreciable drop in temperatures which may touch the freezing point on some days.

The rainfall in the district increases from South-West towards the North-East. About 70 per cent of the rainfall is received during the period July to September. The rainfall during December to March accounts for 16 per cent of the rainfall. The remaining 14 per cent rainfall is received in other months of the year. The following table gives monthly rainfall based on average of 5 years 1996-2000 for the district:

Monthly Rainfall: Average of 5 years 1996-2000

Month	Rainfall (mm)	Month	Rainfall (mm)
1	2	3	4
1. January	23.2	7. July	153.4
2. February	27.9	8. August	119.0
3. March	10.3	9. September	78.7
4. April	10.6	10. October	25.8
5. May	20.5	11. November	3.9
6. June	74.2	12. December	15.3
Total			**562.8**

(Source: Statistical Abstract of Punjab, 2001)

Physiographic:

Ludhiana district is centrally located in the Punjab plain region which is marked for its flatness and featurelessness. The topography of the district is a typical representative of an alluvial plain and it owes its origin to the aggravational work of the Satluj. The alluvium deposited by this river has been worked over by the wind, giving rise to a number of small sand dunes and sand mounds.

In the Ludhiana plain, the elevation ranges from about 268 metres in the east to about 216 metres in the west. The slope of the land is from east to west at the gentle gradient of about 2 feet in a mile.

For a broad understanding of its topography the district can be divided into two parts; (1) the Floodplain of the Satluj, and (2) the Upland plain. A brief description of each part is given below:--

The Floodplain of the Satluj:

The Satluj makes an extensive floodplain along its 96 kilometres course in the North of the district. This covers an area of about 600 square Kilometres, which accounts for about 16 per cent of the total area of the district and is locally known as Bet. Most of this tract is between the Satluj and its tributary, the Budha Nala, and runs parallel to the master stream for almost the whole of the length of the district. The Satluj floodplain does have its extension even south of the Budha

Nala. The floodplain is the low lying area which has swampy condition in parts and possesses somewhat undulating topography. It is the widest in its easternhalf (about 11 kms.) and gradually narrows down towards the west (about 5 kms.). Prior to the construction of the Bhakra Dam over the Satluj (in 1952) and the opening of the network of canals in 1954, the whole of the plain was flooded by the river during the rainy season. The damming of the Satluj had a profound effect on its alleviation and erosive power. The flood plain is now practically free from floods, except for a narrow strip of land along the river, which is locally called as Mand area.

There is an extensive reclamation of cultivable land in the flood plain. Thus, the floodplain area of the Satluj is further divisible into two parts; (1) The Mand area (inundated area in high flood) and (2) the flood free floodplain, which has been reclaimed for agricultural purposes.

The Upland Plain :

The upland plain is locally known as Dhaiya. It accounts for about 84 per cent of the total area of the district. It lies at a general elevation of about 243 metres above main sea level and has a gentle slope from the east to the West. The upland plain is separated from the flood plain by a distinct, though low scarp, which varies in its elevation from 1.5 metres to 6 metres. In its orientation the scarp parallels the Budha Nala. The most distinguishing feature of this upland plain is its characteristic flatness. However, there are number of sand dunes and sand mounds varying in elevation from 1-5 metres to 9.6 metres and in length from a few metres to about 200 metres. Scattered over the area, the sand dunes find a relatively high concentration along the scarp between the floodplain and upland plain in Jagraon Tahsil and near Samrala; Machhiwara, Halwara and Sidhwan. The availability of better irrigation facilities has considerably reduced the occurrence of sand dunes throughout the district.

Rivers and Drains :

The Satluj and its tributary, the Budha Nala, constitute the chief hydrographic features of the district. A brief description of these is as follows:

River Satluj :

It takes its origin from Mansarovar Lake in Tibet (China). After flowing through Himachal Pradesh territory, it debouches from the Shiwaliks just above Rupnagar, some 32 km. east of the boundary of Samrala tahsil. Then it flows due west along the top of the district for some 96 km. and turns, as it leaves Jagraon Tahsil, slightly to the north towards its junction with Beas at Harike. During its journey along the district, it maintains as east-west direction. It has been a devastating river during its flooding fury. The Satluj has experienced a westward drift during recent times. The old towns and villages of Bahlolpur, Machhiwara, Kum etc. were built on its banks. The river had since been dammed at Bhakra, which has considerably checked its flooding menace in the district.

Budha Nala :

Immediately under the high bank along the old course of the Satluj runs a perennial stream called Budha Nala, which takes its rise near Chamkaur Sahib. It runs parallel to Satluj on its south for fairly large section of its course in the district and ultimately joins Satluj at Gorsian Kadar Baksh in the north-western corner of the district. It is a flooding stream during the rainy season but in the dry season it can be crossed on foot at certain points. Ludhiana and Machhiwara are situated to the south of the Budha Nala. The water of the stream becomes polluted after it enters

Ludhiana city, unlike in the past when it used to be quite clear throughout its course in the district.

Major characteristics of the District

Forestry:

The area under regular forests is very small. The process of consolidation of holdings has led to the cutting of large numbers of trees. There was an acute shortage of fuel as a result of which rural population made use of cowdung cakes as fuel. This resulted in waste of cowdung which could be used as manure to augment fertility of the soil. Consequently in 1951, the railway and national highway strips and in 1956 the PWD road strips and canal strips were transferred to forest department for plantation purposes. The break up of area under various type of forest in the district during 2000-01 is as follows:

Serial No.	Type of Forest	2000-01 (in sq. kms.)
1.	Reserved Forests	1
2.	Protected Forests	74
3.	Unclassified Forests	25
4.	State Forests (Total 1 to3)	100
5.	Under S/38 of Indian Forest Act, 1927	-
6.	Total Forest (total 4+5)	100

The table reveals that during the 2000-01 the area under forests is 100 sq. kms. However, during 2000-01, whereas 100 sq. kms are under State forests. The area under forest is amazingly above the far below the norm prescribed for forest cover in the State.

Natural Economic Resources

Mineral and Mining:

The only mineral produce of the district is kankar which is quarried in many places and is to be found in sufficient quantity at many convenient sites that there is no difficulty in obtaining a supply for matalled roads and for lime. Saltpetre (Shora) used to be maid in a few villages, but the manufacture has been stopped under new regulations.

Land and Land use Pattern:

During the year 2000-01, the area of the district as per village papers is 368 thousand hectares. The description given hereinafter is only of area according to village papers. Out of an area of 368 thousand hectares 10 thousand hectares is under forests, which are mainly found along the river banks. An area of 49 thousand hectares (approximately) is put under not-agricultural use, whereas another 5 thousand hectares is fallow land (other than current fallow which is negligible). There are 304 thousand hectares of net area sown in the district, which works out to 83 per cent of the total area. Out of 304 thousand hectares of net area sown, 300 thousand hectares are sown more than once. Thus the total cropped area of the district in 1990-91 works out to 604 thousand hectares, which gives out a crop intensity of 184.92 per cent.

Agriculture:

Agriculture provides the single largest source of employment and livelihood in the district as this employed 20.2 per cent of total workers (main + marginal) according to the 2001 Census.

There are two principal crop seasons Kharif (sawni) and Rabi (hari) in the district. Both the seasons are equally important but area wise Rabi is more important of the two as it reported 310 thousand hectares against 294 thousand hectares reported in Kharif in 2000-01. Out of 604 thousand hectares of cultivated area, the area under food and non-food crops is 531 thousand hectares and 73 thousand hectares, respectively. In terms of percentages the area under food crops is 88.2 per cent against 11.8 per cent under non-food crops. The major and minor crops during Kharif season are; Paddy, Maize, Groundnut, Sugarcane, Cotton, Pulses and Chillies, etc; whereas Wheat, Gram, Barley, Potatoes and Oilseeds are the major and minor crops of the Rabi season. Among the food crops important ones are; Wheat, Rice and Maize, which account for 258 thousand hectares, 239 thousand hectares and 4 thousand hectares of cultivated area, respectively. Sugarcane with an area of 6.6 thousand hectares is another important crop which occupies the fourth largest area in the district in 2000-01. The other important crops sown are; Arhar (2.2 thousand hectares), Moong (3.6 thousand hectares), Barley (3.0 thousand hectares), Potatoes (5.8 thousand hectares), Rapeseed (2.8 thousand hectares) etc.

The average yield of wheat in the district during 2000-01 was 5,169 kg. per hectares, which is the highest in the state for any district and compares favorably with the best areas in the world. The average yield of rice was 3947 kg. per hectare which is the second highest, the highest being in Fategarh Sahib district (4,162 kg. per hectare). The average yield of maize, sugarcane and Barley were, 4,129, 6,678 and 3810 kg. Per hectare, respectively.

The district has an area of 1,174 hectares under various types of fruits and orchards during 2000-01 and ranked 10th in area in the State. Among the fruits Guava has the largest area (373 hectares), followed by Mangoes (215 hectares), Ber (92 hectares), Pears (89 hectares), Lemon (88 hectares) and Kinnow (74 hectares). Some other important fruits grown in the district are; Peach (71 hectares), Grapes (37 hectares), Orange and Malta (10 hectares), Plums (9 hectares), Litchi (1 hectare) and Misc. (115 hectares).

The district had an area of 10,795 hectares under vegetables in 2000-01. Out of which, 5,810 hectares was under potatoes, 155 hectares under onion and remaining 4,830 hectares under other vegetables. In the case of other vegetables the area under winter and summer vegetables was 1,869 and 2,961 hectares respectively. The vegetable requirements of this district including the city of Ludhiana are met from local supplies and supplies from outside the district.

In addition to the use of green and organic manures chemical fertilizers are increasingly being used in the district. The district was the top consumer of chemical fertilizer during 2000-01 as it alone consumed 129 thousand tonnes of chemical fertilizers (NPK). Out of this 97 thousand tonnes was nitrogenous (N), 29 thousand tonnes Phosphatic (P2O5) and 3 thousand tonnes potassic (K2O).

This district had an Agricultural Demonstration farm at Ludhiana as far back as 1927. Now a full fledged Agricultural University is functioning at Ludhiana since 1962 which has greatly popularized the adoption of modern agricultural techniques and farm practices in the district thereby making it a lead district in agriculture in the State.

Irrigation:

There were times when 96.6 per cent of the total irrigated area was served by the wells through Persian wheels, Dhenklies and Charasas. Also canal irrigation could not gain popularity among the cultivators of the district due to the fact that canal water supply was irregular and inadequate. But things have since changed and there is ever increasing hunger of water for irrigation, preferably for sub soil water through tube wells. The government has also succeeded to large extent in meeting the legitimate requirements of the farmers. It was the excellent combined

effort of Agriculture Department with the farmers which made possible the green revolution in this district.

The canal irrigation was started in the district with the opening of Sirhind canal on November 24, 1882. The canal was taken out from Ropar headworks. Originally the Sirhind canal had a capacity of carrying 8,000 cusecs of water (It had a width of 60 metres and depth of 3.45 metres). But its remodeling was completed in 1953-54 as a result of which it carried a discharge of 12,625 cusecs during Kharif and 10,237 cusecs during Rabi (width was increased to 69 metres from 60 metres and depth increased to 4 metres from 3.45 metres). The Sirhind canal has three main branches in the district: (1) Sidhwan Branch, (2) Abohar Branch and (3) Bathinda Branch. Besides, some area is also irrigated from the two distributaries (Samrala distributary and Khanna distributary) of Bhakra Main Line, which takes of from Nangal Dam in Rupnagar district.

In the matter of irrigation facility this district is well placed. In 2000-01, the net area irrigated was 304,200 hectares (canal irrigated 10,200 hectares and tube well and well irrigated 294,000 hectares). The drop in canal irrigated area during the last decade 1991-2001 shows that canal irrigation is still loosing popularity in this district due to fear of water logging. Further the percentage of gross area irrigated the district has shown an increase from 539,200 hectares in 1980-81 to 599,700 hectares and to 604,000 in 2000-01. Likewise the percentage of gross area irrigated to total cropped area has increased from 94.6 per cent to 99.8 per cent in 1990-91 and finally to 100 per cent in the year 2000-01.

The figures in the preceding paragraph show that increase in irrigated area has been possible due to the tapping of sub-soil water for irrigation. Even though, there are some diesel operated tube wells yet the majority of the tube wells are electricity operated because the later are cheaper in respect of operational cost, which has mainly resulted in the increase in area irrigated in the district. This has ushered in green revolution in the district.

Animal Husbandry:

Livestock are the backbone of the peasantry. They not only supply the motive power for various agricultural operations but also provide milk and other by-products and thereby help in augmenting the income of the farmer. Animals, especially cattle, play an important role in the economy of the district. Animal husbandry, therefore, is an integral part of the agriculture in the district.

The data on livestock in Punjab is available for the year 1997. It reveals that there are 270, 800 cattle and 586,100 buffaloes, 900 horse and ponies, 300 donkeys, 2300 mules, 9,800 sheep, 33,100 goats, and 16,300 pigs. Cows and Buffaloes, as else where, are the two most dominant milch animals in the district. The district can boast of a fairly rich cattle wealth. There were 918,800 total animals of various kinds in 1997 as compared to 953,400 in 1990. Thus there is a decrease of 34,600 animals during the period 1990-97 in the district. The decline in the number of cattle is attributable to the mechanization of agriculture and transportation, which make lesser demand of draught cattle. However the ever increasing demand of milk in the urban centers and the State has increased demand of milch buffaloes, which are mainly of good breads (murrah and nili).

The number of pigs show a decline from 22, 600 in 1990 to 16,300 in 1997. A pig breeding unit is located at Ludhiana, which was established on 18th December, 1964. Later six sub units were opened at: (1) Samrala, (2) Machhiwara, (3) Khamanon Kalan, (4) Khera, (5) Sahnewal, and (6) Dhaka. The increase in the number of pig and popularity of pork could be attributed partly to the developmental efforts of the above unit/sub-units and partly to the change in the consumer preference. The number of sheep and goats both have gone down from 109,500 in 1990 to 42,900 in 1997 livestock census.

The number of poultry birds has recorded 2,563,000 (1,717,300 hens and 845,800 chickens) in 1997. This has been possible due to the development of poultry farming in the district. The poultry farming is now been practiced on scientific lines, which is evident from the large number of poultry farms located in the district. This has been made to understand due to acceptability of eggs as vegetarian food.

In 2000-01, 112 veterinary hospitals and 135 veterinary dispensaries were rendering services for the betterment of animal health. In the above institutions 103 veterinary officers and 214 veterinary pharmacists were working. There were 356,293 cases treated in the above institutions during 2000-01. Also 608 animals were castrated.

Fisheries:

Pisciculture has been taken up in a big way in the district. An area of 817 hectares was stocked with fish wherein 118,990 thousand fingerlings were raised. During 2001 fisheries department has accrued income of Rs. 922,000 in the district.

Tenancy:

The farmers generally cultivate their own lands by themselves. This system is called *khud kasht* (self -cultivation). Sometimes the land is leased out to other farmers/ persons for cultivation on *betai* (share cropping) or *theka* (contract) basis. The usual rate of *betai* is half the share of the crops grown. The rate of *theka* may vary from time to time depending upon the quality of land and period of contract. Since large numbers of farmer own tractors they prefer to offer services for various agricultural operations on cash payment basis. This system is becoming popular in recent days. The land holding being small and there being large numbers of migrants from this district to foreign countries from the rural areas, many families prefer such services on cash payment basis only. Under the various land reform enactments the *Jagirdari* system has been abolished. Also the occupancy tenants have been given the ownership right after Independence.

Industry :

In the field of industry, Ludhiana district is renowned for small scale industries not only in Punjab but also throughout India. In fact, Ludhiana City is called "Small Scale Industrial Capital of India" owing to its premier position in hosiery manufacturing, engineering goods, cycles and sewing machine industry. It is also called "Manchester of Punjab" as it has come to occupy top position in industries in the State.

About two centuries back, Raikot and Kila Raipur only counted for few industries. But around 1830 woollen industry made a start at Ludhiana due to the migration of Kashmiri artisans, who manufactured woolen shawls, chadars, namdas etc. The local Muslim artisans manufactured lungis and patkas at Bahlolpur. The Khatris of Machhiwara specialized in the manufacture of Gur and Bura. Jagraon later specialized in cotton ginning and wheat flour milling. Sirkis were also manufactured there. Ivory bangles and Desi Juti were speciality of Ludhiana City. Later Khanna came to occupy an important place in cotton ginning, oil pressing and iron re-rolling mills. The stationing of troops at Ludhiana gave a fillip to the development of industries. Woollen shirting known as 'Ludhiana Shirting' earned a name throughout India. In the beginning of the present century knitting machines were introduced which started manufacture of gloves and socks at Ludhiana. The advent of 1st world war resulted in the development of casting and foundary industry. Gradually handlooms were substituted with power looms, which rejuvenated the hosiery and textile industries, whereas World War II gave an impetus to the development of industries. Partition of the sub-continent gave a rude shock. There was complete migration of Muslim

population, which formed the main labour force and skilled artisans but the vaccum has since been filled by various efforts of the government.

The present day industries are; (1) Cotton ginning and pressing, (2) Oil-Seed crushing, (3) Flour milling, (4) Bakeries, (5) Ice manufacturing, (6) Cold Storage, (7) Leather tanning, (8) Shoe making, (9) Soap manufacturing etc. Besides there are the following manufacturing industries: (1) Hosiery machines, (2) Machine Tools, (3) Motor parts, (4) Oil Engines, (5) Oil expellers, (6) Agricultural Implements, (7) Steel re-rolling machines, (8) Surgical Instruments, (9) Steel Pipes, (10) Cutlery, (11) Belt Fasteners, (12) Electric Fans, (13) Pipes, (14) Band Saws, (15) Screws and (16) Brass Wares, etc.

The industries can be divided into following 3 main categories: (1) Large Scale (2) Small Scale (3) Village and Cottage industries. The large scale industries are: (1) Woollen manufacture (2) Cycle and cycle parts (3) Steel re-rolling (4) Machine Tolls (5) Automobile parts (6) Diesel engine and parts (7) Scooters (8) Hosiery needles (9) Nylon and staple spinning (10) Gas (Oxygen) and (11) Measuring tapes.

The small scale industrial units are: (1) Agricultural Implements (2) Dyeing (3) Washing and finishing (4) Calico Printing (5) Nuts and bolts (6) Electrical goods (7) cotton ginning (8) Plastic goods (9) Paints and varnishes (10) Umbrella ribs (11) Radio assembling (12) Surgical Instruments (13) Rubber goods (14) Stationery articles (15) Spray pumps and (16) Steel furniture etc.

Some of the present day village and cottage industries are: (1) Handloom weaving (2) Leather and Hides tanning (3) Shoes and leather goods manufacture (4) Kohlu (Oil pressing) (5) Baan making and (6) Gur and Khandsari etc.

The following are some large scale industrial units located in the district:-

1. Milk Plant, Ludhiana - Capacity to process 1,25,000 litres of milk.
2. Oswal Vanaspati and Allied Industries - Manufacture Vanaspati.
3. Markfed Vanaspati and Oil Industries, Khanna - Vanaspati.
4. Vardhman Spinning and General Mills, Ludhiana-Cotton ginning
5. Punjab Breweries Ltd., Ludhiana-Beer.
6. Oswal Woollen Mills (Main Unit), Ludhiana-Woollen cloth and yarn.
7. Oswal Spinning and Weaving Mills, Ludhiana-Woolen cloth and yarn.
8. Oswal Woollen Mills (Export Wing), Ludhiana-Hosiery Knitwears.
9. Punjab Wool Comber, Ludhiana-Wool tops.
10. OWM Wool Combers, Ludhiana-Wool tops.
11. Raghbir Cycle Pvt. Ltd., Ludhiana-Tyre, Tubes and Cycles parts.
12. Ralson cycle Pvt. Ltd., Ludhiana-Tyre, Tubes and Cycles parts.
13. R. N. Gupta & Co., Ludhiana-Bright Bars and M.S. Pipes.
14. Mehta Alloy & Steel Works, Ludhiana-Steel Ingots.
15. Upper India Steel Ltd., Ludhiana-Alloy Steel.
16. Punjab Concasts Steel Ltd., Ludhiana-Steel Ingots.
17. R. K. Machine Tools, Ludhiana-Machine Tools.
18. Rita Mechanical Works, Ludhiana-Sewing machine and parts.
19. Gurmukh Singh & Sons, Ludhiana-Auto parts.
20. Highway Cycle Industries, Ludhiana-Single Speed free wheel.
21. Hero Cycle Industries, Ludhiana-Cycle parts.
22. Rockman Cycle Industries, Ludhiana-Cycle parts.
23. Super Cycle Industries, Ludhiana-Cycle parts.
24. Majestic Auto Ltd., Ludhiana-Moped.

25. Avon Cycle Pvt. Ltd., Ludhiana-Cycle and cycle parts.
26. National Tape Co., Ludhiana-Measuring Tapes.
27. Arihant Fabrics, Ludhiana-Synthetic yarn.
28. Bhogal Sons Ltd., Ludhiana-Cycle and cycle parts.
29. Addi Nath Textile Mills, Ludhiana-Worsted Acrylic Yarn.
30. Greatway Pvt. Ltd., Ludhiana-Hosiery and Knitwear
31. Ludhiana Steel Pvt. Ltd., Ludhiana-Steel Ingots.

Trade and Commerce :

Since olden times Machhiwara was the main centre of production for export of gur and bura. The local Muslim labour, however, migrated to Pakistan in 1947 and the curtain fell on this trade in Machhiwara. Khanna and Jagraon were good markets for wheat and cotton which were exported to other parts of the State and the country and even exported to European countries. Later, consequent upon difficulties faced by the farmers, the cotton cultivation declined and groundnut cultivation picked up around Khanna. Samrala town, however, emerged as the biggest marked for groundnut in the district. The local products (commodities) were made use of for the manufacture of vegetable oil and cotton ginning industries in the district, especially around Khanna. Ludhiana specialized in hosiery items and woolen / pashmiina shawls. During the world wars acute shortage was felt for various types of cloth.. Ludhiana specialized in Khaddar and Gabrun (course shirting) which was exported to other places. Thus the district hummed with great economic activity and it emerged as a leading district. After partition the district occupied a distinctive place as a centre of production, trade and commerce. It also occupied important position in banking. The establishment of Ludhiana stock Exchange (LSE) leaves no doubt about its distinctive position in trade and commerce and industry. Some describe Ludhiana as the financial capital of the State.

This district has emerged as a lead district in agriculture. Earlier Ludhiana, Jagraon, Raikot, Mullanpur, Bahadurgarh, Khanna, Samrala and Doraha were considered important markets of this district. As on 31st March, 2001 there were 13 regulated markets with 45 sub-yards.. The regulated markets were at: (1) Jagraon, (2) Khanna, (3) Ludhiana (4) Machhiwara, (5) Mullanpur, (6) Raikot, (7) Samrala, (8) Sahnewal, (9) Malaud, (10) Hathur, (11) Sidwan Bet,(12) Qila Raipur and (13) Doraha.

In these markets the total arrivals of agricultural commodities (food grains and non-food grain), in 2000-01 was 2,838,500 M.tonnes. Out of market arrivals, paddy accounted for 939,000 M.tonnes, Maize 1,700 M.tonnes and Wheat 1,334,000 M.tonnes. All the market arrivals in 2000-01 were purchased by various agencies as follows: Paddy 1314,000 M.tonnes – State Government 106,000 M.tonnes, FCI 420,000 M.tonnes, Markfed 139,000 M.tonnes, Punsup 247,000 M.tonnes, PSWC 156,000 M.tonnes, Traders172, 000 M.tonnes and PAIC 7,400. Wheat 741,000 M.tonnes –State government 47,000 M.tonnes, FCI 204,000 M.tonnes, Markfed 127,000 M.tonnes , Punsup 142,000 M.tonnes, PSWC 98,000 M.tonnes, Traders 57,000 M.tonnes and PAIC 124,000 M.tonnes .

Communications :

A good network of roads, railways, bridges and other means of communications is an essential prerequisite for the development of any area. This equally applies to Ludhiana district. All parts of this district are well connected by an efficient network of roads and railways. However, the main hurdle is posed by river Satluj which serves as a natural barrier in the north.

Ludhiana district falls under the Firozpur Division of Northern Railway. It is connected with important places within the state and outside. The following rail lines pass through this district:-

1. Amritsar-Ludhiana-Ambala Rail Line- This is broad gauge line built in 1870. It is double tracked and 58 km. located in this district. The railway stations on this line situated within this district are; (1) Loudhuwal (2) Ludhiana (3) Dhandari Kalan (4) Sahnewal (5) Doraha (6) Jaspalon (7) Chawapail and (8) Khanna.
2. Ludhiana-Firozpur Rail Line-It is also broad gauge line. The Railway Stations on this line in the district are; (1) Modelgram Ludhiana, (2) Baddowal (3) Bhanhod Punjab (4) Mullanpur (5) Chauki Man (6) Jagraon and (7) Nanaksar.
3. Ludhiana-Dhuri-Jakhal-Hisar Rail Line- It is also a broad gauge line. The stations located on this line in the district are (1) Gill (2) Jassowal (3) Qila Raipur and (4) Gungrana.

The district headquarters has no direct rail link with State Capital i.e. Chandigarh, inspite of long demand by the people. Understandably the survey has already been completed but no concrete result emerged so far. To reach State Capital a long detour has to be made via Ambala, which is both expensive and time consuming.

The district has an efficient network of roads. Out of a total road length of 4,020 km. (maintained by PWD, B&R) in 2000-01, 154 km. is classified as National Highway (National Highway No. 1 passing through the district) and the remaining 3,866 kms. as Provincial Highways. At the time of partition of the country in 1947 there were only 268 km. of road length maintained by PWD B&R. As regards facilities of roads in the district we find that during 2000-01 there were 159 km. of road per 100.00 sq. km. area and 198 km. of roads per lakh of population, and all the villages were linked by roads.

There is a bridge over river Satluj at Phillaur, which connects this district with Doaba region. From Majha tract the district is approachable via Harike Pattan barrage bridge. Also this district is approachable from Kapurthala (Sultanpur Lodhi Side) via Harike barrage bridge. There are five ferry crossings in operations at: Sherpur, Jodhwal, Khanpur, Bhundri and Tihara

The district is well served by public road transport. The Punjab Roadways has two depots, one each at Ludhiana and Jagraon having fleet of 180 buses and 93 buses respectively in 2000-01. The Pepsu Road Transport Corporation is also having a depot at Ludhiana having a fleet of 180 buses. Besides, Municipal Corporation Transport Ludhiana operates number of buses on the local routes. There are many private operators who ply buses on various routes within the district and outside. Their number is increasing year after year due to change in government policy. Some of the important private bus operators are:

1. Dashmesh Bus Service Regd., Raikot.
2. Kartar Bus Service, Regd., Raikot.
3. Binapal Bus Service, Regd., Ludhiana.
4. Deol Transport Co. Regd., Raikot.
5. Guru Teg Bahadur Transport Co. Pvt. Ltd., Ludhiana.
6. Gurdev Tourist Bus Service Regd., Samrala.
7. Jujhar Transport Pvt. Ltd., Ludhiana.
8. Kalgidhar Transport Co. Pvt. Ltd., Ludhiana.
9. Ludhiana Malwa Transport Bus Service Regd., Barundi.
10. Ludhiana Transport Co. Pvt. Ltd., Ludhiana.
11. Manjit Transport Co. Regd., Ludhiana.
12. Nirankar Transport Co. Pvt. Ltd., Ludhiana.
13. Nirbhai Roadways Pvt. Ltd., Ltd., Ludhiana.
14. Nankana Sahib Transport Co. Pvt. Ltd., Ludhiana.

15. Shri Guru Nanak Transport co. Regd., Raikot.
16. Sheikhupura Transport Pvt. Ltd., Ludhiana.
17. Zimidara Transport Co. Pvt. Ltd., Ludhiana.

Medical and Public Health

The Ayurvedic system is being practiced in the district since times immemorial. The unani system was introduced during the Mohammedan rule. The *Vaids* and *Hakims* contributed in treating the patients and winning their confidence. But the indigenous systems suffered due to lack of Government patronage during the British times when allopathic system received all types of facilities and Government patronage. The homoeopathic system of medicine had late introduction and is catching up fast.

The State Government has opened up a chain of hospitals and dispensaries for the amelioration of human sufferings. The district can boast of two medical colleges with attached hospitals (Christian Medical College and Hospital and Dayanand Medical College and Hospital) at Ludhiana. Both the institutions have been vastly expanded and improved in all respects since their inception. In 2000, there were 217 medical institutions in the district. Out of these, 153 were in rural areas and 64 in urban areas respectively. As regards the ownership 190 were owned by the State Government, 11 owned by the local Government, and the remaining 16 were run by the voluntary organizations. Further, out of 217 medical institutions 27 were hospitals (10 rural, 17 urban), 33 PHCs (30 rural, 3 urban), 147 dispensaries (108 rural, 39 urban) and 10 Hospital/CHC, CHC, CHC/PHC (5 rural, 5 urban). In addition to these, there were 36 Ayurvedic, 4 Unani, and 11 Homoeopathic institutions in he district.

Education :

Ludhiana is the most advanced district in the State in the field of education. This may be to a large extent due to fact that after advent of British in this part of region in 1809, Ludhiana formed the head quarter of the Political Agency and the North-West frontier Agency. The Christian missionaries, who established their institutions at the station in the wake of the British occupation, opened an English teaching school at Ludhiana as early as 1834. Their example indirectly created a interest among the local people for the promotion of education. Thus, a good number of schools, both Government and Private, were established in the district from time to time. An intermediate college was established at Ludhiana in 1920. Some of the old colleges working in the district are mentioned below-

1. Government College, Ludhiana (1920)
2. Government College for Women, Ludhiana (1943)
3. Arya College, Ludhiana (1946)
4. A.S. College, Khanna (1946)
5. G.H.G. Khalsa College, Gurusar Sadhar (Ludhiana-1948)
6. Khalsa College for Women, Ludhiana (1958)
7. Khalsa College for Women, Sidhwan Khurd (Ludhiana-1950)
8. Lajpat Rai Memorial College, Jagraon (1959)
9. Shri Saraswati Sanskrit College, Khanna (1907).

Apart from these colleges, there are two medical colleges namely, Christian Medical College (1894), Ludhiana and Dayanand Medical College (1934), Ludhiana. There are one Agriculture University (Punjab Agriculture University, Ludhiana, 1962), two engineering and technology colleges- Guru Nanak Engineering College, Ludhiana and Government Institute of Textile Chemistry and Knitting technology, Ludhiana.

In a nutshell, the district comprises 1 University, 30 colleges, 2 Engineering colleges, 2 Medical colleges, 6 Teachers training institute, 152 Senior Secondary schools, 225 High/ Post Basic school, 208 Middle/ Senior Basic schools, 1046 Primary/ Junior Basic schools in the district.

(v) Census concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that buildings which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses :

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent Houses :

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary Houses :

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room :

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office., etc., and the household also stays in it

then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House :

A 'census house' is a building or part of a building used or recognized as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case, 'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ hotel building was treated as one census house. but if such hostels/hotels have

out-houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel/hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage, etc., only one building number was given for this group and each of the constituents a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Village :

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban Area :

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows :

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) a minimum population of 5,000;

   ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) a density of population of at least 400 per sq. km.(1,000 per sq. mile).

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activities were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths (OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city

but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City :

Towns with population of 100,000 and above are called cities.

Urban Agglomeration :

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases, railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread.

For the purpose of delineation of Urban Agglo-merations during Census of India 2001, following criteria are taken as pre-requisites:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census).

With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted:

i) a city or town with one or more contiguous outgrowths;

ii) two or more adjoining towns with their outgrowths; and

iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household :

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen. There may be one member households, two member households or multi-member households.

Institutional Household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the

definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless Household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in huge pipes, under flyovers and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

List of Scheduled Castes and Scheduled Tribes:

The Government of India by Gazette Notification under Article 314(1) of Indian Constitution has declared some castes, races or tribes or parts of or groups within castes, races or tribes as Scheduled Castes as there is no standard definition of Scheduled Castes. Similarly, Scheduled Tribes mean all such tribes or tribal communities or parts of or groups within such tribes or tribal communities as are declared by the President of India to be treated as Scheduled Tribes under Article 342(1) of the Indian Constitution. There is slight change in the definition of Scheduled Castes in 1991. Before that, Scheduled Castes could belong to Hindu or Sikh religion. But from 1990, in addition to Hindu and Sikh religions, Scheduled Castes may belong to Buddhists religion also. The list of Scheduled Castes and Scheduled Tribes are notified for each State and Union Territory and are valid only within the jurisdiction of that State or Union Territory and not outside. In Punjab State, 37 castes were notified by the State Government as Scheduled Castes at the 1991 Census and there is no change at the 2001 Census. Following 37 castes have been notified as scheduled castes in Punjab;

1. Ad Dharmi
2. Balmiki, Chura, Bhangi
3. Bangali
4. Barar, Burar or Berar
5. Batwal
6. Bauria, Bawaria
7. Bazigar
8. Bhanjra
9. Chamar, Jatia Chamar, Rehgar Raigar, Ramdasi or Ravidasi
10. Chanal
11. Dagi
12. Darain
13. Deha, Dhaya, Dhea
14. Dhanak
15. Dhogri, Dhangri, Siggi
16. Dumna, Mahasha, Doom
17. Gagra
18. Gandhilla, Gandil, Gondola
19. Kabirpanthi, Julaha
20. Khatik
21. Kori, Koli
22. Marija, Marecha
23. Mazhabi
24. Megh
25. Nat
26. Od
27. Pasi
28. Perna
29. Pherera
30. Sanhai
31. Sanhal
32. Sansi, Bhedkut Manesh
33. Sansoi
34. Sapela
35. Sarera
36. Sikligar
37. Sirkiband

Language and Mother Tongue :

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate :

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy Rate :

Literacy rate of the population is defined as the percentage of literates in the age-group seven years and above. For different age-groups the percentage of literates in that age-group gives the literacy rate.

Educational Level :

The highest level of education a person has completed.

Work :

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and / or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers.

Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker :

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

(vi) Non-Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all States.

System of sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from

roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns, which are not provided with such underground sewerage system, it is served by open surface drain, box drain, sylk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil.

There are three prevalent systems of disposal of human wastes, viz.

(i) underground sewerage,

(ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and

(iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the fecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the street sewer does not exist, these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil, which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child-bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR) :

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$CBR = \frac{\text{Number of live births during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Crude death rate (CDR) :

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$CDR = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate :

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR) :

Number of live births in a year to female population in any specified age-group normally expressed per 1,000 women.

$$ASFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR) :

Number of live births in a year to married female population in any specified age-group normally expressed per 1,000 married women.

$$ASMFR = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR) :

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$GFR = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR) :

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$GMFR = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years}} \times 1{,}000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum_{15-19}^{45-49} ASFR}{1{,}000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum_{15-19}^{45-49} ASMFR}{1{,}000}$$

Age-specific mortality rate (ASMR) :

Number of deaths in a particular age and sex group per 1000 population of the same age-group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1 :

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 :

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR) :

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

i) Early neo- natal mortality rate :

$$= \frac{\text{Number of infant deaths of less than 7 days During the year}}{\text{Number of live births during the year}} \times 1{,}000$$

ii) Late neo-natal mortality rate :

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR) :

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR) :

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR) :

$$SBR = \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate (MMR) :

Number of deaths of women in the age-group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 100,000 live births in a given year.

$$MMR = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 100{,}000$$

Eligible couple (Couples per 1,000 population):

Number of currently married females in the age-group 15-44 years per 1000 persons of all ages.

Child woman ratio (0-4) :

1. Number of children in the age-group 0-4 years per 1000 women in the age-group 15-49 years.

Child woman ratio (5-9) :

2. Number of children in the age-group 5-9 years per 1000 women in the age-group 15-49 years.

1) Migration

2) Internal and International Migration

3) Rural - Urban component of migration

Civic status of urban units :

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA/town :

Size-class of UA/Town is based on the population size of the UA/City/Town UAs/Towns with 100,000 and above population are classified as Class I UAs/Towns. These Class I UAs./Towns are now further sub classified into seven sub classes namely M1 to M7 depending on the population size of UACity/Town. These are :

M7 (5,000,000 and above)
M6 (2,000,000 to 4,999,999)
M5 (1,000,000-1,999,999)
M4 (500,000-999,999)
M3 (300,000-499,999)
M2 (200,000-299,999) and
M1 (100,000-199,999)

Towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area :

The Slum Areas (Improvement and Clearance) Act, 1956, which was enacted by the Central Government defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city :

The concept of 'Mega city' is a recent phenom-enon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(vii) 2001- Census Findings - Population and its distribution:

The following table shows distribution of rural and urban population by tahsils in the district:

POPULATION, NUMBER OF VILLAGES AND TOWNS, 2001

Name of Tahsil	Population									Number of Villages		No. of Towns
	Total			Rural			Urban					
	P	M	F	P	M	F	P	M	F	Total	Inhabited	
1	2	3	4	5	6	7	8	9	10	11	12	13
Samrala	206,400	109,338	97,062	170,446	90,362	80,084	35,954	18,976	16,978	200	196	2
Khanna	191,398	102,338	89,060	88,299	47,062	41,237	103,099	55,276	47,823	72	68	1
Payal	200,034	107,088	92,946	166,595	88,851	77,744	33,439	18,237	15,202	111	107	3
Ludhiana (East)	1,647,694	926,972	720,722	231,934	124,613	107,321	1,415,760	802,359	613,401	185	183	2
Ludhiana (West)	275,842	147,111	128,731	261,893	139,788	122,105	13,949	7,323	6,626	133	130	1
Raikot	192,239	101,712	90,527	160,867	85,330	75,537	31,372	16,382	14,990	75	74	2
Jagraon	319,224	168,157	151,067	259,144	136,587	122,557	60,080	31,570	28,510	139	139	1
District Total	**3,032,831**	**1,662,716**	**1,370,115**	**1,339,178**	**712,593**	**626,585**	**1,693,653**	**950,123**	**743,530**	**915**	**897**	**12**

According to 2001 Census, Ludhiana district has 3,032,831 population comprising 1,662,716 males and 1,370,115 females. This makes 12.5 per cent of State's population.

Among the tahsils, Ludhiana with a population of 1,647,694 is the most populous while Khanna with a population of 191,398 is the least populous tahsil in the district. The population of other tahsil is: Jagraon 319,224, Ludhiana (West) 275,842, Samrala 206,400, Payal 200,034 and Raikot 192,239. In other words, tahsil with the highest population is more than eight times from the tahsil having least population. On an average, a tahsil in the district has population of 433,262 compared with 338,319 in the State as a whole.

Out of the total population in the district, 1,339,178 (44.2 per cent) is rural and 1,693,653 (55.8 per cent) urban; the corresponding percentages of rural and urban population in the State are 66.05 and 33.9 respectively.

Out of 915 villages of the district 897 are inhabited. A tahsil on an average has 128 inhabited villages. The number of inhabited villages among tahsils varies between 196 in Samrala tahsil and 68 in Khanna tahsil.

The rural population spreads over 897 inhabited villages and urban population is distributed over 12 towns in the district An inhabited village in the district on an average has a population of 1493 as against 1,311 in the State signifying that the villages in Ludhiana district are larger in size.

Urban population is distributed over 12 towns in the district. Out of which 11 towns are statutory towns where as remaining one is Census town. A town on an average has a population of 141,138 as compared with 52,520 in the State as such. This signifies that the average size of a town in Ludhiana district is significantly higher than that of the State. Among the towns in the district, Ludhiana 1,398,467 is the most populous while Akalgarh (CT) 6603 is the least populous town.

Size Class & Status of a Town:

The methodology of urbanization can be better understood in terms of distribution of urban population among towns of different size classes. It has been the tradition for the Census organization to classify towns according to their population size. A town with a population of 100,000 or more is termed as 'city' in Indian census.

Class	Population size	No. of Towns.
1	2	3
Class – I	100,000 and above (Generally referred to as city)	2
Class – II	50,000 to 99,999	1
Class – III	20,000 to 49,999	1
Class – IV	10,000 to 19,999	5
Class – V	5,000 to 9,999	3
Class – VI	Less than 5,000	-

Out of 12 towns in the district, Ludhiana and Khanna, are Class I town (city). One each falls in the population size class II and III and five towns in class IV, and the remaining three in Class V towns. There is no town under Class-VI. As regards distribution of population by size class of towns, it is observed that more than three-forth (88.7%) urban population in the district is residing in Class I towns and 3.5 per cent in Class II town. The share of Class III town is 1.5 per cent only while class IV towns accommodate 5.1 per cent of the urban population in the district. Further more class V towns contributed only 1.2 per cent of the urban population in the district. There is no town under class VI.

During the decade the number of towns has gone up from 8 in 1991 to 12 in 2001. Among the new towns 3 towns are statutory in nature and remaining one is Census town. Further among these new towns, 2 towns fall in class IV and remaining 2 in class V category.

Population Growth, Density and Sex Ratio

Population Growth:

During 1991-2001, population of Ludhiana district has increased from 2,428,382 to 3,032,831 resulting net addition of 604,449 persons during this decade. In percentage terms the district has decadal growth rate of 24.9 per cent which is the highest growth rate in the state. Among the districts, it ranks 1st, and its growth rate 24.9 is also higher than that of the state average (20.1%).

Density:

Ludhiana district has 3,032,831 population, 3,578 sq. km area and density of 848 persons per sq. km, which is significantly higher than that of the State (484) and ranks 5th among the districts in the State.

Within the district, Ludhiana (2,564) is the most densely populated tahsil and Jagraon (394) the least populated tahsil. Likewise, rural density varies between 485 in Ludhiana East tahsil and 326 in Jagraon tahsil. The urban density is the highest in Ludhiana East (8,613) tahsil and the lowest in Raikot (1,945) tahsil.

Sex Ratio:

Sex ratio is derived as the number of females per 1,000 males. Generally speaking differentials in mortality conditions of males and females, male-female ratio at birth and sex selective migration are the key factors, which determine the sex composition. It reflects the socio-economic and demographic characteristic of the population and unfolds the status of women in the society and care of the girl child in particular.

Significant feature of Punjab's population is the preponderance of males over females. According to 2001 Census, out of total population 24,358,999 in the State comprising 12,985,045 males and 11,373,954 females resulting in an overall sex ratio of (876) which is significantly lower than the country as a whole (933).

There has been a phenomenal decline in the child sex ratio in Punjab during 2001, from 875 in 1991 to 798 in 2001 exhibiting a decrease of 77 points in child sex ratio. All the districts in the state have reported substantial decrease which varies between 47 points in Muktsar and 108 points in Fatehgarh Sahib districts. The Child sex ratio is reported to be the highest in Firozpur district (822) and the lowest in Fatehgarh Sahib (766). This exhibits that the child sex ratio is quite poor in all the districts in the state. There are 8 districts which exhibit a child sex ratio of over 800. Besides Firozpur, they include Moga (818), Ludhiana (817); Hoshiarpur and Faridkot (812 each), Muktsar (811), Nawanshahr (808) and Jalandhar (806).

The sex ratio in the State and its constituent districts has remained low throughout. At the beginning of the 20th century, the sex ratio was 832 in 1901 which declined to 780 in 1911. Ever since, the sex ratio in the state showed gradual improvement till 1991 when it reached 882. However, it has again declined to 876 in 2001, exhibiting a fall of 6 points in the State.

Ever since 1911 the sex ratio in the district has gradually improved from 765 in 1911 to 856 in 1961. Last four decades exhibited an up and down in the sex ratio and ultimately reached to 824

points in 2001. Within the State the districts among themselves show considerable disparity which is the highest in Hoshiarpur District (935) and the lowest in Ludhiana (824).

Among the tahsils in the district the sex ratio is the highest in Jagraon (898) and the lowest in Ludhiana (East) (778). The rural sex ratio varies between 897 in Jagraon and 861 in Ludhiana (East) tahsil. The urban sex ratio fluctuates between 915 in Raikot and 764 in Ludhiana (East) tahsil. The towns among themselves exhibit significant disparity in this regard.

The sex ratio in the age group 0-6 in the State and its constituent districts is quite low and it has become a matter of deep concern. Punjab has a child sex ratio 798; it is almost identical in its rural (799) and urban (796) areas. In Ludhiana district, the child sex ratio (817) is higher than that of the State. Within the district, the tahsils among themselves display a considerable disparity in their child sex ratio; which is the maximum in Ludhiana (East) (841) and the minimum in Samrala (777).

Likewise, the disparity in the rural and urban child sex ratio among the tahsils is also quite marked; the rural child sex ratio varies between 838 in Ludhiana (west) and 771 in Samrala, while the variation in urban child sex ratio is to the extent of 910 in Ludhiana (west) and 789 in Payal tahsils.

Literacy:

Any person who is able to read and write with understanding in any language is recorded as literate. As in 1991 all the children below 7 years of age have been treated as illiterates.

69.7 per cent of the state's population is literate which is higher than that of the country as such 64.8 per cent. Among the States /Union Territories, Punjab ranks 16th in terms of literacy.

76.5 per cent population of Ludhiana district is recorded as literate, which is significantly higher than the State as such. It ranks among the top five districts whose literacy rates are more than 76.0 per cent. Among the tahsils in the district, Ludhiana East (78.8%) ranks at the top while Jagraon (71.1%) is placed at the bottom. However, all the tahsils in the district surpass the overall literacy rate in the state average.

Between the two sexes, the gap in the literacy rate among males and females in the district is more significant as compared to that of the State. In Ludhiana district 80.3 per cent males and 72.0 per cent females are literate, while the corresponding figures for the State are 75.2 and 63.4 per cent respectively.

Likewise, the rural-urban literacy rates also exhibit significant disparity. In the district 72.6 per cent of the rural population and 79.5 per cent urban population is literate.

Work Participation Rate:

Definition of Work and Classification of Workers:

How the 'work' is defined by the Census needs to be understood properly. Work is defined as the participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only the actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. The scope of definition of work was expanded at the Census of India 2001, which includes production of milk even for domestic consumption. In the 1991 Census cultivation of certain crops even for one's self-consumption was treated as an economic activity. The scope of the term cultivation was expanded in this census to include certain other crops such as tomatoes, all types of flowers, fruits and tuber

potatoes, chilies and turmeric, viper, cardamoms, vegetables etc. On the other hand plantation of tea, coffee, rubber, coconut and betel nuts have been classified under plantation and not included in cultivation.

The reference period for recording the economic activity of any person is preceding one year from the date of enumeration. All those persons who had worked for six months or more during the last year are recorded as main workers while those who had worked for less then six months during the last one year are treated as marginal workers. A person who had not worked at all during the last one year falls in the category of non- worker. Workers have been further classified into four categories viz. Cultivators, Agricultural labourers, Household Industries and other workers.

Punjab, with a work participation rate of 37.5 per cent, ranks 24th among the States/Union Territories in the Country and thus, the work participation rate in the State is lower than that of India (39.1%). Among the districts in the State, the proportion of workers varies between 44.9 per cent in Nawanshahr and 33.3 per cent in Gurdaspur district. In all, 10 out of 17 districts in the State have shown work participation above the state average and among them five districts have at least two-fifths of their populations reported as worker. Besides Nawanshahr, they include Bathinda (42.3%), Ludhiana (40.9%), Sangrur (40.7%) and Moga (40.1%).

Main Workers and Marginal Workers:

85.8 per cent of Punjab's total workers have been recorded as Main Workers and 14.2 per cent as Marginal Workers. The corresponding figures for 1991 Census were 97.4 per cent and 2.6 per cent respectively. In Ludhiana district Main Workers and Marginal Workers constitute 85.5 and 14.5 per cent to the total population respectively.

The work participation rate in Ludhiana district (37.9%) is a little better than the state average (37.5%). Among the tahsils in the district, it varies between 42.9 per cent in Payal and 36.8 per cent in Ludhiana (East). In the district 55.6 per cent among males and 16.5 per cent females are reported as workers showing a significant reduction in the gap between the two. In Payal nearly one-third of the females (29.3%) are recorded as workers.

The proportion of main workers is the highest in Samrala (36.3%) and the lowest in Jagraon tahsil (31.5%). However, the proportion of marginal workers is the highest in Payal tahsil (6.7%), and the lowest in Ludhiana-East (2.3%). Further, the incidence of marginal workers is observed to be more among females as compared with males. The proportion of marginal workers in the district among females (3.9%) is slightly more than that of males (3.3%). By and large, a similar pattern is observed among all the tahsils in the district. In Payal, 8.3 per cent of females are marginal workers as against 5.2 per cent among male counterparts.

Religion :

It has been customary for the Indian Census to provide information on religious persuasions of its people. Religion is one of the basic cultural characteristics of population and several religions have thrived in the secular state of India. Apparently, information on various religious communities in the country has been of great interest and useful to the Anthropologists, Sociologists, Demographers, Administrators, Planners and the public at large. Question 7 of the household schedule canvassed at the 2001 Census pertained to religion. The instructions to enumerators were to record the religion faithfully of each member of the household as returned by the respondent in reply to this question.

The six main religions in the country were recorded by using following codes in 2001:-

Hindu	-	1	Sikh	-	4
Muslim	-	2	Buddhist	-	5
Christian	-	3	Jains	-	6

For all others, actual religion as stated was recorded fully. Further more, if any individual stated that he had no religion, the answer was recorded accordingly.

In Ludhiana district there are 57.5 per cent Sikhs, 39.7 per cent Hindus, 1.7 per cent Muslims, 0.4 per cent Christians, Buddhists 0.1 per cent and Jains 0.5 per cent.

The instructions for recording this information are by and large the same as in 1991. A brief analysis based on 2001 Census data is given in annexure V.

Mother Tongue :

Question 10 of the Household Schedule canvassed at the 2001 Census pertained to 'Mother Tongue'. It is the language spoken in the childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother-tongue. In the case of infants and deaf mutes the language usually spoken by the mother should be recorded. In case of doubt, the language mainly spoken in the household may be recorded. Since the household may consist of persons related by blood or of unrelated persons or a mix of both, every person in the household is asked about her/his mother tongue because the mother tongue of each member of a household need not necessarily be the same. It may be different for different members in the household. The definition of 'Mother Tongue' is the same as in 1991.

Question 11 of the Household Schedule was aimed to collect information on 'Other Languages known' (up to two languages in order of proficiency) other than Mother Tongue.

In order to provide a broad scenario a brief note along with table based on 1991-2001 Census data is given in Annexure VIII.

Scheduled Castes and Scheduled Tribes :

Out of the total population of 24,358,999 in the State 7,028,723 belong to Scheduled Castes as per 2001 Census. As such 28.9 per cent of the state's population and 25.0 per cent population in the district belong to Scheduled Castes. Among the district, two- fifth (40.5%) of the total population in Nawanshahr belongs to Scheduled Castes and it is the highest among the districts in the state. Firozpur district with a proportion of 22.8 per cent is placed at bottom. Besides Firozpur, Amritsar (28.8%), Sangrur (27.6%), Ludhiana (25.0%), Gurdaspur (24.7%), Rupnagar (23.9%) and Patiala (23.1%) are the districts which have proportion of Scheduled Castes population lower than that of the state while the remaining ten districts exhibit this percentage higher than that of state average.

Out of the total population of 3,032,831 in the district 757,962 belong to Scheduled Castes and this makes (25.0%) of the district's population belong to Scheduled Castes. Among the tahsils it is the highest in Ludhiana-West (38.3%) and lowest in Ludhiana-East (16.5 %) tahsil.

In consonance with the general trends in the state, Scheduled Castes are more rural by residence. In the district 36.6 percent of population in rural area belongs to Scheduled Castes while the corresponding percentage in urban areas is 15.8 per cent. In Khanna tahsil Scheduled Castes comprise more than one-third (43.9%) of rural population and this percentage is the highest among all the tahsils in the district. On the other hand it is the lowest in Samarala (32.1%).

During the 1991-2001 Scheduled Castes population in the state has increased by 28.8 per cent which is lower than that of Ludhiana district (37.8%). In the district 65.1 per cent of the Scheduled Castes population is literate which is significantly higher than that of the state 56.2 per cent. 64.8 per cent in rural areas and 65.6 per cent in urban areas in Ludhiana district are literate.

There is no Scheduled Tribes population in the State.

(viii) Brief Analysis Based on Primary Census Abstract.

TABLE 1 : DECADAL CHANGE IN POPULATION OF TAHSILS BY RESIDENCE, 1991-2001

Serial number	Name of Tahsil	Population						Percentage decadal variation 1991-2001			Number of Villages	
		1991			2001							
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban	1991	2001
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Samrala	181,086	152,611	28,475	206,400	170,446	35,954	14.0	11.7	26.3	15.7	17.4

7	Jagraon	276,367	228,995	47,372	319,224	259,144	60,080	15.5	13.2	26.8	17.1	18.8
	District Total	**2,428,382**	**1,185,601**	**1,242,781**	**3,032,831**	**1,339,178**	**1,693,653**	**24.9**	**13.0**	**36.3**	**51.2**	**55.8**

Ludhiana district has recorded a growth rate of 24.9 per cent during 1991-2001 as against 20.1 per cent for the state. The decadal growth rate in Ludhiana (E) tahsil (32.4%) is the highest and that in Payal tahsil (12.6%) is the lowest. Besides Payal, the decadal growth rates of remaining five tahsils are also below the district average.

The urban population in the district grew by 36.3 per cent which is more than almost three times that of the rural (13.0 %). Payal tahsil has recorded a very high urban growth rate of 116.6 per cent, while a minimum growth rate was witnessed in Raikot (17.8%). Rural growth rate varies between 23.8 per cent in Ludhiana (W) and 1.5 per cent in Khanna, closely followed by Payal (2.7%).

In 2001 census, the urban population were recorded 55.8 per cent as against 51.2 per cent in 1991 in the district. The level of urbanization in the district is much higher than that of the state average (33.9%). Percentage of urban population (85.9%) is the highest in Ludhiana (E) whereas it is minimum (5.1%) in Ludhiana (W) as per 2001 Census

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION, 2001

Serial number	District/ C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200		Number and percentage of villages

Districts (Rural) Total:		**294,806**	**260,618**	**23 (2.6)**	**75,891**	**64,731**	**3 (0.3)**	**20,117**	**17,065**

* village Behlolpur (00771200) falls in Phillaur (P) CD block of Jalandhar district.
** village Khaira (00837400) falls in chamkaur Sahib (P) of CD block of Rupnagar district.
wherever blockwise data have been shown in inset tables the analysis of these blocks has not been done as each block contain one village only.

Out of 915 villages in the district, 18 villages are uninhabited, 4 each in Samrala, Khanna and Payal; 3 villages in Ludhiana (W), 2 villages Ludhiana (E) and 1 village in Raikot tahsil. An inhabited village on an average has a population of 1493 in the district. The corresponding size of an inhabited village in the State as a whole is 1,311. The inhabited villages which number 897 are distributed over 11 CD blocks in the district, on an average a CD block has 124 inhabited villages and population of 101,599, whereas total villages of the state are distributed over 138 CD blocks. In the state a CD block has 89 inhabited villages and population of 116,641. Evidently, the inhabited villages in Ludhiana district are much smaller in population size as compared to the State. Among 897 inhabited villages, 57(6.4%) villages have a population of less than 200,

133(14.8%) fall in the population size Class of 200 - 499, 214(23.9%) in the category of 500 - 999, 274(30.5%) in the range of 1,000 - 1,999, 193(21.5%) with population varying between 2,000 - 4,999, 23(2.6%) are having population between 5,000 - 9,999 and only 3(0.3%) villages in the district crosses the population of 10,000 and above. In other words 404 villages are of small population size with a population of less than 1,000 and they contain 15.9 per cent of the rural population of the district, 467 are of medium size having population 1,000 - 4,999 and they contain 70.8 per cent of rural population of the district, 26 villages are of large size having population 5,000 and above and they contain 13.3 per cent of the rural population of the district.

TABLE 3 : NEW TOWNS, DE-NOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001

Serial number	Name of town	Urban status of town
1	2	3
(a) New Towns		
(i) Statuary town		
1	Machhiwara	NP
2	Maloud	NP
3	Sahnewal	NP
(ii) Census town		
1	Akalgarh	CT
(b) Denotified		
(i) Statutory town of 1991 Census denotified which did not satisfy the criteria to be treated as towns		
	Nil	
(ii) Statutory towns of 1991 census denotified but identified as census towns based on demographic and economic criteria		
	Nil	
(iii) Census towns of 1991 census are notified as statutory town in 2001 census		
	Nil	
(C) Declassified*		
	Nil	
(d) Wholly merged with other town (s)		
(i)	Naya Nangal wholly merged in Nangal MCI	NAC

Declassified means the census towns of 1991 census which failed to satisfy the demographic and economic criteria

Table 3 revealed that the new towns added, denotified, declassified and merged in the district in 2001 Census. There are 12 towns in the district and out of them 11 are statutory in status and only one is a census town. Machhiwara (NP), Maloud (NP) and Sahnewal (NP) are newly added towns and have statutory status and Akalgarh is a Census town added to the district in 2001 Census.

Further, no town of 1991 Census has been denotified /declassified or merged in 2001 Census.

TABLE 4: DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	6	0.7	150	0.0
11-20	1	0.1	16	0.0
21-50	11	1.2	540	0.0
51-100	21	2.3	4,041	0.3
101-200	97	10.8	48,618	3.6
201-300	148	16.5	156,834	11.7
301-500	391	43.6	701,182	52.4
501 +	222	24.7	427,797	31.9
Not known	0	0.0	0	0.0
District Total:	**897**	**100.0**	**1,339,178**	**100.0**
Population Density (Rural) of the district:		**391.3**		

Table 4 shows distribution of villages according to density of population per Sq. km. Ludhiana district has a rural population density of 391.3 persons per Sq. km. The villages however, display a significant variation among themselves. Low density of 100 or below is noticed in 39 villages (4.3%) and they contain barely 0.3 per cent of district's rural population. Another 97 villages which make 10.8 per cent of the total villages and 3.6 per cent of the total population too are marked with a low density of population in the range of 101-200.Yet another148 villages which make 16.5 per cent of the total villages and 11.7 per cent of the total population are marked with a moderately low density of population in the range of 201-300.

The maximum number of villages (391) falls in the average density range of 301-500. This reveals that almost one-fourth (24.7%) of the villages have a high density in the range of 301-500 and they accommodate more than a half (52.4%) of the rural population of the district.

However, very high density of 501+ is the characteristics of 222 (24.7%) villages and they accommodate one third (31.9%) of the rural population of the district.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	832	837	798	829	824	863
1911	780	785	740	765	765	770
1921	799	808	735	784	790	749
1931	815	832	721	791	814	682
1941	836	855	750	832	852	753
1951	844	854	807	852	854	846
1961	854	865	817	856	862	843
1971	865	868	856	848	862	823
1981	879	884	865	860	881	832
1991	882	888	868	844	880	812
2001	876	890	849	824	879	783

Note: Sex ratio has been defined as number of females per 1000 males.

Table 5 shows sex ratios of state and the district since 1901. Sex Ratio reflects the socio-economic and demographic characteristics of population. It unfolds the status of women in society and the care for the girl child in particular. Unfortunately, in consonance with the overall patterns of the State, the sex ratio in the district has declined by 20 points from 844 in 1991 to 824 in 2001. The sex ratio declined from 832 in 1901 to 780 in 1911 in the state. Ever since

1911, the sex ratio showed a gradual improvement, uninterruptedly, till 1991 when it reached 882. During 1991-2001, the sex ratio has declined by 6 points, from 882 to 876.

Ludhiana district had a sex ratio of 829 in 1901 which decreased to 765 in 1911 and ever since 1911 the sex ratio exhibited a gradual rise till 1961. Then it shrunk to 848 in 1971 and again augmented to 860 in 1981. Finally the sex ratio started to fall during the last two decades. But the rural counterpart of the district exhibited a gradual rise in the sex ratio during the period of 1911 – 1981. Actually this sinister sex ratio is the outcome of the sharp decline in the urban sex ratio during the decades.

TABLE 6 : SEX RATIO BY TAHSILS, 2001

Serial number	Name of Tahsil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Samrala	888	886	895
2	Khanna	870	876	865
3	Payal	868	875	834
4	Ludhiana (East)	778	861	764
5	Ludhiana (West)	875	874	905
6	Raikot	890	885	915
7	Jagraon	898	897	903
	District Total:	**824**	**879**	**783**

Sex ratio by tahsils is shown in table 6. The sex ratio is appreciably higher than the district average (824) in all of the tahsils except Ludhiana (East) with a sex ratio 778 only. Similar pattern is observed in tahsil wise urban sex ratio in the district. However, the tahsil wise rural sex ratios are varying around the district's rural sex ratio (879). In Jagraon (897), Samrala (886) and Raikot (885) the rural sex ratios are better than that of the district's average. On the other hand remaining 4 tahsils namely Ludhiana-East (861), Ludhiana-West (874), Payal (875) and Khanna (876) are exhibiting a lower rural sex ratio than that of the district.

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	2	3
1	Ludhiana-II	869
2	Sidhwan Bet	902

13	**Chamkaur Sahib (P)	900
	District (Rural) Total:	**879**

illage Behlolpur (00771200) falls in Phillaur (P) CD block of Jalandhar district.

** village Khaira (00837400) falls in chamkaur Sahib (P) of CD block of Rupnagar district.

wherever blockwise data have been shown in inset tables the analysis of these blocks has not been done as each block contain one village only.

Table 7 exhibits C.D. block wise sex ratio in the district. Among the CD blocks rural sex ratio varies between 926 in Phillaur (P) and 854 in Ludhiana-I. In all, six CD blocks [including Phillaur (P) & Chamkaur Sahib (P)] shows rural sex ratio above and five below the rural sex ratio

of the district. Remaining two namely, Dehlon and Khanna show the rural sex ratio at par with the district's rural sex ratio (879).

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	18	2.0	18,675	1.4
700-749	15	1.7	14,378	1.1
750-799	37	4.1	36,555	2.7
800-849	137	15.3	194,130	14.5
850-899	329	36.7	593,805	44.3
900-949	253	28.2	389,947	29.1
950-999	76	8.5	81,386	6.1
1000-1099	26	2.9	9,468	0.7
1100+	6	0.7	834	0.1
District Total:	**897**	**100.0**	**1,339,178**	**100.0**
Sex ratio (Rural) for District:		**879**		

Sex ratio of rural population by ranges is portrayed in Table 8. The district is marked with a low rural sex ratio (879). This is very low (less than 800) in 70 villages only. These villages with low sex ratio comprise 7.8 per cent of the total villages in the district and contain 5.2 per cent of district rural population. 137 villages (15.3 per cent) are marked with a rural sex ratio of 800-849 and they contain 14.5 per cent of the district rural population.

The maximum number of 329 villages exhibits a rural sex ratio in the range of 850-899. These make 36.7 per cent of the total villages and have 44.3 per cent of the rural population of the district.

The high sex ratio in the range of 900-949 is noted in 253 villages and they constitute 28.2 per cent of the villages and account for 29.1 per cent of the rural population of the district.

Female-Male ratio is quite close to parity in the range of 1000-1099 as 26(2.9%) villages are having 0.7 per cent of rural population of the district. Furthermore, only 6 villages are highly female biased. This is a welcome sign for the State as well as for the district.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A./ Town+*	Urban status of town	Sex ratio

Sex ratio (Urban) for the district:			**783**

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Sex ratio of urban agglomerations/towns is exhibited in Table.9. The district has an urban sex ratio of 783 which is much lower than the urban sex ratio of the State (849).

Among the UAs / towns, the sex ratio varies between 919 in Akalgarh and 763 in Ludhiana. In all, as many as 11 towns have sex ratio higher than that of the district. Besides Akalgarh, sex ratio crosses 900 marks in Raikot, Mullanpur Dakha and Jagraon.

The sex ratio of child population in the age-group 0-6 is shown in Table 10. The State and its constituent districts are marked with a very low child sex ratio and this has become a matter of deep concern. Punjab has a child sex ratio of (798) as compared to India (927). Ludhiana district has a higher child sex ratio (817) holding a position among the top six districts in the state.

Within the district, child sex ratio is the maximum in Ludhiana-west (841) and the minimum in Samrala (777).

Likewise, the rural child sex ratio varies between Ludhiana-west (838) and Samrala (771), while the variation in urban child sex ratio is between 910 in Ludhiana (west) and 789 in Payal. Surprisingly, the urban child sex ratio outdoes the rural sex ratio in four tahsils namely, Samrala, Khanna, Ludhiana and Raikot, which is a very rare phenomenon.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group

*. village Behlolpur (00771200) falls in Phillaur (P) CD block of Jalandhar district.
** village Khaira (00837400) falls in chamkaur Sahib (P) of CD block of Rupnagar district.
wherever blockwise data have been shown in inset tables the analysis of these blocks has not been done as each block contain one village only.

Table 11 shows CD Block wise sex ratio of population in the age-group 0-6 termed as child sex ratio.

The gap of 64 points in rural child sex ratio (815) and the over all rural sex ratio (879) in the district is alarming. Moreover, six CD blocks viz. Sudhar (813), Pakhowal (796), Doraha (800), Machhiwara (772), Samrala (768) and Khanna (785) are marked with a child sex ratio even lower than the district average (815).

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

District (Rural) Total	**897**	**100.0**	**165,705**	**100.0**
Sex ratio (Rural) for District:		**815**		

Table 12 shows sex ratio of rural population in the age group 0-6 by ranges. It is very low (815) in the district. As many as 193 (21.5%) villages are marked with an excessively low child sex ratio of less than 700. Together these villages constitute 14.1 per cent of the child population in the age group 0-6 in rural areas of the district. The sex ratio is equally low in the range of 700-

749 in 94 (10.5%) villages constituting 10.3 per cent of the district's child population. Another 120 (13.4%) villages fall in the range of 750-799 and they contain one-sixth (16.7 %) of the rural child population of the district.

490 villages (out of 897) which make a little more than half (54.7%) of the villages and contain 59.0 per cent of rural child population have crossed 800 and above mark. Among, them 142 (15.8%) fall in the range of 800-849+ and cover 21.1 per cent of district rural child population. Another 104 (11.6%) villages having 15.2 per cent of child population are in the range of 850-899. The rural child sex ratio is fairly high in the range of 900-949 in 79 (8.8%) villages containing 9.6 per cent of the child population, and another 49 (5.5%) villages having 6.3 per cent of the population display a very high sex ratio of 950-999.

As many as 116 villages in the district are female child biased and all of them fall in the range of 1000 + and make 13.0 per cent of the total villages and share 6.8 per cent of the rural child population of the district.

\+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Table 13 shows sex ratio of child population in the age group 0-6 of urban agglomerations/towns in 2001. The urban child sex ratio in the district (819) is significantly higher than the overall urban sex ratio (783) exhibiting a gap of 36 points. However it is lower by 30 points than the urban sex ratio of the state (849) as a whole.

Among the UAs/ towns in the district, Child sex ratio is the highest in Mullanpur Dakha (910) and the lowest in Payal (731). Further more it is deplorably low in two more towns Samrala (742) and Doraha (789). Child sex ratio crosses district's average (819) in five towns namely Mullanpur Dakha (910), Malo (859), Machhiwara (852), Jagraon (835) and Raikot (831). Sex ratio in Ludhiana (819) is at par with the district average.

TABLE 14 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN TAHSILS, 2001

		Urban	**1,693,653**	**267,460**	-	**15.8**	-

Table 14 shows the number and percentage of Scheduled Castes and Scheduled Tribes by tahsils. As already stated there is no Scheduled Tribes population in the State and its constituent districts.

In the district 25.0 per cent of the population belongs to Scheduled Castes as compared to 28.9 per cent in the State. The proportions of Scheduled Castes among tahsils in descending order are: Ludhiana-West (38.3%), Raikot (36.1%), Payal (35.5%), Jagraon (34.7%), Khanna (33.4%), Samrala (31.6%) and Ludhiana-East (16.5%).

In rural areas, 36.6 per cent of population belongs to Scheduled Castes in the district while corresponding percentage in urban is 15.8 per cent. In Khanna, Scheduled Castes comprise 43.9 per cent of rural population and this percentage is the highest among all the tahsils in the district. On the other hand it is lowest in the tahsil Samrala (32.1%). The proportion of Scheduled Castes population residing in urban varies between 13.2 per cent in Ludhiana (East) tahsil and 39.6 per cent in Raikot tahsil.

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

District Total	**897**	**100.0**	**490,502**	**100.0**

Table 16 presents proportion of Scheduled Castes population in villages by ranges. Surprisingly, 37 (4.1%) villages in the district do not have any Scheduled Castes population and in another 28 (3.1%) villages, Scheduled Castes comprise merely 0.1 per cent of the total population in the range of less than 5 per cent. Yet another 28 (3.1%) villages have Scheduled

Castes population in the range of 5-10 per cent and they contain 0.2 per cent of the Scheduled Castes population of the district.

There are 68 villages (7.6%) which accommodate 2.5 per cent of the Scheduled Castes population of the district fall in the range of 11-20 per cent. 161 (17.9%) villages have Scheduled Castes population in the range of 21-30 per cent and they contain 16.8 per cent of the district's rural Scheduled Castes population.

241 (26.9%) villages are having 34.1 per cent of the districts rural Scheduled Castes population exhibit a relatively high proportion of Scheduled Castes population in the range of 31-40 per cent and another 178 villages which comprise 19.8 per cent of the total villages and 27.1 per cent of rural Scheduled Castes population of the district fall in the range of 41-50 per cent.

Scheduled Castes comprise more than one-half of the total population in 156 villages. These villages constitute 17.4 per cent of the total villages and 19.2 per cent of rural Scheduled Castes population of the district. Further, within this group, 125 villages fall in the range of 51-75 per cent comprising 13.9 per cent of the total villages and 16.1 per cent of rural Scheduled Castes population of the district, while the proportion of Scheduled Castes in 31 (3.5%) villages in the range of 76 per cent and above counts for 3.1 per cent of rural Scheduled Castes population.

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

UAs /Town wise number and percentage of Scheduled Castes and Scheduled Tribes population are shown under table 18.

In urban, Scheduled Castes comprise only 15.8 per cent of the total urban population of the district as shown in Table 18. It is much lower as compared to state (20.7%). The towns among themselves show a wide disparity in this regard. In Raikot 39.7 per cent of the population belongs to Scheduled Castes, while in Ludhiana (M.Corp.) this percentage is barely 13.1 per cent. Scheduled Castes populations in all 11 towns, except Ludhiana, exceed the district average (15.8%).

Towns arranged in alphabetical order.
In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

In urban areas, the sex ratio of Scheduled Castes population in the district is recorded 853 which is much better than the overall urban sex ratio of the district (783). All the towns are exhibiting the same trend. The situation is also quite encouraging in towns viz. Akalgarh (935), Raikot (922), Jagraon (916) and Sahnewal (905) where the sex ratios among the Scheduled Castes surpass 900 marks.

		Urban	**1,183,895**	**686,705**	**497,190**	**509,758**	**263,418**	**246,340**	**79.5**	**82.0**	**76.4**	**5.7**

Table No. 21 shows that 76.5 per cent of the district's population is literate compared with 69.7 per cent in the state as such. In other words, more than three-fourth of the total population in the district are literate.

Of the seven tahsils in the district, Ludhiana-East (78.8%) is the most literate tahsil. By contrast, Jagraon with 71.1 per cent of its population as literate is placed at the bottom.

Between the two sexes, the literacy rate in the district varies between 80.3 per cent among males and 72.0 per cent among females, exhibit a gap of 8.3 percentage points. The male-female difference is the widest (11.4 percentage points) in Samrala tahsil (males 78.7 per cent and

females 67.3 per cent) and the narrowest (6.2 percentage points) in Ludhiana-East tahsil (males 81.5 per cent and females 75.3 per cent).

Likewise, the rural-urban literacy rates in the district exhibit significant disparity; 72.6 per cent of the rural population and 79.5 per cent of the urban population is literate. The urban literacy is higher than the rural in all the tahsils except Ludhiana-West where exceptionally rural literacy rate (75.8%) is higher than that of the urban literacy rate (75.0%). The gap in rural- urban literacy rate is the widest (8.1 percentage points) in Khanna (urban-80.2% and rural-72.1%) and the narrowest (0.8 percentage point) in Ludhiana-West (rural-75.8% and urban 75.0%). Amazingly the district exceeds the state average in rural-urban, male-female literacy rates as well as in total.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

* village Behlolpur (00771200) falls in Phillaur (P) CD block of Jalandhar district.

** village Khaira (00837400) falls in chamkaur Sahib (P) of CD block of Rupnagar district.

wherever blockwise data have been shown in inset tables the analysis of these blocks has not been done as each block contain one village only.

CD block wise literacy rate is shown in Table 22. The district itself exceeds the state (64.7%) by 7.9 percentage points. Rural areas of the district are marked with a relatively low literacy rate as compared to its urban counterpart. A little more than 7 out of 10 rural persons (72.6%) in the district are literate as compare to 79.5 per cent (almost 8 persons out of 10) in urban areas. Among the CD blocks, the rural literacy rate varies between 77.6 per cent in Ludhiana-I and 68.9 per cent in Ludhiana-II. Besides Ludhiana-I, Pakhowal (76.2%), Samrala (74.0%), Dehlon (73.5%), Sudhar (73.4%) and Doraha (73.3%) CD blocks have a literacy rate higher than the district's average. There is 11.1 percentage points gap in male- female literacy rate in the district whereas in CD blocks, this gap is the maximum in Chamkaur Sahib (P) (14.1 percentage points) and the minimum each in Jagraon, Sudhar and Doraha (10.0 percentage points).

TABLE 23 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE, 2001

Range of literacy rate for villages	Number of inhabited villages	Percentage distribution of villages	Population	Percentage distribution of population
1	2	3	4	5
0	0	0.0	0	0.0
1-10	0	0.0	0	0.0

100	2	0.2	16	0.0
District Total:	**897**	**100.0**	**1,339,178**	**100.0**
Literacy rate for District Rural :		**76.5**		

Table 23 shows distribution of villages by ranges of literacy rate. Very low literacy rate (30% or below) is reported in only 4 villages and they have a very small (0.1%) population. It is equally low in 8 (0.9%) villages in the range of 31-40 per cent and contain 0.4 per cent of the districts rural population. Another 23 (2.6%) villages in the range of 41-50 per cent contain 1.1 per cent of the districts rural population. Yet another 55(6.1%) villages in the range of 51-60 per cent contain 3.4 per cent of rural population of the district. Again, 231 villages those are making one-fourth (25.8%) of the total villages and comprising 26.2 per cent of rural population of the district, fall in the range of 61-70 per cent.

The maximum number of villages 495 which comprise more than half (55.2%) of the total villages and 60.5 per cent of the rural population of the district are placed in the literacy range of 71-80 per cent..

Further more, 81 (9.0%) villages containing 8.3 per cent of the districts rural population fall in the range of 81 per cent and above. Only two villages with the population of 16 persons only are having hundred percent literacy rates in the district.

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

Table 24 reveals the number of literates and illiterates and percentage of literates by sex in UAs/towns .The literacy rate is significantly higher than the overall urban literacy rate of the district in Akalgarh (82.4%), Samrala (81.7%), Khanna (80.2%), Sahnewal (80.0%) and Ludhiana (79.8%). All other towns in the district fall below the district's average and Doraha (79.5%) is at par with the districts average.

Between the two sexes, 82.0 per cent among males and 76.4 per cent among females are literates. Like wise in urban, male literacy rate is the highest in Samrala (86.9%) and the lowest in Machhiwara (75.2%). In case of female literacy, it is highest in Akalgarh C.T. (78.3%) and the lowest also recorded in Machhiwara (NP) 65.2 per cent.

Male-Female literacy rates in urban shows a sizeable gap of 5.7 percentage points. This gap is comparatively more in Mullanpur Dakha (11.5 percentage points) and relatively less in Ludhiana (5.0 percentage points).

* village Behlolpur (00771200) falls in Phillaur (P) CD block of Jalandhar district.
** village Khaira (00837400) falls in chamkaur Sahib (P) of CD block of Rupnagar district.
wherever blockwise data have been shown in inset tables the analysis of these blocks has not been done as each block contain one village only.

Table 25 shows number and percentage of Scheduled Castes literates and illiterates by CD blocks.

Scheduled Castes have a literacy rate of 64.8 per cent as compared to an overall rural literacy rate of 72.6 per cent in the district. All the CD blocks show low literacy rate as compared to the district. The rural scheduled castes literacy rate is the highest in Ludhiana-I (69.0%) and the lowest in Jagraon (56.8%).

Among the CD blocks male literacy rate varies between 76.8 per cent each in Ludhiana and Pakhowal, and 63.7 per cent in Jagraon. Likewise, the scheduled castes female literacy shows wide variations; it is the highest 60.4 per cent in Ludhiana-I and the lowest 49.0 per cent in Jagraon.

There is a considerable gap of 16.3 percentage points among the male-female Scheduled Castes literacy rates and this gap is to the extent of 18.0 percentage points in Dehlon and 14.7 percentage points in Jagraon.

TABLE 26 : DISTRIBUTION OF VILLAGES BY LITERACY RATE RANGE FOR SCHEDULED CASTES POPULATION, 2001

District Total:	**860**	**100.0**	**490,502**	**100.0**
Literacy rate for District (Rural) :		**65.1**		

Table 26 shows distribution of villages by ranges for Scheduled Castes literacy rate. Nine villages, which make 1.0 per cent of the total villages and share negligible district's Scheduled Castes population, fall in the range of 30 per cent or less. Evidently, all these villages are marked with a very low literacy rate in their Scheduled Castes population.

Another 18 (2.1%) villages contain 1.5 per cent of scheduled castes population in the range of 31-40 per cent. Scheduled Castes literacy rate is relatively better in 42 (4.9%) villages containing 5.4 per cent of scheduled castes population in the range of 41-50 per cent.

In brief, more than 90 per cent of the district's Scheduled Castes population distributed in 791 villages comprising 92.0 per cent of total villages, fall in the literacy range of 51+. Among them 157 (18.3%) villages accommodate 19.8 per cent Scheduled Castes population in the range of 51-60 per cent. The maximum number of villages 381, which makes 44.3 per cent of the total villages and 45.6 per cent of the Scheduled Castes population, constitute the range of 61-70 per cent. Another 231 (26.9%) villages accommodate 26.8 per cent of the Scheduled Castes population in the range of 71-80 per cent. The higher literacy rate among scheduled castes has been noticed in the range of 80-100 in 22 (2.5%) villages. However, their share in populations of the district is 0.8 per cent only.

Further more, the highest literacy rate (more than 80%) is noticed in 22 (2.5%) villages accommodating 0.8 per cent scheduled castes population. Only two villages in the district have cent per cent literacy rate, reason being, these villages have a meager population of 2 only.

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

65.6 per cent of the Scheduled Castes population is literate in urban areas of the district. Among the towns, it is the highest in Akalgarh (77.5%), followed by each Khanna and Ludhiana (66.8%). By contrast, urban Scheduled Castes literacy rate is lowest in Jagraon (55.2%).

In urban areas 71.8 per cent of Scheduled Castes males and 58.2 per cent of females are literates reflecting a gap of 13.6 percentage points between the two. Male-female disparity in this regard is quite conspicuous. Among the towns Scheduled Castes male literacy rate varies between 84.4 per cent in Akalgarh and 60.7 per cent in Jagraon, while the corresponding percentage among females is 70.1 per cent and 49.1 per cent respectively.

Further more, male-female differential in Scheduled Castes literacy rate is the maximum in Samrala (18.1 percentage points) and the minimum in Raikot (10.8 percentage points).

Table 31 shows number and percentage of main workers, marginal workers and non workers by sex in tahsils.

Out of the total population in the district, 34.3 per cent are main workers and 3.6 per cent are marginal workers. The proportion of main workers is the highest in Samrala tahsil (36.3%) and the lowest in Jagraon tahsil (31.5%). The proportion of marginal workers is the highest 6.7 per cent in Payal tahsil and the lowest 2.3 per cent in Ludhiana (East) tahsil. Further, the incidence of marginal workers is observed to be more among females in comparison with males. The proportion of female marginal workers in the district (3.9%) is a little more than the males (3.3%). By and large, a similar pattern is observed in all the tahsils except Ludhiana (East) tahsils. In Payal tahsil, 8.3 per cent of females are marginal workers as against 5.3 per cent among male counterparts.

The work participation rate (main+ marginal) in Ludhiana district is 37.9 per cent which is higher than that of State average 37.5 per cent. Among tahsils, it varies between 42.9 per cent in Payal and 36.8 per cent in Ludhiana (East).

In the district 55.6 per cent males and 16.5 per cent females are reported as workers showing a significant gap of 39.1 points between the two. In Payal tahsil, 29.3 per cent of the females are recorded as workers and this is the highest among all the tahsils in the district.

Out of total population in the district, 44.4 per cent males and 83.5 per cent females are non workers.

Table No. 32 reveals that 40.2 per cent of the rural populations in the district are workers; comprising 34.6 per cent as main workers and 5.5 per cent as marginal workers. Among the CD blocks, the work participation rate varies between 44.7 per cent in Machhiwara and 35.7 per cent in Ludhiana-II.

Main workers show that proportion is the highest 39.4 per cent in Machhiwara C.D. block and the lowest 31.7 per cent in Jagraon. However, the proportion of marginal workers is the maximum in Dehlon CD block 7.1 per cent and the minimum in Ludhiana-II CD block 4.0 per cent.

Punjab State, in general is characterized by low female work participation rate. It was the lowest, 4.4 per cent among all the States/Union Territories in the country in 1991 Census. It was more due to non-reporting of female's work by the respondents. Special efforts were made in 2001 Census for netting more accurate female's work have helped in obtaining more accurate picture of female's work. Total female work participation rate in Punjab (19.1 %) recorded in 2001 Census is nearly five times that of 1991 Census and the district is far above of the state with 16.5 per cent female work participation rate.

In the district, 24.8 per cent of the rural females are reported as workers comprising 18.3 per cent main workers and 6.6 per cent marginal workers. This percentage is quite high in itself and stands comparable with the male counterparts (53.7 %). Further, the female participation in marginal work is greater than that of males. In rural areas of the district, the female work participation rate as marginal workers (6.6 %) is remarkably higher than the males (4.6 %) by 2.0 percentage point.

Among the CD blocks Female work participation rate varies between 35.9 per cent in Machhiwara and 16.0 per cent in Ludhiana-II. In all, seven CD blocks have female work participation rate higher and four CD blocks lower than the district average of 16.2 per cent in this regard.

Of the total rural population in the district, 46.3 per cent males and 75.2 per cent females are reported as non- workers.

+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

In urban areas of the district, the work participation rate 36.1 per cent is by and large more than that of the State (33.5 %). Among the towns in the district, it is the highest in Maloud (41.4 %) and the lowest in Akalgarh (31.6 %) as is evident from Table 33.

The participation in marginal work is relatively much less. In the district 2.0 per cent of the urban population is reported as marginal workers as compared to 34.1 per cent as main workers. The percentage of population reported as marginal workers shows a variation of 6.2 per cent in Maloud and 1.2 per cent in Akalgarh and the corresponding proportion of main workers varies between 37.0 per cent in Payal and 29.0 per cent each in Samrala and Machhiwara.

Urban female work participation rate in the district is 9.5 per cent compared with 57.0 per cent among males. Among the towns it is the highest in Maloud (25.8 %) and the lowest in Ludhiana (8.9 %). On the other hand, urban male work participation rate is highest in Ludhiana (57.9%) and the lowest in Akalgarh (46.0%).

Note: Per cent of worker to total worker is given in brackets

Table 34 shows distribution of workers by sex in four categories of economic activity by tahsils in the district.

Among the total workers in the district, 11.8 per cent are cultivators, 8.4 per cent agricultural labourers, 4.9 per cent engaged in household industry and 74.9 per cent as other workers. This signifies that 20.2 per cent of the total workers in the district are engaged in agricultural sector, while 79.8 per cent in non-agricultural sector of economy.

At tahsil level, the percentage of cultivators is the highest in Jagraon (26.2%) and the lowest in Ludhiana-East (3.5%) Likewise, the proportion of agricultural labourers varies between 22.0 per cent in Jagraon tahsil and 3.4 per cent in Ludhiana-East tahsil.

The proportion of workers engaged in household industry is the highest in Ludhiana-East (5.7%) cent and the lowest in Raikot (3.0%). In all, two tahsils, namely Ludhiana (East) and Ludhiana (West) exceed the district's average.

The participation of females in non-agricultural sector is greater than the agricultural sector. In the district 88.9 per cent of the female workers are non-agricultural workers comprising HHI-8.4 per cent and OW- 80.5 per cent.

Note: Percentage of workers to total workers are given in brackets

Table 35 shows distribution of workers by sex in four categories of economic activity by CD blocks in the district.

Among C.D. Blocks the proportion of rural workers recorded as cultivators is the highest in Jagraon (30.5 %) and the lowest in Ludhiana-I (16.3%). Likewise, the proportion of Agricultural labourers shows a variation of 27.1 per cent in Sidhwan Bet and 8.9 per cent in Ludhiana-I CD blocks.

The proportion of rural workers engaged in household industry 4.1 per cent is also comparable with urban workers (5.6 %). It is the highest in Dehlon (5.6 %) and the lowest in Doraha (2.8 %).

'Other workers' constitute more than half of the rural workers (56.2 %) in the district. It is the highest in Ludhiana-I (69.5%) and the lowest in Sidhwan Bet (39.2%) CD blocks.

It is further revealed that there is no significant variation in participation of females in the category of cultivator and agricultural labourers (C-6.1 % and AL-8.4 %). Rest of the females i.e. 85.5 per cent (HHI-7.8 % and OW-77.7 %) are non-agricultural workers.

Note : Per cent of worker to total worker is given in brackets.

\+ Towns arranged in alphabetical order.

* In case of towns having outgrowth an asterisk mark has been placed against their names to indicate that they have outgrowths which are not separate towns.

As is evident from Table 36, 3.1 per cent of the workers in urban areas in the district are engaged in agricultural activities, either as cultivators or agricultural labourers and the remaining 96.9 per cent are occupied in non-agricultural pursuits such as household industry and other workers. Further the proportion of agricultural workers (cultivators + agricultural labourers) is the highest 23.8 % in Machhiwara and the lowest 2.0 % in Ludhiana. Similarly, the proportion of workers engaged in household industry is the maximum in Ludhiana (6.0 %) and the minimum (1.8 %) in each of Akalgarh and Machhiwara. As regards 'other workers', Akalgarh (92.5 %) and Machhiwara (74.4 %) represent the highest and the lowest percentages.

	District Total:	897 (100)	842 (93.9)	550 (61.3)	897 (100.0)	267 (29.8)	763 (85.1)	826 (92.1)	125 (13.9)	367 (40.9)	896 (99.9)	897 (100.0)

Note :- Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 37 shows distribution of villages according to availability of different amenities by CD blocks.

Education :

Educational amenity of some kind or the other is available to 93.9 per cent of villages in the district. It is in case of only 55 villages that this facility is not available within the village, but the same can be availed at some distance.

Among the CD blocks, cent per cent villages of Sudhar block have this facility whereas only 84.1 per cent villages of Machhiwara block are enjoying this facility. In all the CD blocks, except Machhiwara more than 90 per cent of the villages are availing this facility within the villages.

Medical :

61.3 per cent of the villages in the district are equipped with some kind of medical facility or the other. This percentage is as high as 88.0 per cent in Sudhar CD block. Apart from this, three-forth of the Dehlon (81.9%) villages in CD blocks, Jagraon (80.8 %), Khanna (73.0%), Sidhwan Bet (68.5 %), Ludhiana-I (68.3%), Pakhowal (61.9 %), Doraha (61.5%) and Samrala (57.8%), are having availability of medical facility within the village. The proportion of villages having medical facility in less than one-half of the villages is only in two CD blocks Ludhiana-II (47.4%), and Machhiwara (38.6%).

Improved Drinking Water :

Improved drinking water which refers to availability of drinking water through tap, hand pump and tube well is available to all the villages in the district.

Post Office :

29.8 per cent of the villages in the district have availability of post office within the village and the villagers of the remaining 70.2 per cent villages avail this facility at some distance. This percentage is as high as 69.2 per cent in Jagraon CD block. On the other hand, this percentage is as low as 8.7 % in Ludhiana-II CD block.

Telephone :

Telephone facility is available in 85.1 per cent of the villages in the district which by all means is a very high percentage. The proportion of villages varies among the CD blocks between 98.1 per cent in Jagraon and 64.4 per cent in Machhiwara.

Transport and Communication :

The villages in the district are excellently equipped with transport and communication as 92.1 per cent of the villages have this facility. Only 71(out of 897) villages are devoid of this facility and avail it at some distance. The hundred per cent of villages are availing this facility in each of Sidhwan Bet, Jagraon, and Sudhar.

Banks :

13.9 per cent villages in the district have bank facilities. As high as 42.3 per cent villages of Jagraon CD block have this facilities within village. The percentage is the lowest in the CD block Ludhiana-II (1.7%).

Agricultural Credit Societies :

40.9 per cent of the villages in the district have agricultural credit societies. Among the CD blocks it varies between 54.0 per cent villages in Sudhar and 22.0 per cent in Machhiwara. In all, seven CD blocks exhibit percentage of villages with agricultural credit societies above and four below the district's average.

Approach by pucca roads :

The percentage of villages approachable by pucca road in the district, as true for the state, is very high (99.9%). In all the CD blocks, except Sudhar, hundred percent of villages are approachable by pacca road whereas this percentage is 98.0 per cent in Sudhar.

Power Supply :

All the villages in the district are having power supply.

TABLE 38: NUMBER AND PERCENT OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Serial number	Name of C. D. block	Total population of inhabited villages	Type of amenity available									
			Education	Medical	Improved drinking water*	Post Office #	Tele-phone	Transport communications $	Banks	Agricul-tural Credit Societies	Approach by pucca road	Power supply

Note :- Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.

However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table 38 shows number and percentage of rural population served by different amenities in the district.

As regards educational facility, it is very satisfying that 99.6 per cent of the rural population in the district avail educational facility. Among the CD blocks, the proportion of population served by educational facility is the highest in Sudhar (100.0%) and the lowest in Machhiwara (97.2%).

As regards medical facility, it is serving almost 4 out of 5 persons (78.2 %) of the rural population. Among the CD blocks, the proportion of population served by medical institutions is the highest in Sudhar (94.0 %) and the lowest in Machhiwara (56.1 %). The position is fairly good in Sidhwan Bet (82.5%), Jagraon (87.9 %), Ludhiana-I (80.4 %), Dehlon (87.9%), and Khanna (80.0%) also where a large chunk of the rural population is enjoying these services.

Post offices are serving 46.6 per cent of the rural population in the district and this percentage of population varies between 86.2 per cent in Jagraon and 11.5 per cent in Ludhiana-II CD blocks.

97.6 per cent of rural population is enjoying the telephone facility in the district. It is the highest 99.9 per cent in each of Jagraon and Samrala whereas the lowest 89.1% in Machhiwara CD block.

Transport and communication facility comprising bus and rail services is available to 95.5 per cent population of the district. In the three CD blocks, namely Sidhwan Bet, Jagraon, and Sudhar all inhabitants are availing this facility. Excepting Dehlon (86.3%), remaining all CD blocks are exhibiting the percentage more than 90.0% of their population.

Banks cater to the needs of 29.7 per cent population. Among the 11 C D blocks, the proportion of population served by banks is the highest in Jagraon (61.3 %) whereas it is only 4.5 per cent in Ludhiana-II.

53.2 per cent people are having the facility of agricultural credit society. In this regard CD blocks Sidhwan Bet (58.0 %), Jagraon (69.4 %), Sudhar (68.3%), Samrala (64.2%), and Dehlon (61.4%) surpass district's average.

On an average 99.9 per cent of the population in 11 CD blocks of Ludhiana district is served by pucca road. Population of all CD blocks, apart from one, namely Sudhar, are having the approach by pacca road.

The entire population in 11 CD blocks of Ludhiana district is served by improved drinking water, and power supply.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 to 4)
1	2	3	4	5
1. Education :-				
(a) Primary School	55	0	0	55
(b) Middle School	408	37	2	447
(c) Degree College	152	264	466	882
2. Medical:-				
(a) Hospital	254	334	308	896
(b) PHC	260	350	215	825
3. Post Office	580	43	7	630
4. Telephone	132	1	1	134
5. Bus Service	69	4	0	73
6. Banks				
(a) Commercial Bank	534	240	26	800
(b) Cooperative Bank	531	258	17	806
7. Agricultural Credit Societies	445	70	15	530

Table 39 shows distribution of villages, which are not having certain amenities, by distance ranges from the places where these are available.

Education :

In 55 villages which do not have primary school but can avail this facilities within a distance of less than 5 kms.447 villages in the district do not have middle school. However, among them, this facility is available within less than 5 kms in case of 408 villages; for 37 villages it is available at a distance of 5-10 kms and for the remaining 2 villages, it is available at a distance of more than 10 kms.

882 villages do not have degree colleges. However, this facility is available to 152 villages within a distance of 5 kms; in case of 264 villages at a distance of 5-10 kms and the remaining 466 villages avail this facility by covering a distance of more than 10 kms.

Medical :

896 villages in the district do not have availability of hospital within the village. The same is available to 254 villages within a distance of less than 5 kms; 334 villages avail it at a distance of 5-10 Kms and the residents of 308 villages cover a distance of more than 10 kms to avail this facility.

Likewise out of 825 villages which do not have PHC but the same is available at a distance of less than 5 kms in respect of 260 villages; at a distance of 5-10 kms in case of 350 villages and at a distance of more than 10 kms to 215 villages.

Post office :

Among the 630 villages in the district which do not have the post office but the same is available to 580 villages within a distance of less than 5 kms, 43 villages at a distance of 5-10 Kms and in case of another 7 villages have to avail it beyond the distance of 10 kilometers.

Telephone :

The district is well equipped with this facility as barely 134 (out of 897) villages do not have this facility. The same is available within a distance of 5 kms to 132 villages and it is available to one village each in the ranges 5-10 kms and 10+.

Bus Service :

There are only 73 villages which do not have bus service available to them in the village. The same is available to 69 villages within a distance of 5 kms and 4 villages avail it at a distance of 5-10 Kms.

Bank :

Rural banking seems to be lacking in the district. Commercial banking within the village is not available in 800 villages. Among them 534 villages avail this facility at a distance of less than 5 kms. In case of 240 villages it is available at a distance of 5-10 kms and for the remaining 26 villagers travel a distance of over 10 kms to avail this amenity.

Likewise, Co-operative banking facility is not available in 806 villages. Among them 531 villages avail it within a distance of 5 kms; in case of 258 villages it is available at a distance of 5-10 kms and for the remaining 17, the villagers travel a distance of over 10 kms to avail this amenity.

Agricultural Credit Societies :

Out of 530 villages which are not having Agricultural Credit Societies, 445 can avail this facility within a distance of less than 5 Kms and for 70 villages it is available at a distance of 5-10 kms. Remaining 15 villages avail this facility covering over 10 kms.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available							
		Education	Medical	Post Office #	Tele-phone	Transport commun-ications $	Banks	Agricultural Credit Societies	Approach by pucca road

Post office includes Post office, Telegraph office and Post and telegraph office.

Transport communication includes bus service, rail facility and navigable waterways.

Based on the improved drinking water source, drinking water supply has been classified as 'Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well situated within or outside the premises it is considered as having access to 'Improved drinking water source'.

However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table 41 presents distribution of villages by population ranges and amenities available.

Out of 897 villages, 190 villages have a population of less than 500, 214 fall in size class 500-999, 274 have population in the range of 1,000-1999, 193 are in the range of 2,000-4999, 23 villages comprise the size class of 5,000-9,999. And only 3 villages have population 10,000 and above in the district.

Educational facility is available to 842 (93.9%) villages under various size classes. Barring size classes 1-499 where out of 190 villages, 135 (71.1%) villages have this facility and villages in rest of the population ranges have cent per cent education facility.

Medical facility is available to all the 3 large sized villages having population of 10,000 or more. Among others, this facility is available to 48 (25.3 %) villages in the range of 1-499, 118 (55.1 %) villages in the range of 500-999, 189 (69.0%) villages with population range of 1,000-1,999, 171 (88.6%) villages with population range 2,000-4,999 and 21 (91.3%) villages in the range 5,000-9,999.

Post office is available in 16 (69.6 %) villages having population of 5,000 or more, followed by 2 villages (66.7%) in the range 10,000+ and 111 (57.5%) in the population range 2,000-4.999. Among others, this facility is available to 12 (6.3%) villages in population size class 1-499, 29 (13.6%) villages with population 500-999, and 97 (35.4%) villages with population 1,000-1,999.

All the villages under size classes of 1,000-1,999, 5,000-9,999 and 10,000+ have availability of telephone facility. This facility is availed by the 99.5 per cent of the villages in the population range 500-999 and 2,000-4,999, on the other hand, only 30.5 per cent of the villages with population less than 500 have availability of telephone.

Transport and communication facility is available to all the villages in the population size ranges 5,000-9,999 and 10,000+. This facility is available to 157 (82.6%) villages under size class 1-499, 198 (92.5%) villages under size class of 500-999, 260 (94.9%) villages under size class 1000-1999 and 185 (95.9%) villages under size class 2,000-4,999.

Availability of banks is predominantly the characteristic of larger villages. Likewise, all 3 villages have this facility available in size class 10,000+. Besides, 56.5 per cent of the villages in the population range 5,000-9,999 have this facility within the village. 36.8 per cent villages in size class 2,000-4,999, 8.8 per cent villages with population in the range of 1,000-1,999, 3.3 villages with population in the range of 500-999 and 3.7% villages with population range of 1-499 have the availability of banks.

Agricultural credit societies are available in 16 (69.6%) villages under population size 5,000-9,999 and 2 (66.7%) villages under population size 10,000+. It is also available to 114 per cent of villages with population 2000-4999, 50.7 per cent villages in size class 1,000- 1,999, 26.2 per cent villages having population in size class 500-999 and 21.1 per cent villages with population below 500.

Every village in all population size ranges, except in the range of 500-999, is approachable by pucca road in the district. In the population size range 500-999, as many as 99.5 per cent of the villages are approachable by pacca road.

All the villages in the district have the availability of drinking water and power supply.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Ludhiana-II	173	49,014	84.4	98.5
2	Sidhwan Bet	92	42,705	89.9	99.0
3	Jagraon	52	39,709	87.2	96.7
4	Sudhar	50	33,129	85.4	98.3
5	Pakhowal	63	28,851	89.7	98.7
6	Ludhiana-I	60	24,191	83.2	98.5
7	Doraha	65	26,501	90.2	100.0
8	Machhiwara	132	28,985	89.5	99.3
9	Samrala	62	17,642	89.6	99.8
10	Dehlon	72	26,899	89.0	100.0
11	Khanna	74	22,466	89.0	100.0
12	Phillaur (P)	1	1,526	95.4	100.0
13	Chamkaur Sahib (P)	1	658	93.9	97.1
	District Total:	**897**	**342,276**	**87.8**	**98.8**

Note : - Cultivable area = irrigated area + unirrigated area

Table 42 shows the number of villages by CD block wise according to land use. Ludhiana-II CD block (49,014 hectares) is the largest in area. On the contrary, Samrala (17,642 hectares) is the smallest in area. In the district 87.8 per cent of the area is cultivable and among the CD blocks this percentage varies between 90.2 per cent in Doraha and 83.2 per cent in Ludhiana-I.

98.8 per cent of the cultivable area is irrigated in the district. All the CD blocks have fairly high proportion of their cultivable area under irrigation. In three CD blocks namely Doraha, Dehlon and Khanna, the cent per cent of the cultivable land are irrigated. Among the other 8 CD blocks it varies between 99.8 per cent in Samrala and 96.7 per cent in Jagraon.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administ-ration	Public health and conveniences	Public works	Public institutions	Other (s)
1	2	3	4	5	6	7	8	9	10	11
1	Ludhiana	865.3	716.4	148.9	852.2	69.5	333.4	252.1	0	197.2
2	Mullanpur Dakha	555.2	221.7	333.5	577.0	291.8	0	179.6	0	105.6
3	Jagraon	565.7	411.3	154.4	575.0	140.6	144	276.1	0	14.3
4	Raikot	616.4	401.7	214.7	577.4	168.6	0	180.2	0	228.6
5	Maloud	735.6	194.1	541.5	393.0	51.6	0	271.8	0	69.6
6	Payal	491.4	267.4	224	485.2	199.1	65.1	210	0	11
7	Khanna	671.4	440	231.4	675.3	36.8	160.1	116.2	1.7	360.5
8	Doraha	744.7	215.9	528.8	765.9	216.2	28.5	19	0	502.2
9	Sahnewal	926.5	638.4	288.1	891.6	147.5	44.5	0	677.3	22.3
10	Samrala	639.4	292.4	347	636.6	343.8	76.5	204.9	0	11.4
11	Machhiwara	801.9	371.8	430.1	688.4	189.2	131.3	99.4	0	268.5
	District Total	**827.4**	**658.6**	**168.8**	**813.9**	**80.1**	**293.4**	**234.6**	**7.0**	**198.7**

Table 43 shows per capita receipt and expenditure incurred on all the statutory towns in the district. The per capita receipt in the district is Rs 827.4 out of which Rs 658.6 comes through taxes and Rs 168.8 through all other sources. The per capita receipt is as high as Rs 926.5 in Sahnewal and as low as Rs 491.4 in Payal.

As against the per capita receipt of Rs 827.4, the district is incurring per capita expenditure of Rs 813.9. The per capita expenditure on general administration is to the extent of Rs. 80.1, on Public health and conveniences Rs.293.4, public works Rs.234.6 and Per capita expenditure on public institutions is only Rs.7.0, while it is Rs.198.7 for all other types of activities. Per capita receipt exceeds per capita expenditure in 7 towns whereas in four towns namely Mullanpur Dakha, Jagraon, Khanna and Doraha per capita receipt is less than per capita expenditure.

TABLE 44 : SCHOOLS / COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary/ Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Doraha (MCl.)	4.2	1.6	0.5	0.5	1.1
2	Jagraon (MCl.)	2.5	1.2	0.8	0.7	0.5
3	Khanna (MCl.)	3.4	1.0	0.9	0.9	0.3
4	Ludhiana (M.Corp.)	1.4	0.4	0.3	0.3	0.1
5	Machhiwara (N.P.)	4.4	1.6	1.1	1.1	1.1
6	Maloud (N.P.)	5.6	2.8	2.8	2.8	2.8
7	Mullanpur Dakha (N.P.)	4.3	1.4	0.7	0.7	0.7
8	Payal (MCl.)	6.9	4.1	2.8	1.4	0.0
9	Raikot (MCl.)	3.2	2.0	1.2	0.8	0.4
10	Sahnewal (N.P.)	2.9	1.2	0.6	0.6	0.0
11	Samrala (MCl.)	4.5	1.7	1.7	1.1	0.6
	District Total	**1.8**	**0.6**	**0.5**	**0.4**	**0.2**

Table 44 shows number of schools/colleges per 10,000 population in towns. In the district there are 1.8 primary schools, 0.6 junior secondary/middle schools, 0.5 secondary/matriculation schools, 0.4 senior secondary schools and 0.2 colleges per 10,000 populations. In the case of primary schools, Payal (6.9) reports the highest figure; where as the lowest is reported in Ludhiana (1.4). In the category of Junior secondary/ Middle school again Payal (4.1) reports the highest

figure, whereas Ludhiana (0.4) is at the bottom. In case of Secondary/Matriculation school, Payal along with Maloud (2.8) rank first. On the other hand, the lowest figure is reported as 0.3 schools per 10,000 populations in Ludhiana. In case of Senior Secondary school, Maloud reports the highest figure, 2.8 schools whereas only 0.3 schools are reported against Ludhiana for every 10,000 population. 2.8 colleges are reported against 10,000 populations in Maloud and only 0.1 in Ludhiana whereas no college is reported under Payal and Sahnewal. It can be concluded that Ludhiana being a very big town with large population, has been suffering from a very low ratio of number of educational institutes.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	2	3
1	Akalgarh (C.T.)	47
2	Doraha (MCl.)	26
3	Jagraon (MCl.)	8
4	Khanna (MCl.)	10
5	Ludhiana (M.Corp.)	17
6	Machhiwara (N.P.)	16
7	Maloud (N.P.)	70
8	Mullanpur Dakha (N.P.)	18
9	Payal (MCl.)	34
10	Raikot (MCl.)	0
11	Sahnewal (N.P.)	14
12	Samrala (MCl.)	28
	District Total	**17**

Table 45 reveals the number of beds in medical institutions in towns per 10,000 population. The district on an average has 17 beds per 10,000 population. Among the towns, Maloud has 70 beds per 10,000 populations which is the highest among all the towns and Raikot, on the other hand, is showing no bed facility in the medical institution.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	2	3	4	5
1	Doraha	18,986	3680	19.4
2	Khanna	103,099	29257	28.4
3	Ludhiana M.Corp	1,398,467	293580	21.0
4	Maloud	7,186	2390	33.3
5	Mullanpur Dakha	13,949	2179	15.6
6	Payal	7,267	1800	24.8
7	Raikot	24,769	7068	28.5
8	Sahnewal	17,293	1600	9.3
9	Samrala	17,590	3250	18.5
	District Total	**1608606**	**344804**	**21.4**

Table 46 shows proportion of slum population living in statutory towns in the district. In absolute term Ludhiana MC shows the maximum number of slum populations 293,580

within the town, whereas the percentage of slum population is the highest (33.3%) in Maloud and the lowest (9.3%) in Sahnewal.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Akalgarh (C.T.)	Machine Tools	
2	Doraha (MCl.)	Toka Machines Steel Honey	Paddy Wheat Toka Machine
3	Jagraon (MCl.)	Agricultural Implements Shoes Iron Re-Rolling	Wheat Rice Cotton
4	Khanna (MCl.)	M.S.Joints M.S. Rounds Sewing Machine	Wheat Groundnut Oil Cycle Parts
5	Ludhiana (M.Corp.)	Hand Tools Hosiery Goods Bicycle	Hand Tools Hosiery Goods Bicycle
6	Machhiwara (N.P.)		Rice
7	Maloud (N.P.)	Sugar Wheat Rice	Wheat Rice Onion
8	Mullanpur Dakha (N.P.)	Cycle Parts Groundnut Oil Washing Soap	Groundnut Oil Rice Cotton
9	Payal (MCl.)	Shawls Agricultural Implements Rice Sheller	Woolen Shawl Maize Paddy
10	Raikot (MCl.)	Soap Mustard Oil Sugar Products .	Wheat Rice Potato
11	Sahnewal (N.P.)	Electronics Parts T.V. Nut Bolts	T.V. Nut Bolt Cycle Parts
12	Samrala (MCl.)	Agricultural Implements Machinery Parts Hosiery Goods	

Table 47 shows most important commodities manufactured in the towns and exported out.

Generally speaking, each town has its own characteristic as is revealed by this table. Besides manufacturing of agricultural products e.g. sugar, wheat, rice etc., towns of the district are also engaged in production of machine tools, steel,, agricultural implements, shoes, bicycles, electronic parts, T.V., nut bolts, shawls, mustard oil, hosiery and soap, etc.

Besides the agriculture-oriented products, bicycle & cycle parts, woolen shawl, T.V., hosiery product, hand tools etc. are the key items exported from the towns of Ludhiana district.

(x) Brief Analysis Based on Houses and Household Amenities

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure status	Number of dwelling rooms	Number of households								
		Total			Scheduled Castes			Scheduled Tribes		
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban

	Median number of rooms	1	1	1	1	1	1	-	-	-

Data Source: Census of India 2001, H– Series: "Tables on Houses, Household amenities and Assets".

437,113 households are living in owned houses in the district, 94,100 in rented houses and 15,172 with tenure status 'others' i.e. neither owned nor rented. This reflects that 80.0 per cent of the households are living in owned houses, 17.2 per cent in rented houses and remaining 2.8 per cent in 'others'.

Among the households living in owned houses, 84,419 (19.3%) have one room, 133,131 (30.5%) two rooms, 103,318 (23.6%) three rooms and 113,966 (26.1%) more than three rooms. This reveals that the majority of the owned houses have two or more rooms. Interestingly, 2,279 (0.5%) of the households living in owned houses, do not have any exclusive room.

By and large a similar pattern is observed both for rural and urban areas. In rural areas 19.7 per cent of households are living in owned houses having one room; 31.6 per cent in 2 rooms,

23.8 per cent in 3 rooms, and 24.5 per cent in more than 3 rooms; the corresponding percentages for urban areas are 18.9, 29.3, 23.5 and 27.6 per cent respectively. Further more, 0.4 per cent of rural households and 0.7 per cent urban households are residing in owned houses which do not have any exclusive room.

Among the Scheduled Castes, 0.6 per cent have no exclusive room, 31.0 per cent are residing in owned houses with one room, 36.1 per cent have two rooms, 18.6 per cent have three rooms and 13.7 per cent in houses with more than 3 rooms.

		(9.7)	(15.0)	(24.0)	(18.4)	(24.4)	(36.8)	(3.4)	(4.3)	(6.6)

This table shows percentage distribution of households by tahsil living in permanent, semi permanent and temporary houses. Out of 508,576 households living in permanent houses in the district, 6.4 per cent are in Samrala, 6.1 per cent in Khanna, 6.3 per cent in Payal, 56.2 per cent in Ludhiana (East), 9.3 per cent in Ludhiana (West), 6.0 per cent in Raikot and 9.7 per cent in Jagraon tahsils. The percentage share of households living in semi-permanent houses of the district shows a variation of 47.0 per cent in Ludhiana (East) to 7.1 per cent in Samrala. There are 12,946 households living in temporary houses and they make 2.4 per cent of the total households. Percentage of households living in temporary houses is the highest 35.4 per cent in Ludhiana (East) and the lowest 3.8 per cent in Payal.

Out of the total households (508,576) living in permanent houses, 213,933 (42.1%) are in rural and 294,643 (57.9%) in urban areas. Likewise percentage of households living in semi-permanent houses in rural and urban areas is 53.5 and 46.5 per cent respectively. Among households living in temporary houses 7,461 (57.6%) are in rural and 5,485 (42.4%) in urban.

TABLE 50: PERCENTAGE OF HOUSEHOLDS HAVING IMPROVED DRINKING WATER SOURCE, ELECTRICITY, BATHROOM, TOILET AND DRAINAGE FACILITY, 2001

Sl No.	Tahsil	Total / Rural / Urban	Number of households	Number and percentage of households having				
				Improved drinking water*	Electricity	Bathroom	Toilet	Drainage

Data source: Census of India 2001, H-Series: "Tables on Houses, Household amenities and Assets."

* Based on the improved drinking water source, drinking water supply has been classified as 'Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump/tube well Situated within or outside the premises it is considered as having access to 'Improved drinking water source'. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note : Percentage is given in brackets after the number of households.

Bathroom means bathroom within the house

Toilet means toilet within the house

Drainage means closed and open drainage

Table 50 shows proportion of households having improved drinking water source, electricity, bathroom, toilet and drainage connectivity.

Improved drinking water :

Households having tap, hand pump, and tube well as the source are grouped as having improved drinking water facility. In the district it is available to 99.1 per cent of the households, the corresponding figures for the rural and urban areas are 98.6 and 99.4 per cent respectively. The trends are, by and large, the same among the tahsils in the district.

Electricity:

Electricity as the source of light is available to 95.5 per cent of the households in the district. The corresponding figures for rural and urban areas are 94.1 and 96.6 per cent respectively signifying that the rural areas do not lag much behind their urban counterparts. The trends are, by and large, the same for all the tahsils barring Ludhiana (West) and Samrala where percentages of the households having electricity is the higher in rural areas. In Ludhiana (West), this percentage is significantly lower in urban parts (89.4%) compared with the rural (94.6%).

Bathroom :

Bathroom is available to 80.5 per cent of the households in the district. Even in rural areas this facility is available to 77.3 per cent of the households as compared with 83.0 per cent of the urban households.

Among the tahsils, Raikot with 84.2 per cent of the households having this facility is on top and Samrala (76.5%) at the bottom.

Toilet :

80.6 per cent of the households have toilet facility available to them. Even in rural areas this facility is available to 64.3 per cent of the households as compared to 92.9 per cent of urban households. Among the tahsils this percentage varies between 89.4 per cent in Ludhiana (East) and 54.0 per cent in Samrala. In urban areas availability of this facility is the highest 94.7 per cent of the households in Ludhiana (East) and the lowest 73.5 per cent of the households in Samrala tahsil.

Drainage :

Drainage connectivity is available to 85.5 per cent households in the district. Within tahsils it is the highest 91.2 per cent of households in Payal and the lowest in Jagraon 78.9 per cent.

Data source : Census of India 2001, H-Series: "Tables on Houses, Household amenities and Assets."

The Caption of Table No. 51 shows the type of fuel used for cooking by households.

Cooking gas (LPG) is the most dominant fuel used for cooking in the district as it is being used by 45.5 per cent of the households. This percentage is as high as 55.9 per cent in Ludhiana (East) tahsil. In urban areas 60.0 per cent households are using Cooking gas (LPG) whereas this percentage is as low as 26.4 per cent in the rural areas of the district.

The Cow dung Cake is also fairly used by 23.7 per cent of the total households in the district. This percentage is the highest in Samrala tahsil (54.1%). The consumption of cow dung cake is higher in the rural areas as expected.

Kerosene is the third most dominant fuel used for cooking. In the district almost every 7th household (17.5%) is using kerosene; the corresponding percentage for rural and urban areas is 5.2 and 26.8 per cent respectively. The use of kerosene as fuel for cooking in urban areas is more than that of rural areas..

Among the other fuels being used, only fire wood (7.2%) and crop residue (4.5%) are worth mentioning.

TABLE 52 : NUMBER OF HOUSEHOLDS AVAILING BANKING SERVICES AND NUMBER OF HOUSEHOLDS HAVING EACH OF THE SPECIFIED ASSET

Data source: Census of India 2001, H-Series: "Tables on Houses, Household amenities and Assets."

Out of 546385 households in the district, 268,489 (49.1%) are availing banking services; 197,282 (36.1%) have Radio Transistor; 398,459 (72.9%) television; 138,279 (25.3%) telephone;

395,545 (72.4%) bicycle; 203,166 (37.2%) scooter, motorcycle, moped and 46,931 (8.6%) car/ jeep/van. The over all scenario of availability of assets in the district can be graded as fairly good. Nevertheless, 46,813 (8.6%) of the households have none of these assets available in the district.

(xi) Places of tourist, religious, historical or archeological importance

Bhaini Sahib :

It is also known as Bhaini Ala, and is located some 25 kms towards east of Ludhiana on Ludhiana-Chandigarh road with which it is connected by a 3 kms. long link road. It is headquarter of the Namdhari sect, who made great sacrifices against cow slaughter during the British rule. Guru Ram Singh ji made the place the centre of his activities on 13th of April, 1857. The following places in the village are venerated by the Namdharis : Thara (raised platform), Loh (a big round iron pan), Ramsar (Sarowar), Diwanwala Makan, Akalbunga , Gaddi Sahib and Havan Kund etc. The special about this place is that there is no hand pump or tap in the village. Also on the days of the big gatherings mass marriages are celebrated among Namdharis.

Alamgir :

It is located about 13 kms. to the south-west of Ludhiana-Malerkotla Road. The place was named as such due to its taking possession by the inhabitants in the times of Mughal Emperor Aurangzeb. The place is famous for a historical Gurudwara Manji Sahib built in memory of Guru Gobind Singh, who visited this place. The Guru cured a leprosy affected women from a bath in the spring created through an arrow shot by him. It was prophesied by the Guru that who so ever takes a bath in the Sarovar (Tank) with faith would be cured of leprosy. The legend goes that Guru was brought to this place on a cot (Manji) carried by his two Muslim and three Sikh followers.

Chhapar :

It is situated on Ludhiana-Malerkotla Road about 31 kms. from Ludhiana and 3 kms. from Malerkotla. The place is known for its Guga Mari. The legend goes that Guga Mari was built here by bringing few bricks from Bangar Mari (located in Bikaner district of Rajasthan state) A big fair is held here on Guga Naumi which lasts for three days. A number of people from far and wide attend this fair. Cattle fairs are also held here in the months of March and October.

Dehlon :

It is situated at a distance of 19 kms. from Ludhiana on Ludhiana-Ahmedgarh road. There is a historic Gurudwara built in memory of the sixth Sikh Guru Hargobind, who halted here on his return journey from Gwalior fort, where he was imprisoned under orders of the Mughal Emperor. A big gathering is held here on every Sankranti (1st day of every month of Bikrami calendar).

Doraha :

It is situated at a distance of 21 kms. from Ludhiana on G.T. Road toward Ambala. It is also a railway station on Amritsar-Delhi line. There is an old serai (Inn) said to have been built in the time of Emperor Aurangzeb. It must have been an impressive structure at the time of its construction but now it is in ruins. There is a historic Gurdwara built in the memory of the sixth Sikh Guru Hargobind. It is a town with a municipal committee. It used to be an important centre of timber, which was diverted via Sirhind canal from Satluj. The community development block office is also located here. Number of industrial units has been set up here which provide employment to the residents.

Ghurani Kalan :

It is located some 8 kms. from Payal on Payal-Malerkotla road. The place is associated with sixth Sikh Guru Hargobind, who stayed here for some time. A historical Gurudwara has been constructed in his memory where Guru's **Angarakha,** a shoe and a manuscript of Panchgranthi (Gurumukhi) are displayed in a show case. In the Gurudwara premises there is a Neem tree to which Guru tethered his horse. There is another Gurudwara known as 'Neem Sahib' where the guru struck into the ground Neem stick after cleaning his teeth. The same is said to have grown into a tree. Big diwans are held here on Guru Hargobind's birthday in Asadh (june), kartika Puranmashi (October) and 7th pause (December) every year.

Gujarwal :

It is about 19 kms. from Ludhiana towards east. About 2 kms. from the village there is a historic Gurudwara built in the memory of sixth Sikh Guru Hargobind. It is known as Gurusar or Manji Sahib. A legend connected with the place goes that during his stay Guru Hargobind asked Chowdhary Fatouhi to present him his hawk (Baz) but the Chowdhary did not oblige instantly. Later the hawk was taken ill, as it consumed a lump of yarn. The Chowdhary believing this to be the curse of Guru presented the hawk, but the Guru did not accept the offer. Instead the patted the hawk, who vomited out the lump of yarn and recovered. On every Amavas, on the birthday of sixth Guru and Chet Chaudas there are large gathering in the Gurudwara.

Katani :

It is situated about 26 kms. from Ludhiana on Ludhiana Chandigarh Road. The place is known for Gurudwara Katana Sahib, built in memory of the visit of sixth Sikh Guru Hargobind on his return from Gwalior fort. Also the 10th Guru Gobind singh visited this place in the disguise of Uch-ka-pir after his departure from Chamkaur sahib. As Guru Gobind singh took meals at this place, the Gurudwara is also called Degsar. The Gurudwara is situated on the bank of Sirhind canal and is built in two wings-- one in memory of the sixth Guru Hargobind and the other of tenth Guru Gobind singh.

Kanech :

It is about 18 kms. from Ludhiana on G.T. Road towards Ambala. The nearest Railway station is Doraha, on Ludhiana-Ambala Railway line. It has a historic Gurudwara built in the memory of the visit of Guru Gobind Singh after his departure from Chamkaur sahib. The legend goes that Guru Gobind Singh desired a local resident Chowdhary Fatouhi to present him his mare. On later's refusal the mare died.

Lalton :

It is about 8 kms. from Ludhiana. The village was under the rule of Rai Muslims of Raikot. Choudhary Gainda got built Gurudwara, a Shivala and a tank at this place, which was considered an example of religious harmony. Free langar is served in the Gurudwara. The village is divided into two parts, Lalton Kalan and Lalton Khurd.

Ludhiana :

It is the seat of the district as well as Tahsil headquarters. The city has been founded in the times of Lodi Emperors on the site of the village called Mir-Hota in the year 1481 AD. The present name corrupted from the old name Lodiana, which means town of the Lodi's. It was originally situated on the left bank of Budha Nala on the ridge but now has spread out on all

the four sides. In the old times it was an important station on the Delhi-Central Asia Highway. In the times of Mughals it was the seat of Mahal, as part of Suba of Sirhind. With the downfall of the Mughals it passed in the hands of Rais of Raikot and in about 1760 AD. Rai Kalha is said to have strengthened the fort. In 1806 it passed in the hands of Maharaja Ranjit Singh, who annexed it from Rani Bagh Bhari of Raikot. Ranjit Singh passed it over to his maternal uncle Raja Sangat Singh of Jind state. In 1809 the British got in lease a plot of land to build a cantonment and ultimately annexed it in 1835 on the death of Raja Sangat Singh.The town renamed it in possession of the British till 1947.

The town made rapid progress under the patronage of British, who developed it as a center of trade and commerce. As a result of famine in Kashmir in 833 about 1500-2000 families of Kashmiri artisans took residence in this town. In 1842 on withdrawal of British from Kabul they settled Amir of Kabul, Shah Shuja-ul-Mulk, at Ludhiana. After annexation of Punjab in 1849 it was made district headquarters in 1850 and thereafter there was no looking back. The building of G.T road, the railway line and the Sirhind canal opened many economic opportunities for its inhabitants. The town has blossomed into a leading centre of industries, trade and commerce and education the city boasts of having the only stock Exchange of the state of Punjab. Besides its road and rail connections with other parts of the state and the country, it is connected by air with Delhi, Chandigarh, and Hissar. It was first connected by air with Delhi in 1982 by a Vayudoot service. It is the most populous city of the State. It is known for cycle, sewing machines, auto-parts engineering products and hosiery throughout India. It is also called the Manchester of the Punjab.

Maloud :

It is situated some 40 kms. from Ludhiana on Ludhiana-Ahmedgarh Road. It is said to be an ancient place where Mallas hailing from Multan, won a victory against the locals. The place came to be known as Malla Udey (rise of Mallas), which corrupted to the present name Maloud. There was a ruin which was known as Theh Loharan. It had a fort which was annexed by Sardar Man Singh from the Malerkotla Afghans in 1754. The place had a fortification wall which has since been pulled down. In 1872 the local Sardar was murdered by the Namdharis for his refusal to render help against Malerkotla.

Payal :

It is situated about 37 kms. from the district headquarter and is 10 kms. from Chawapail railway station by road. It is also connected with Doraha, Khanna and Malerkotla by road. The legend goes that this place got the name Payal from discovery of **Payzeb** from the old mound on digging under directions of Shah Hussain some 760 years ago. The founder's tomb still stands in the town. It was at Payal that Akbar got the good news that his half brother Mohammad Hakim, the ruler of kubul has turned back towards Kabul. It was part of Malerkotla State till 1766 when it was annexed by Maharaja Amar Singh of Patiala state. There is an old fort at Payal. Akhara of Dashnamis sect is also located here. The place was known for manufacture of *rath* and *bahel* by the local carpenters. The country shoes (jutis) locally manufactured were popular in the area.

Qila Raipur :

It is about 21 kms. from Ludhiana with which it is connected both by rail and road. A historical Gurudwara named Damdama Sahib has been built here in the memory of ninth Sikh Guru Teg Bhadur. Also an Ashram of Sadhus known as Dev Puri Akhara is located here. The place is famous as a centre of rural sports. In the month of February a sports mela is held here every year by the Grewal sports society.

Rara Sahib :

It is located about 13 kms. from Payal on the bank of Sirhind canal. There is a big Gurdwara known as Gurudwara Rara sahib constructed through efforts of *sant* Ishar singh in 1936. People from far and near visit this Gurudwara for seeking blessings of Guru.

Sahnewal :

It is located about 16kms.. from Ludhiana on the G.T. Road towards Ambala. A historic Gurudwara named Damdama sahib is built at the place where Guru Gobind Singh stayed for some time after leaving Chamkaur sahib.

Bhundri :

It is located about 26 kms. from Jagraon, the tahsil headquarter. The place witnessed the scene of action of one of the battles of the First Anglo-Sikh war on 28th January, 1846. A 60 ft.-70 ft. high column with a platform was raised here to commemorate the event. The column has since fallen but the platform is still there.

Guru Sar Sadhar :

It is about 26 kms. from Jagraon and about 12kms. from Raikot. The place is associated with Sixth Sikh Guru Hargobind, who stayed here for 5-6 months. The Guru dug many wells and Sar or Sarovar (tank) near the hamlet of his devotee Bhai Jiwanda. On every full moon day (Puranmashi) a big gathering is held at the Gurudwara.

Hatur :

It is about 25 Kms. from Jagraon, The tahsil headquarters. There is an old mound. The place is identified with the old name of Ahichetti which was visited by Lord Mahavira, who performed Char Mansa (four months recess) in the time of Raja Kanak Ketu. The residents of Hatur believe that the place was deserted and rehabilitated seven times and the existing village was founded eight times. It is why the village was named Hatur (Hasht or 8th occupation). There are number of notable monuments such as Maqbara of Rai Ferozwala, Azmat Khanwali Masjid, Barkhurdarwali Masjid. The Idgah, Masjid Jali khanwali and Nikkamal Amath Math are completely destroyed. Two cattle fairs, one in April and the other in October, are held here every year.

Jagraon :

It is located 38 kms.. from Ludhiana on the Ludhiana-Firozpur Road and is the tahsil headquarter. It is said to have been founded by Rai Kalha with the blessings of Mohammedan Faqir Lape Shah. In 1806--08 Maharaja Ranjit Singh annexed this place and passed it over to the Kapurthala chief. There was a fort built by the Rais, which was improved in the times of Kapurthala chiefs. In 1846 it passed in the hands of the British after the 1st Anglo-Sikh war, 1846. Jagraon is said to be a town of the Pirs. The graves of some notable Pirs are: Mohkam Din, Bandli Shah, Kheve Shah, Chup Shah and Zahir Wali Shah. Every month cattle fair is held. The town is important market for wheat, cotton. There are number of cotton ginning, pressing and oil mills and other engineering units. The important Roshni fair is held here every year.

Nanaksar :

It is some 5 kms.. from Jagraon by rail. A beautiful Gurdwara was constructed through public donation by *Sant* Nand Singh. The Gurdwara is located in village Kaleeran. No woman *sevadar* is

allowed to stay inside the Gurdwara. A fair is held from 11th--13th Bhadra (August) every year on the death anniversary of Baba Nand Singh Ji. Thousands of devotees visit the Gurdwara on this occasion.

Raikot :

It is situated at a distance of about 25 kms. from Jagraon, the tahsil headquarter. It is also approachable from Ludhiana via Mullanpur Dakha. The place took its name from its founder Rai Ahmed, who built a fort (Kot) here. There is a historical Gurudwara called Tahilana, connected with 10th Guru Gobind singh who came here from Machhiwara on his way to Muktsar. The legend goes that while taking rest here Guru Gobind Singh asked one Nura, a local resident to bring some milk for him. Nura expressed his inability as no buffalo was in milk. On Guru's directions he brought a she buffalo and tied it with the tree. The she buffalo gave milk. The Guru gave one Gangasagar to Nura which had miraculous prosperities as when sand was put in this it flowed out but milk was retained. The incident was narrated by Nura to Rai Kalha, the ruler, who came to that place to pay his respects to Guru. The Guru gave him a Patta and a Khanda. On Guru's asking Rai Kalha deputed Nura to bring information about the two sons of Guru Gobind Singh from Sirhind. On meeting Nura he could understand the fate be fallen to his sons and cut a patch of grass, as a token of his anger to finish the 'zalamraj'. A Gurudwara was constituted at the place where guru rested. The Gurudwara is called Tahliana of Tahli sahib which was built through the efforts of sant Maghar singh in 1914. About 13 kms. from Raikot there is another Gurudwara Shatranj sahib where guru played chess (Shatranj) with Rai Kalha.

Bholapur :

It is in Samrala tahsil and is 10 kms. from Machhiwara. The place was founded by two brothers-- Bahlol khan and Bahadar khan, Afghans in the times of Emperor Akbar. The place has number of old monuments such as, Maqbara of Hussain khan, Maqbara of Alawal Khan (Suba of Deccan), mosque and tomb of Abdul Rahman Khan.

Jhar Sahib :

It is about 13 kms. from Samrala. The name of the village as per revenue records is Chuhapur. The old habitation has been deserted and the new has been named after the Gurudwara. According to the legend there was a *Jhar* where Guru Gobind took rest for about 8 hours after his escape from Chamkaur. A small Gurudwara was constructed at the place where he took rest. It was reconstructed in 1956-57. A big *mela* is held on every *Sangrand* of Bikrami month.

Khanna :

It is a tahsil headquarter and is connected with Ludhiana both by rail and road. It was founded by a Khanna Rajput and was named as such. Mai Daya Kaur was the last ruler of the town. On her death the Jagir lapsed to the British in 1850. The historical places located here are: an Imperial serai built in the time of Emperor Aurangzeb, an old Sikh fort and a Baoli built by Mai Daya Kaur. Khanna is an important market for wheat, paddy and groundnut. It is also emerging as an important industrial centre. It has several oil pressing and cotton mills.

Machhiwara :

It is situated at a distance of about 10 kms. from Samrala, the tahsil headquarters. It is also connected with Rahon by Road. It got its name from fisherman who resided there. Rajput settled there during the Gauri period. Later it became the headquarter of the Sodhis during the Sikh

period. The place finds mention in the Mahabharata though there is no historical evidence. A fort of bricks was built here by the Sodhis. There are other historical buildings such as Sujan Shahwali Masjid, Qazi Masjid (built in 1517 AD) and Ganj-i-Shahidan (treasury of Martyrs), Diwali Devi and Bhadarkali Devi temples built in 200 years ago. Sodhi Karam Singh built a Gurudwara 280 years back to commemorate the visit of Guru Gobind Singh. It was here that Guru's disciples Dharam singh, Daya Singh, and Man Singh spotted him and took to the house of Gani Khan and Nabi Khan. All the five (2 Muslims and 3 Sikhs) took the Guru in the disguise of Uch-Ka-Pir. It has a historical Gurudwara Charan Kanwal, where fairs are held on Baisakhi and Maghi.

Rahawan :

It is situated about 3 kms. from Khanna. The place has got an old mosque, which is now in bad shape. Archeological explorations at the old site have yielded antiquities dating back to 1000 BC, which belong to Aryan period.

Neilon :

It is located on the Ludhiana--Chandigarh Road near the bridge of Sirhind canal. The rich growth of trees on both sides of the Sirhind canal makes it an ideal spot for stay. There is a tourist guest house and a milk bar. Boats are also available on hire for boating in the canal waters.

(xii) Scope of Village and Town Directory

Village Directory :

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village, have not been given in the Village Directory but shown along with the urban component. The villages which are considered as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'uninhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

Town Directory :

The Town Directory is presented for each town covering different aspects of urban life. Like 1991 census, in the present census also there are seven Statements included in the District Census Handbook for presentation of data. The seventh Statement relates to slums which was numbered as IV- A in 1991 Census. Statements I to VI contain data about growth, density, sex ratio, physical aspects of towns, communications, municipal finances, civic, medical, educational and other amenities and trade, commerce, Industry, Banking facilities etc. Hence the data for the

towns of Ludhiana has been presented in these six Statements. Similarly the seventh Statement presents the data for slums.

Statement I shows status and growth history of the towns of Ludhiana District. Column 2 in this Statement indicates class, name and civic administration status of a town (as in 2000). Class of the town indicated under this column has been introduced to facilitate the analysis of town directory data at the State/U.T. and at the national level. Column 6 presents area in Sq. kms. while Column 7 presents number of households including houseless households. Columns 8 to 18 give population and growth rate of towns since 1901. Column 19 presents density and Columns 20 to 22 present sex-ratio.

Statement II shows physical aspects and location of each town as in 1999. Column 2 shows the class, name Civic Status of Town. Columns 3 to 5 show the rainfall and maximum and minimum temperature. Columns 6 to 13 show the name and distance of State HQ, district HQ, Tahsil HQ, nearest city with a population of one lakh and more, nearest city with a population of five lakh and more, Railway Station, Bus facility and Navigable river/canal from town.

Statement III shows the municipal finance of the Towns of Ludhiana District. The income and expenditure for the towns of Ludhiana have been presented in this Statement.

Statement IV provides information for civic and other amenities available to the Town. This Statement presents general population as well as the scheduled castes/scheduled tribes population as per 2001 census under Columns 3, 4 and 5. Columns 6 to 20 present data regarding road length, system of sewerage, number of latrines, method of disposal of night soil, protected water supply, fire fighting service, electric connections for domestic, industrial and commercial as well as road lighting (points) and others amenities.

Statement V gives information regarding medical, educational, recreational and cultural facilities available in the town. Population figures for 2001 census have also been presented for the towns of Ludhiana which will facilitate in analyzing data on facilities available to the people. Data pertaining to medical facilities have been obtained from towns and shown under Columns 4 and 5. The information on educational facilities has been shown under Column 6-15.

This Statement also shows, number of working women's hostels, recreational and cultural facilities available in the town under Columns 16 to 20.

Statement VI presents information in respect of trade, commerce, industry and banking services in the town. Columns 3 to 8 indicate three most important commodities exported and manufactured in the Town. Information on number of banks available in the town has been presented under column 9 whereas Columns 10 and 11 show the number of agricultural and non-agricultural credit societies in the town.

Statement VII shows the civic amenities available to all the 9 towns having slums falling in the jurisdiction of Ludhiana District.

Part - A
VILLAGE AND TOWN DIRECTORY

Section-I
Village Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE VILLAGE DIRECTORY

The Village Directory format has 25 columns and the details given under each column are for the village are as follows :

Column 1 : Serial Number :

Self explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Column 2 : Name and Location Code Number of village :

The name and location code number of the village is shown against this column. This also includes the forest and uninhabited villages.

Column 3 : Area of the village :

The area of the villages in hectares is given. Wherever the area figures were not furnished by the concerned department, the column is left blank.

Column 4 : Total population :

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households :

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it, in brackets, the distance in broad ranges viz. < 5 kms., 5-10 kms. and 10+ kms. of the nearest place where the facility is available is given. Column wise details are given below:

Column 6 : Educational :

Classes upto class V are included in Primary School comprising nursery school, kindergarten school, Pre-basic school, pre-primary school and junior basic school.

Classes from VI to VIII are included in the middle school.

Classes from IX and X are included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr.
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P (3), M (4), etc.

Column 7 : Medical :

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water :

The type of drinking water supply sources available within the village is indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	TK
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Source	SS

Column 9 : Post, Telegraph and Telephone :

It is indicated by following codes :

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10 : Commercial and Co-operative Banks :

If the village is served by any banking service, commercial bank, co-operative bank etc.the same is indicated in codes mentioned below along with the number of banks in brackets. If not available within the village, distance of the nearest place where the facility exists is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11 : Credit Societies :

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village, the distance of the nearest place where such facility exists is given.

(i)	Agricultural Credit Society	ACS
(ii)	Non-Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities:

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium are available in the village, the same is recorded in these columns. If not available, the particulars of the nearest place with the facility exists is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema/Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium/Auditorium	ST

Column 13 : Communications :

If the village is served by any mode of public/ private transport like Bus, Railway station or Navigable water ways, they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village :

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance :

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply :

Availability of Power Supply in the village, whatever may be the form of its use, is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper/Magazine :

If village receives any News Paper/Magazine the same is noted in this column using following codes :

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured :

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use :

Land use data maintained by the State/UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare (s) up to one decimal. Desh '-' is

recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below :

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages CD Block wise of the district.

Appendix-I-A Indicates number of villages CD Block wise having one or more primary schools.

Appendix-I-B Indicates number of villages CD Blockwise having primary, middle and secondary schools.

Appendix-I-C Shows number of villages CD Block wise with different sources of drinking water facilities.

Appendix-II Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A Indicates list of Census Towns which do not have one or more amenities.

Appendix-III It gives the land utilization data in respect of Census Towns/non-municipal Towns.

Appendix-IV CD Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V Summary showing number of villages not having Scheduled Castes population.

Appendix-VI Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII A and B The appendices show the list of villages according to proportion of the Scheduled castes and Scheduled Tribes to the total population by ranges.

Appendix-VIII Indicates CD Block wise number of villages.

Appendix-IX Shows number of different types of girls schools in a village.

INDIA
PUNJAB
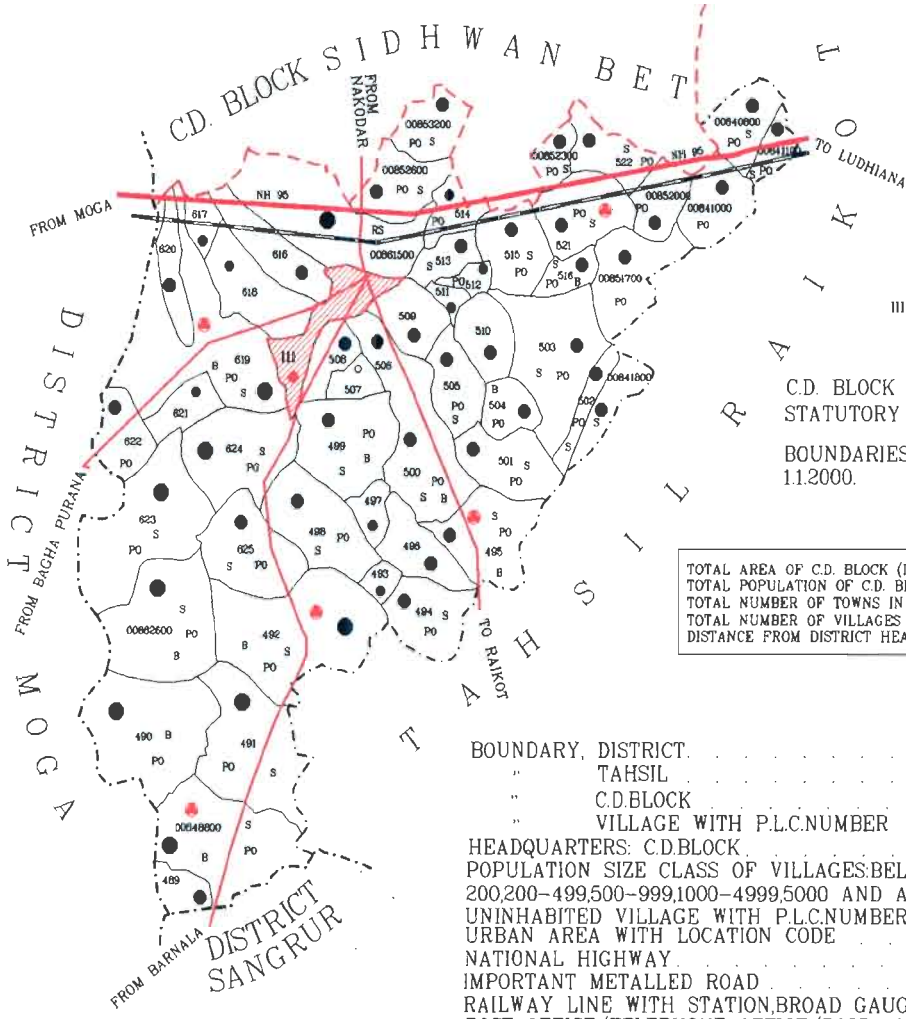
C.D.BLOCK JAGRAON
TAHSIL JAGRAON
DISTRICT LUDHIANA

Km. 1 0 1 2 3 4 5 6 Km.



C.D. BLOCK BOUNDARY EXCLUDES STATUTORY TOWN (S)

BOUNDARIES ARE UPDATED UPTO 1.1.2000.

TOTAL AREA OF C.D. BLOCK (In Sq. Km).	397.09
TOTAL POPULATION OF C.D. BLOCK	148,469
TOTAL NUMBER OF TOWNS IN C.D. BLOCK	1
TOTAL NUMBER OF VILLAGES IN C.D. BLOCK	52
DISTANCE FROM DISTRICT HEADQUARTERS (In Kms).	38

BOUNDARY, DISTRICT
" TAHSIL
" C.D.BLOCK
" VILLAGE WITH P.L.C.NUMBER
HEADQUARTERS: C.D.BLOCK
POPULATION SIZE CLASS OF VILLAGES:BELOW 200,200-499,500-999,1000-4999,5000 AND ABOVE
UNINHABITED VILLAGE WITH P.L.C.NUMBER
URBAN AREA WITH LOCATION CODE
NATIONAL HIGHWAY
IMPORTANT METALLED ROAD
RAILWAY LINE WITH STATION,BROAD GAUGE
POST OFFICE/TELEPHONE OFFICE/POST AND TELEGRAPH OFFICE — PO/TO/PTO
SECONDARY OR SENIOR SECONDARY SCHOOL — S
PRIMARY HEALTH CENTRE
BANK — B

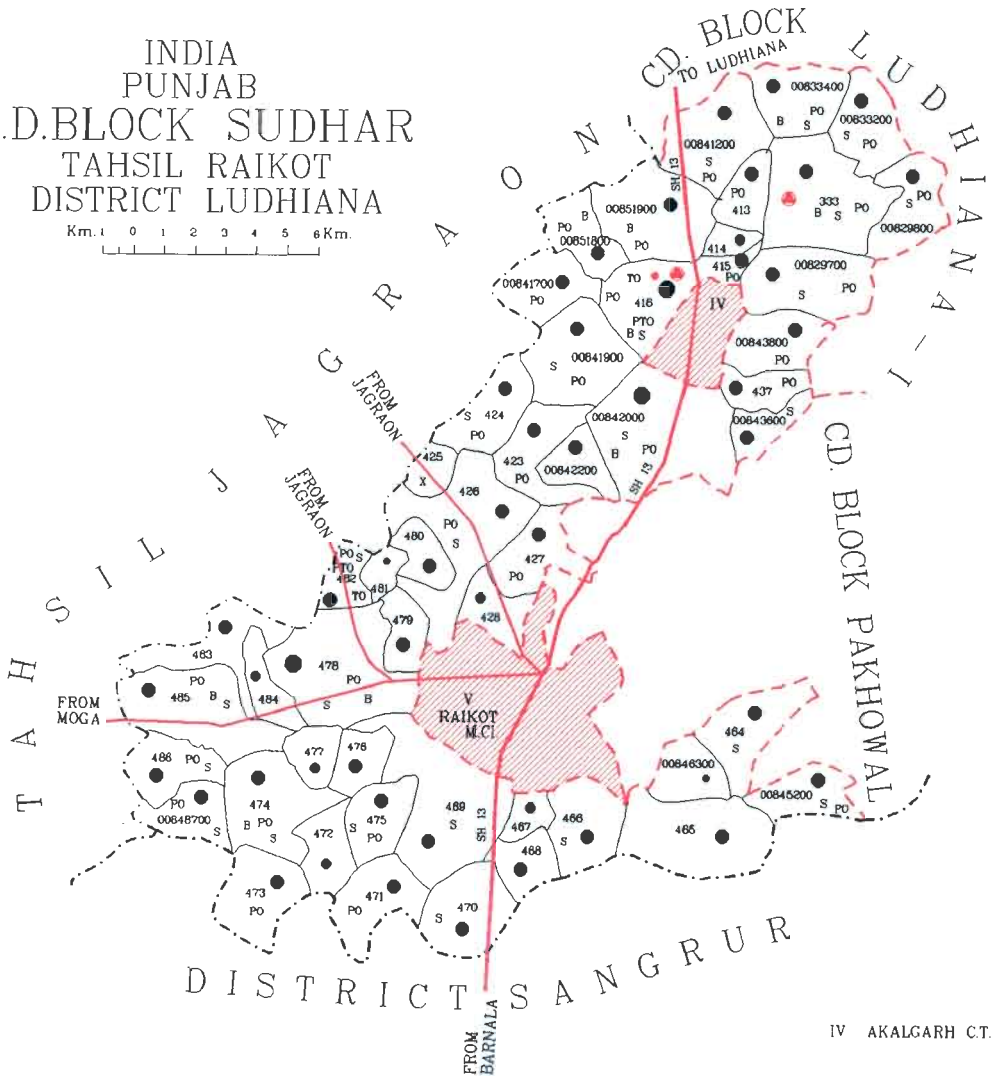
PUNJAB
C.D.BLOCK SUDHAR
TAHSIL RAIKOT
DISTRICT LUDHIANA

Km. 1 0 1 2 3 4 5 6 Km.



BOUNDARY, DISTRICT	
" TAHSIL	
" C.D.BLOCK	
" VILLAGE WITH P.L.C.NUMBER	00841300
HEADQUARTERS: C.D. BLOCK	
POPULATION SIZE CLASS OF VILLAGES:BELOW 200,200–499,500–999,1000–4999,5000 AND ABOVE	
UNINHABITED VILLAGE WITH P.L.C.NUMBER	X 00842500
URBAN AREA WITH LOCATION CODE	IV
STATE HIGHWAY	SH 13
IMPORTANT METALLED ROAD	
POST OFFICE/TELEPHONE OFFICE/POST AND TELEGRAPH OFFICE	PO/TO/PTO
SECONDARY OR SENIOR SECONDARY SCHOOL	S
PRIMARY HEALTH CENTRE	
BANK	B

C.D. BLOCK BOUNDARY EXCLUDES STATUTORY TOWN (S)

BOUNDARIES ARE UPDATED UPTO 1.1.2000.

TOTAL AREA OF C.D. BLOCK (In Sq. Km)	332.90
TOTAL POPULATION OF C.D. BLOCK	129,435
TOTAL NUMBER OF TOWNS IN C.D. BLOCK	2
TOTAL NUMBER OF VILLAGES IN C.D. BLOCK	51
DISTANCE FROM DISTRICT HEADQUARTERS (In Kms).	27

Section-II
Town Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column 2 : Class, name and civic administration status of town

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000-99,999	II
20,000-49,999	III
10,000-19,999	IV
5,000-9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000) and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(i)	Municipal Corporation	M.Corp.
(ii)	Municipal Committee	MC
(iii)	Municipal Council	M Cl
(iv)	City Municipal Council	CMC
(v)	Town Municipal Council	TMC
(vi)	Municipal Board	MB
(vii)	Municipality	M
(viii)	Cantonment Board/Contonment	CB
(ix)	Notified Area	NA
(x)	Notified Town	NT
(xi)	Notified Area Committee/ Notified Area Council	NAC
(xii)	Notified Town Area	NTA
(xiii)	Industrial Notified Area	INA
(xiv)	Industrial Township	ITS
(xv)	Township	TS
(xvi)	Town Panchayat	TP
(xvii)	Nagar Panchayat	NP
(xviii)	Town Committee/Town Area Committee	TC
(xix)	Small Town Committee	ST
(xx)	Estate office	EO
(xxi)	Gram Panchayat	GP
(xxii)	Census Town	CT
	Others columns need no comments.	

Statement II : Physical Aspects and Location of towns, 1999

Column 3 to 5 : Physical Aspects :

In these columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 & 8 :

Name or the State headquarters, District headquarters and Tahsil headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9 & 10 :

Name of the nearest city with one lakh and more and five lakh and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is mentioned.

Statement III : Municipal Finance 1998-1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is recorded.

Statement IV : *Civic and Other amenities*, 1999

Column 1 to 5 : Self explanatory :

Column 6 : Road length (in kms.) :

Information about kutcha/pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column 7 : System of Sewerage :

Generally, sewerage system is implied by the net-work of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines :

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil :

The various prevalent methods of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt

Sewerage	S
Others	O

Column 13 and 14 : Water supply :

Source and capacity of storage system. The following codes are used in these columns :

Column 13 :

(i) Tap water	T
(ii) Tube-well water	TW
(iii) Tank Water	TK
(iv) Well water	W

Column 14 :

(v) Over Head Tank	OHT
(vi) Service Reservoir	SR
(vii) River Infiltration Gallery	RIG
(viii) Bore Well Pumping System	BWP
(ix) Pressure Tank	PT

The information on major sources of water supply is given in column 13 and the storage capacity against each in kilo-litres (in bracket) is presented in column 14.

Column 15 : Fire Fighting Service :

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town, the name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections) :

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, they may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom

Column 6 to 9 :

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes :

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institutes	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like-Applied Art/Painting college, Pharmacy college, B.Ed. College, Teacher's Training Institute, Music/Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 :

Higher Secondary/ Intermediate/ Senior Secondary/ PUC/ Junior College level, Secondary/ Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

Schools up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle schools or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary/Intermediate/Pre University/ Junior College etc. This would cover 10+2 classes whether held in schools or colleges.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres :

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats :

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities :

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms:

Number of public libraries and reading rooms available in the referent town is recorded in codes as follows :

(i)	Public Library	PL
(ii)	Reading room	RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 :

Names of three most important commodities exported and names of three most important commodities manufactured in the town are recorded in these columns.

Column 9 : Number of Banks :

Number of Banks available in the referent town both Commercial and Co-operative banks is recorded against this column.

Column 10 & 11 : Number of Agricultural Credit Societies and Non Agricultural Credit Societies:

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town is recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like Municipality, Municipal Corporation, Town area committee etc.

STATEMENT

Part - B
PRIMARY CENSUS ABSTRACT

Brief note on Primary Census Abstract

The first census of the third millennium and twenty first century the Census of India, 2001 was the 14th continuous and uninterrupted Indian census since 1872. Thus, 2001 Census will provide data on population and its characteristics marking transition from one century and millennium to another.

The gigantic operation of Population Enumeration (considered by many to be the single largest and complex peace time administrative exercise in the world) was made possible due to the door to door universal canvassing of the Household Schedule by about 2 million enumerators and supervisors covering 593 districts, 5,463 sub-districts, 5,161 towns and 638,588 villages. The comprehensive Household Schedule which replaced the individual slip had three parts and two sides A and B. Part I contained the Location Particulars; Part II related to the Individual Particulars and Part III contained questions for Household engaged in Cultivation/Plantation. The part II of the Household Schedule had 39 columns and 23 questions all of which were universally canvassed and no sampling was resorted to during enumeration.

Data Processing :

A quantum leap was made in the technology front while processing the Census 2001 data both for Houselisting and Population Enumeration. The Census schedules for both the phases were scanned through high speed scanners in fifteen data centers across the country and hand-written data from the schedules were converted into digitized form through Intelligent Character Reading (ICR) software for creation of ASCII records for further processing. The designing and formatting of the Household Schedule had to be done very carefully using specialized software so as to ensure uniformity, which was an essential pre-requisite for scanning. The selection of appropriate state-of-art technology in data processing has made it possible to produce all the Houselisting as well as Population Enumeration tables on full count basis for the first time in the history of Census. For Census 2001, about 202 million schedules consisting of about 1,028 million records were scanned and processed within a span of only 10 months starting from October, 2002.

Task Force on Quality Assurance :

After the data is processed, it is expedient on the part of the data producing agency to satisfy itself about its quality before putting the same in public domain. This has to be done mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception has to be brought into play to understand both the existing and the new emerging trends of population distribution and characteristics. The other very important aspect of the data quality is to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, specially for small area population statistics.

A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2001 Population Enumeration results and finally clear them for use. The responsibility of the final clearance of data was with the Task Force on Quality Assurance (TFQA), headed by the Registrar General and Census Commissioner, India. The other members of the TFQA were the Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The Directors and their senior officers were required to make detailed presentations of data for their own state both in respect to the quality and the coverage and only after the full possible satisfaction of the TFQA, the population data was cleared.

There has been a major departure in Census 2001 from the past in respect of the procedure followed for finalization of the Scheduled Castes and the Scheduled Tribes population. In the earlier censuses, the total Scheduled Castes and Scheduled Tribes populations were finalized at the time of the manual compilation of the Primary Census Abstracts (PCA) at the Regional Tabulation Offices

which were specially set up for this purpose. The individual Scheduled Caste and the Scheduled Tribe population for each state was finalized much later based on manual coding done by the coders. In 2001 Census, each individual Scheduled Caste and the Scheduled Tribe have been coded directly on the computers by the Data Entry Operators through a process known as Computer Assisted Coding (CAC) and taken up along with the processing of PCA data. The CAC process involves pulling down, from the relevant dictionary of the Scheduled Castes and the Scheduled Tribes, on the computer screen and coding from the dictionary by referring to the image of the specific individual entry in the Household Schedule appearing on the screen. The CAC of the response on Religion wherever required, was also undertaken along with the processing of PCA. This is because the Scheduled Castes status had to be determined in relation to the religion of the individual. Two Special Task Forces, one on Religion and the other on Scheduled Castes/Scheduled Tribes were constituted for scrutiny and appropriate classification of these responses.

The main task of the Special Task Force on Religion was to appropriately merge or group the new responses encountered and code it into the appropriate religious community based on available literature and local knowledge. The Special Task Force on Scheduled Castes and Scheduled Tribes examined the different Scheduled Castes and Scheduled Tribes entries encountered and classified these into appropriate category of the Scheduled Castes or the Scheduled Tribes principally based on the Presidential Notification and the available literature. Thus a very systematic and scientific mechanism was operationalised to firm up the individual religion and the individual Scheduled Caste/Tribe returns. The Scheduled Castes and the Scheduled Tribes population in 2001 Census, is thus being finalized by aggregating the population data for individual Scheduled Castes and the Scheduled Tribe at appropriate geographical levels.

The entire work relating to the data validation and scrutiny was completed by all the States/Union Territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

Primary Census Abstract :

The Primary Census Abstract which is yet another important publication of 2001 Census gives basic information on Area, Total Households, Total population, Scheduled Castes and Scheduled Tribes population, Population in the age group 0-6, Literates, Main workers and Marginal workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural laborers, (iii) Household Industry Workers, and (iv) Other workers and also Non-workers. The characteristics of the Total Population includes Scheduled Castes, Scheduled Tribes, Institutional and Houseless population and are presented by sex and rural-urban residence. This data is presented at different levels, namely, India, States/Union territories, Districts, Cities and Urban Agglomerations (Population 1,00,000 and above) in three different tables. In addition, the Appendix of said publication provides Houseless and Institutional Households and their population by residence and sex for 2001 for India, State and Union territory.

Apart from the India and State/Union Territory volumes for Primary Census Abstract, the District Census Handbook contains District Primary Census Abstract, Appendix to District Primary Census Abstract, Primary Census Abstract for Scheduled Castes, Primary Census Abstract for Scheduled Tribes, Village Primary Census Abstract and Urban Primary Census Abstract of the concerned district in the state.

It was for the first time at the 1981 Census that the Primary Census Abstract (PCA) was brought out for the Scheduled Castes and the Scheduled Tribes separately on the pattern of General Primary Census Abstract. This practice was continued in 1991 also. In the 1961 and 1971 Censuses, such data were made available in Table C-VIII-Social and Cultural table and to some extent in the series 'Special Tables for Scheduled Castes/Scheduled Tribes'.

The format of Primary Census Abstract has been restructured slightly in the 2001 Census as compared to that of 1991 Census. The nine-fold industrial classification of main workers given in the Primary Census Abstract of 1991 Census has been discontinued and in its place, four-fold industrial classification of both 'main workers' and 'marginal workers' are included. In 1981 census only main

workers were presented into four categories. One of the novel features of the primary census abstract of 1991 census was the presentation of data of the population of age group 0-6 is continued in 2001 Census also. This will help the data users in better analysis and understanding of literacy data.

Level of presentation in District Census Handbooks :

The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts are as under:

Name of the Primary Census Abstract	Level of presentation
1. District Primary Census Abstract	District/CD Block/UA/City/Town
2. Primary Census Abstract for Scheduled Castes	District/CD Block/Town
3. Primary Census Abstract for Scheduled Tribes	District/CD Block/Town
4. Village Primary Census Abstract	CD Block/Villagewise
5. Urban Primary Census Abstract	Town/Ward level

The PCA Data for villages was presented CD Block wise for the first time in 1991 Census. This practice is continued in 2001 Census also. The data for each CD Block is presented both for rural and urban areas separately. All the villages within the CD Block constitute the rural portion and the Census Towns and Outgrowths are shown under the urban portion of the CD Block. In case a CD Block is spread over two or more districts, than portion which falls within the district is presented, the data pertaining to remaining portion of the CD Block is presented in the concerned District Census Handbook. The data in the Urban Primary Census Abstract for each town as well as for town with outgrowths in the district are presented. The data for all the wards and the outgrowths of the town(s) are also presented separately below the concerned town(s).

The District Primary Census Abstract is presented in 59 columns. The Primary Census Abstract for Scheduled Castes and Primary Census Abstract for Scheduled Tribes are presented in 52 columns. The Village Primary Census Abstract and Urban Primary Census Abstract are presented in 58 columns.

The concepts and definitions used in the column heading are explained under the sub heading 'Census Concepts' in the Analytical Note. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. The explanation regarding area figures presented at various level in the Primary Census Abstracts are as follows:

Area Figures :

The area figures supplied by local revenue authorities of the district in respect of Tahsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the CD Block is the total of the village areas coming under each CD Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level. The total area figures of all the Tahsils/CD Blocks within the district may not tally with area figures of the district because former represents land use area only. Similarly, the total of all the villages may not tally with the entire rural of Police Station/Tahsil. The difference may be due to the fact that while the area covered by hills, forests and rivers etc, have been accounted in the Tahsils and P.S. level the same may not be covered under the area of the villages. Apart from this it may also differ due to varying methods of computation adopted at different levels.

An appendix to District Primary Census Abstract has also been furnished showing urban enumeration, block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

Annexure-I

Number of villages under Gram Panchayat:

With the Constitution (73rd amendment) Act, 1992, the Census Organisation felt it necessary to provide population data for the territorial area of Panchayat. This required precise details of the territorial area of each Panchayat so that delineation of enumeration blocks (EBs) to be allotted to the enumerators could be done to meet this requirement.

It required careful delineation of enumeration blocks by the Charge Officers to ensure that EBs do not cut across the territorial area falling in the Panchayat. Different situations were well perceived. A Panchayat could consist of only one village or a number of complete villages. There could be another situation where the Panchayat may consist of some complete villages and parts of villages. Still there could be another situation where Panchayat could consist of a number of villages etc.

An exhaustive exercise was done to prepare Panchayat level data. However, we came across following types of situations which made it difficult to compile the Panchayat level data:

i) Some of the Panchayats have one or more than one village.

ii) Some of the Panchayats have only a part of the village.

iii) Some Panchayats include full village (s) as well as part of village (s).

All this has not made it feasible for us to present Panchayat level PCA.

Annexure-II

Age Specific Fertility and Marital Fertility Rates:

The following table shows age specific fertility rates in Punjab as well as in Ludhiana district for the years 2001 and 1991. The trends are observed almost identical both for the State and the district for 2001. Among different age groups the fertility rate is the highest in age-groups 20-24, 25-29 and 30-34. The trend is the same for rural and urban areas also.

The trends also show some fall in the fertility levels during 1991 - 2001 and this decline is noticeable in all age-groups except 25-29, 40-44 and 45-49 in the state. In district Ludhiana, the fertility rate plunged only in the group 20-24 and it was at par in the first 15-19. Nevertheless, the fertility rate shoot up in all other age groups.

AGE SPECIFIC FERTILITY RATES 2001 AND 1991

Age Group	Ludhiana						Punjab					
	Total		Rural		Urban		Total		Rural		Urban	
	2001	1991	2001	1991	2001	1991	2001	1991	2001	1991	2001	1991
1	2	3	4	5	6	7	8	9	10	11	12	13

40-44	0.016	0.013	0.017	0.019	0.014	0.006	0.016	0.016	0.018	0.018	0.014	0.011
45-49	0.028	0.007	0.030	0.009	0.025	0.004	0.025	0.008	0.026	0.011	0.023	0.006

The following table shows age specific marital fertility rates in Punjab as well as in Ludhiana district for the year 2001 and 1991. The trends observed are similar to those of total fertility levels. Surprisingly in Ludhiana district, ASMFR shot up in all the age groups in the year 2001. ASMFR is amazingly higher in rural as compared to urban in Ludhiana district in all age groups except 35-39 in 2001

Annexure-III

Measures of Fertility and Mean Age At Marriage Fertility Levels :

In demography, the word fertility is used in relation to the actual production of children or 'occurrence of births specially live births'. Fertility is a measure of rate at which population adds to itself by births and normally is assessed by relating number of births to size of some section of the population, such as number of married couples and number of women of child bearing age. In other words, it is a major component of population growth. In the 1991 census, questions on fertility related to age at marriage, number of children surviving at present, number of children ever born alive and any child born alive during last one year were asked. The first three questions were asked to all ever married women and the last question was related to currently married women only. The measures of fertility worked out are based on the F-Series Tables of 1991 & 2001 Census pertaining to Punjab State.

The following table presents important indices of fertility in Punjab as well as in Ludhiana district for the years 2001 and 1991 separately for total, rural and urban areas. There has been significant decline in the number of children ever born per ever married woman in the age group (45-49); the decline is relatively more in rural areas than urban in Punjab as well as in the Ludhiana district. Likewise there has been a significant decline in the child-women ratio also. However, the number of married couples per 1,000 population has gone up in the state and in rural areas of the district and it is vice-versa for urban areas. But in the totality, number of married couples per thousand population were declined by 1 point from 163 to 162 in the year during 1991-2001.

IMPORTANT INDICES OF FERTILITY

Fertility indices	Ludhiana						Punjab					
	Total		Rural		Urban		Total		Rural		Urban	
	2001	1991	2001	1991	2001	1991	2001	1991	2001	1991	2001	1991
1	2	3	4	5	6	7	8	9	10	11	12	13

Annexure IV

MOVEMENT OF POPULATION

What is migration?

Migration is the third component of population change, the other two being mortality and fertility. A person is considered as a migrant by place of birth if the place in which he is enumerated during the census is other than the place of his birth. Similarly a person is considered as a migrant by place of last residence, if the place in which he is enumerated during the census is other than his place of immediate last residence.

Internal and International Migration:

The migrational movements are of three types- (i) Migration within the State itself with its components-(a) Migration within the district of enumeration (intra-district migration), (b) Migration from one district of the state to another district of the State/UT (inter-district migration), (ii) Migration from one State to another state of the country (inter-state migration) and (iii) Migration from one country to another country. The first two streams together constitute internal migration, while the last type of movement is called international migration.

Why the people migrate ?

For the first time in the census, reasons for migration were elicited in 1981. Keeping operational constraints in view, the reasons for migration were broadly categorized as (1) employment, (2) education, (3) marriage, (4) family movement and (5) other reasons. Other Reasons for migration have been elicited only with reference to movement from place of last residence.

Impact of migration:

The growth of population of a particular place depends upon the biological variates such as mortality and fertility and migration. The knowledge of trends in migration helps in future planning of a place.

PERCENTAGE DISTRIBUTION OF INMIGRANTS BY PLACE OF BIRTH

Place of Birth	1991 Census			2001 Census		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
(I) Migrants born within the state of enumeration	692,047	201,019	491,028	984,619	377,664	606,955
	(71.3)	(56.1)	(80.1)	(66.6)	(54.9)	(76.9)
(i) Migrants born else where in the district of enumeration	373,979	106,450	267,529	639,648	255,917	383,731
	(38.5)	(29.7)	(43.6)	(43.3)	(37.2)	(48.6)
(ii) Migrants born in other districts of the State	318,068	94,569	223,499	344,971	121,747	223,224
	(32.8)	(26.4)	(36.5)	(23.3)	(17.7)	(28.3)
(II) Migrants born in other states of India	208,944	119,010	89,934	437,196	278,350	158,846
	(21.5)	(33.2)	(14.7)	(29.6)	(40.5)	(20.1)
(III) Migrants born in other countries	69,016	37,570	31,446	55,799	32,049	23,750
	(7.1)	(10.5)	(5.1)	(3.8)	(4.7)	(3.0)
(IV) Unclassifiable	980	460	520	0	0	0
	(0.1)	(0.1)	(0.1)	(0.0)	(0.0)	(0.0)
Total Migrants	**970,987**	**358,059**	**612,928**	**1,477,614**	**688,063**	**789,551**
	(100.0)	**(100.0)**	**(100.0)**	**(100.0)**	**(100.0)**	**(100.0)**

The above table gives distribution of inmigrants by place of birth in Ludhiana district as per 1991 and 2001 Censuses. Out of the total inmigrants in 2001, 66.6 per cent are born within the state of enumeration and 29.6 per cent born in other states/Union Territories of the country while 3.8 per cent born in other country. The figures for 1991 were recorded 71.3 per cent, 21.5 per cent and 7.1 per cent respectively.

PERCENTAGE DISTRIBUTION OF INMIGRANTS BY PLACE OF LAST RESIDENCE

Last residence	1991 Census			2001 Census		
	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7
(I) Last residence within the state of enumeration	703,696	206,599	497,097	1,015,689	391,705	623,984
	(72.3)	(57.5)	(80.9)	(67.8)	(56.2)	(77.8)
(i) Elsewhere in the district of enumeration	386,149	111,830	274,319	671,449	269,651	401,798
	(39.7)	(31.1)	(44.7)	(44.8)	(38.7)	(50.1)
(ii) In other districts of the state of enumeration	317,547	94,769	222,778	344,240	122,054	222,186
	(32.6)	(26.4)	(36.3)	(23.0)	(17.5)	(27.7)
(II) States in India beyond the state of enumeration	207,935	118,580	89,355	434,158	276,674	157,484
	(21.4)	(33.0)	(14.6)	(29.0)	(39.7)	(19.6)
(III) Last residence outside India	60,786	33,550	27,236	48,380	28,281	20,099
	(6.3)	(9.3)	(4.4)	(3.2)	(4.1)	(2.5)
(IV) Unclassifiable	1,000	450	550	1	0	1
	(0.1)	(0.1)	(0.1)	(0.0)	(0.0)	(0.0)
Total	**973,417**	**359,179**	**641,238**	**1,498,228**	**696,660**	**801,568**
	(100.0)	**(100.0)**	**(100.0)**	**(100.0)**	**(100.0)**	**(100.0)**

The above table gives distribution of inmigrants by place of last residence in Ludhiana district. As per 2001 Census, 67.8 per cent of the inmigrants had the place of last residence within the state but out of the place of enumeration. Another 29.0 per cent have place of last residence in other states/UTs within the country, while 3.2 per cent have their last residence out side India. The corresponding figures for 1991 were 72.3 per cent, 21.4 per cent and 6.3 per cent respectively.

Annexure V

Main Religions:

The instructions for recording this information are the same as in 1991. A brief analysis based on 1991 and 2001 Census data is presented below.

Question 7 of the Household Scheduled canvassed at the 2001 census pertained to religion of a person. The religion of the person was recorded as returned by the respondent. The six main religions in the country were recorded by using following codes:

Hindu	:	1
Muslim	:	2
Christian	:	3
Sikh	:	4
Buddhist	:	5
Jain	:	6

For all others, actual religion as stated was recorded fully. Further more, if any individual stated that he had no religion, the answer was recorded accordingly.

Religious Composition of Punjab's Population:

The numerical strength of the six main religious communities in the State and Ludhiana district in 2001 Census is as follows:

RELIGIOUS COMPOSITION OF POPULATION, PUNJAB AND LUDHIANA 1991 AND 2001

Religious Communities	Punjab				Ludhiana district			
	Total Population		Percentage in total population		Total Population		Percentage in total population	
	1991	2001	1991	2001	1991	2001	1991	2001
1	2	3	4	5	6	7	8	9
Hindus	6,989,226	8,997,942	34.4	36.9	849,445	1,205,128	35.0	39.7
Muslims	239,401	382,045	1.2	1.6	21,566	52,220	0.9	1.7
Christians	225,163	292,800	1.1	1.2	7,312	11,656	0.3	0.4
Sikhs	12,767,697	14,592,387	63.0	59.9	1,539,803	1,744,446	63.4	57.5
Buddhists	24,930	41,487	0.1	0.2	996	1,843	0.0	0.1
Jains	20,763	39,276	0.1	0.2	7,676	16,329	0.3	0.5
Others Religions and persuations	883	8,594	0.0	0.0	25	575	0.0	0.0
Religion not stated/ Unspecified	13,906	4,468	0.1	0.0	1,559	634	0.1	0.0
All Religions	20,281,969	24,358,999	100.0	100.0	2,428,382	3,032,831	100.0	100.0

As can be seen from the above statement, Sikhs form the predominant religious community in Punjab and they account for 59.9 per cent of the State's population according to the 2001 Census. The corresponding percentage for 1991 Census was 63.0 per cent. Hindus is the second largest religious community in the State and their share in the total population is 36.9 per cent which was 34.4 per cent in 1991 Census. This signifies that Sikhs and Hindus, the two most dominant religious communities in the state, together constitute 96.8 per cent of the state's total population.

The share of Muslims, Christians, Buddhists and Jains in the total population is 1.6, 1.2, 0.2 and 0.2 per cent respectively.

As per 2001 Census, in Ludhiana district, Sikhs constitute 57.5 per cent of the total population and this is slightly lower than that of the state as a whole. Hindus, the second dominant religious community in the district, account for 39.7 per cent of the district's total population. Together, the Sikhs and the Hindus account for 97.2 per cent of the district's population. Muslims constitute 1.7 per cent and Jain 0.5 per cent while the share of Christians is only 0.4 per cent.

Annexure VI

Marital Status:

Current marital status of each individual, irrespective of age, was obtained through Question 5 of the household schedule canvassed during 2001 census into following four categories:

1. Never married
2. Currently married
3. Widowed
4. Divorced or separated.

The instructions to enumerators for eliciting marital status were same as adopted in 1991 census. A brief analysis based on 1991 and 2001 census is presented here.

The following table exhibits data for Persons, Males and Females in percentage form regarding Marital Status.

MARITAL, STATUS OF POPULATION AS PER, 1991 AND 2001 CENSUS

Marital Status	Punjab						Ludhiana					
	1991			2001			1991			2001		
	P	M	F	P	M	F	P	M	F	P	M	F
1	2	3	4	5	6	7	8	9	10	11	12	13
Total Population	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0
Never Married	51.5	55.4	47.1	48.7	53.1	43.8	50.0	53.1	46.3	47.4	51.0	43.0
Married	45.1	42.3	48.2	47.2	44.6	50.2	47.1	45.0	49.7	48.9	46.8	51.5
Widowed	3.3	2.2	4.6	3.9	2.1	5.8	2.8	1.8	4.0	3.4	1.9	5.3
Divorced or Separated	0.1	0.1	0.1	0.2	0.2	0.2	0.1	0.1	0.0	0.3	0.3	0.2
Un-Specified	0.0	0.0	0.0	0	0	0	0.0	0.0	0.0	0	0	0

According 2001 Census, the population of the State is recorded 24,358,999 comprising 11,871,211 (48.7%), never married, 11,499,566 (47.2%) married, 938,678 (3.9%) widowed and 49,544 (0.2%) divorced or separated. As per 1991 Census Punjab State had a population of 20,281,969 comprising 10,452,444 (51.5%) never married, 9,146,158 (45.1%) married, 673,569 (3.3%) widowed, 8,768 (0.1%) divorced or separated and 1,030 (0.0%) unspecified.

In Ludhiana district, out of the total population of 3,032,831 as per 2001 census; 1,436,914 (47.4%) are never married, 1,484,234 (48.9%) married, 104,101 (3.4%) widowed, 7,582 (0.3%) divorced or separated. Thus, the patterns observed for the State and the district are almost identical.

Annexure VII

Sex and Educational level:

It has become customary for the Indian Census to obtain details of educational levels of the literates in the society. Question 13 of the Household Schedule canvassed during 2001 census aimed to elicit information on the highest educational level attained. The data so collected is put to public domain by classifying the population by sex and educational levels.

The following table shows percentage distribution of literates by educational level for Punjab State and Ludhiana district as per 1991 as well as 2001 Census.

PERCENTAGE DISTRIBUTION OF LITERATES BY EDUCATIONAL LEVEL AS PER 1991 AND 2001 CENSUS

Educational Levels	Total Rural Urban	Punjab						Ludhiana					
		1991			2001			1991			2001		
		P	M	F	P	M	F	P	M	F	P	M	F

As per 1991 census 21.8 per cent of the literates in Punjab were below primary level of education, 27.9 per cent primary but below middle and 18.1 per cent middle but below matric. A little over one-fourth (26.3%) of the literates in the State were matric but below graduation. It was only 5.9 per cent of the literates who had attained graduation or above level of education.

According to 2001 census 20.0 per cent of the literates in Punjab are below primary level of education, 25.6 per cent primary but below middle and 16.9 per cent are middle but below matric; 30.8 per cent matric but below graduation. Only 6.6 per cent of the literates in Punjab are graduate and above. Whereas there is some decline in first 3 levels as compared to 1991, last 2 level exhibit slight improvements.

In the district 17.6 per cent of the literates are below primary and another 24.1 per cent are primary but below middle. By contrast, the percentage of literates with middle and matric levels of education is greater in Ludhiana district as compared to the State. In the district 17.0 per cent of the literates are middle passed as compared to state with 16.9 per cent. Likewise the percentage of matriculation, with 32.6 in Ludhiana district is higher than that of the State with 30.8 per cent. In respect of Graduate and above level, this district (8.7%) also out does the State (6.6%).

Annexure VIII

Distribution of Different Mother Tongues:

Question 10 of the Household Schedule canvassed at the 2001 Census pertained to 'Mother Tongue'. It is the language spoken in the childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood is recorded as the mother-tongue. In case of infants and deaf mutes the language usually spoken by the mother should be recorded. In case of doubt, the language mainly spoken in the household may be recorded. Since the household may consist of persons related by blood or of unrelated persons or a mix of both, every person in the household is asked about her/his mother tongue because the mother tongue of each member of a household need not necessarily be the same. These may be different for different members in the household. The definition of 'Mother Tongue' is the same as in 1991.

Mother Tongue and Language data based on 1991 & 2001 Censuses is given here. The distribution of languages/mother tongues which returned 10,000 or more speakers each at all-India level (including of mother tongues grouped under each) for the district by sex separately for rural and urban areas. The unclassified mother tongues and the mother tongues having less than 10,000 speakers have been relegated to 'other' mother tongue category. The table is divided into two parts; Part A- Scheduled languages with the mother tongues grouped under each, and Part B- Non-Scheduled languages with the mother tongues grouped under each. This naturally leads to the recording of a very large number of mother tongue names. It is to be mentioned that mother tongues as returned in the census are, basically, the designations provided by the respondents. These designations or mother tongue label need not be identical with the actual linguistic mediums. For assessing the correlation between the mother tongue designations and actual languages and dialects, the raw returns of census were subjected to thorough scrutiny and rationalization. This resulted in 1576 rationalized mother tongues in 1991 for the entire Country, which was further classified following the usual linguistic methods. The total number of languages so arrived at is 114 returned by 10,000 or more speakers at the all-India level and grouped under appropriate languages.
